The Beatles have released a cult mix of hilarious pop songs and psychedelic experiments. Although they never wrote as many creepy tunes as Alice Cooper, Rob zombie, or Marilyn Manson, The Fab Four gave us some creepy tracks. Here are the creepest songs that The Beatles have ever written. The Beatles in 1964 By Michael Ochs Archives/Getty Images Day in life Remains one of the most popular and critically acclaimed Beatles songs. The song's popularity is touch awesome, given its terrifying overtones. The song sees John Lennon and Paul McCartney narrating four seemingly disconnected vignettes. One is about a man who died in a car crash, the other is about a World War II film, the third is about the daily life of a man, and the fourth is about four thousand holes in Blackburn, Lancashire. None of these texts are scary in themselves, however, each of them followed by a cacophonous instrumental break that sounds like the gates of hell open. The song is intentionally oblique, like much of the Work of the Fab Four from that period. A simple explanation for the meaning of the song - and the apparent dissonance between its mundane lyrics and its disturbing instrumental - is that there are many horrible things lying beneath the surface of everyday life that we all choose to ignore. It's amazing that this song came from the same band that gave us cutesy songs like She Loves You and Penny Lane. Revolution 9 By The Beatles in Getty Images Costumes As the Beatles' career continued, the band began embracing avant-garde music more and more. The most avant-garde play ever released by the Beatles was Revolution 9. Here's a song that's not really a song - it's a collection of random noises, including the sounds of a plate, incomprehensible chatter, and a monotonous male voice repeating the words number nine. What exactly the song means, one can only guess. Thanks to the title of the song, some listeners speculated that the song is about the chaos and violence inherent in all revolutions. The song can just as easily explain how the Beatles played with their listeners or tries to surpass all the strange songs they previously wrote. Whatever the purpose of the song, it's more disturbing than just about any other song ever released. In a slightly more perfect world, Revolution 9 will be an omnipresent Halloween staple in place of Michael Jackson's Thriller or Ghostbusters' Ray Parker Jr. predictably, Revolution 9 has never become one of the Beatles' most popular songs because it is devoid of lyrics in the usual sense. 'Blue Jay Way' The Beatles perform songs on the Magical Mystery Tour. Because the film was poorly received, its soundtrack is sometimes unfairly overlooked. One of the great songs from the soundtrack is George Harrison's Blue Jay Way. A song about George is waiting for his friends to return from the tour, but his musical arrangement makes him feel much more sinister. The song has a frighteningly slow tempo and odd time signatures that make it feel disorienting and strange in the most delightful Beatles-esque way. No other band in history has had as much influence on culture as the Beatles. The English super-band rocked the charts, music halls and a whole generation of the sixties. And then, as quickly as they got there, they left. The band disbanded in 1970, and the music scene was never the same. But was the gap caused? It turns out that a number of things contributed to their fall. That's what we know about why The Beatles broke up. How did you break up with The Beatles? In 1960, four musicians, John Lennon, Paul McCartney, George Harrison and Ringo Starr gathered in Liverpool to form The Beatles. They soon topped music charts around the world and, according to Lennon, were more popular than Jesus. After almost a decade of popularity, the band stopped touring in 1966. The first sign of their disintegration occurred in 1969, when Lennon privately announced to his bandmates that he was leaving the band. But the public became aware of their separation only in 1970, when McCartney also decided to leave the band. By the end of the same year, all four members were working on solo projects, and they terminated the formal business partnership. When McCartney made the breakup announcement, he listed several reasons that contributed to their separation. He said: Personal differences, business differences, musical differences, but most of all because I had a better time with my family. Temporary or permanent? I really don't know. The death of The Beatles manager weakened their band The Beatles Getty Images In 1967, the band's manager, Brian Epstein, was found dead in his home from a drug overdose. Epstein was a workaholic who gave all his to the group. He helped them to become the success they dreamed of, but because of his inattention to his personal life he suffered from depression. According to Forbes, Epstein's story reveals the psychological costs of providing others without meeting their own needs. The Beatles depended on Epstein, often turning to him to resolve his conflict. After he left, the group was left unsure how to manage themselves or work through the arguments that often arise. After Epstein's death, the Beatles had problems collaborating, and each member of the band began to engage in independent Agenda. They tried to try but with each of them trying to move in different directions, it became difficult to come up with a cohesive sound that they could all agree on. Tensions began to escalate between the group's members, and disputes became more frequent. In a 2016 interview, McCartney again tried to explain what led to the band's death. The business thing divides us apart, he said. Arguments about how to deal with their new manager, and trying to collaborate on their latest album Let It Be, have been blamed as reasons for the split during this interview with the BBC. I was depressed. That's what you'd do. You've been breaking up with your friends for life, he added. Fans accused Yoko Ono of breaking up The Beatles towards the end of the Beatle collaboration, Lennon began a relationship with Yoko Ono. He began to spend all his time with her, including in the studio, which irritated other members of the band. Lennon worked with Ono on an artistic collaboration, leaving his duties with the band behind. To make matters worse, when there were disagreements between the band members, Lennon was silent and instead conceded what Ono thought about the situation. According to Rolling Stone, when the band members objected to Ono attending every Beatles meeting, Lennon said, Yoko just wants to be accepted. She wants to be one of us. Starr replied: She's not a Beatle. John, and she never will. But Lennon disagreed: Yoko is a part of me now. We are John and Yoko, we are together. Fans always thought Ono played a part in the breakup of the band, and she was treated with insults because of it. She was named, Jap, Chink and Yellow in public. Lennon had to protect her, sometimes physically, from attacks. In fact, no one is responsible for breaking up The Beatles. This was the culmination of many different causes and the growing tension between the group members, which eventually led to their separation. Fans mourned the breakup, but we'll always have our songs recorded to share with future generations as long as we continue to enjoy it. Take that top poll of boy bands Take That came first poll and was crowned the best boy band ever - beating even the Beatles! A spokesman for One Poll, which conducted the survey of 5,000 music fans, said: This should be up to their surprising return. Here's the top ten in full. 1. Take that 2. The Beatles 3. Jackson Five 4. Westlife 5. Monkey 6. Boyzone 7. Bee Gees 8. Backstreet Boys 9. New kids on Block 10. Osmonds, who voted for the Osmonds! The most joyous recipient of this gift must have been you, the father who until now had to try and love your beloved sons of Liverpool through clumsy, outdated formats like 8-tracks and MP3s. Now, it's just a few clicks to go from a children's cover version (looking at you, Caspar Babypants) to a genuine article and facilitate a whole new kind of musical discovery for your younger John - or Paul Depending on whether your child is smart or cute. To make sure you have the most amazing baby in kindergarten, follow the advice of a couple of Beatles scientists. NYU music professor Thomas McFarlane and Beatles teacher Scott Freiman don't just have the best jobs ever; they have their own children that they had to inspire in those dark ages, PBS (it's Pre Beatles Streaming). But even if the environment has changed, the message remains the same: All you need is love ... and encyclopedic knowledge of Beatles children's melodies, as well as some interesting anecdotes. Start with the sound kids hear the sound and they instantly like it, or they don't. They don't know Jack about chords or the relationship between bass and melody or why you can't hear the symphonic genius they clang on that piano toy. Based on my experience, what young people really respond to is the sound, says McFarlane. I remember the quality of the harmonica part on There in place. I just loved that harmonica. I was fascinated by it. Start your child's Beatles lessons with a simple, clean slate and let their tastes evolve as their understanding and sound research does. This strategy is designed very well for the actual Beatles.Remember that each song tells the story of The Beatles created by a cast of characters matched only by The Simpsons and possibly the Muppets. Every song on Sergeant Pepper is about character, Freiman says. Mr. Kite, Lucy in the sky, Beautiful Rita. A lot of personalities in these songs that makes them great for kids. Adds McFarlane: They're all reference points; people you can connect with inside songs that make it more enjoyable and relevant to your experience. The BeatlesYour kid is virtually guaranteed to find something relatable, either in a character who may be the distant cousin of his favorite fairy tale hero for the night, or many references to Mop Tops' childhood and children. Rocky Raccoon tells a story. Penny Lane and Strawberry Fields Forever are idyllic references to John Lennon's childhood home (places he remembers as it was). Yellow Submarine had Paul straight up seeing if he could write a children's song just because no one else in rock 'n' roll would thought, and he was a cheeky bastard like this. Martha My Dear is about Paul's old shepherd, and their biggest song ever, Hey Jude, was originally written by a child - McCartney hoped it would comfort Lennon's son, Julian, through his parents' divorce. Aside from the story of the song, the Beatles are always ahead of their time and also made movies - perfect for brainwashing already screen-obsessed kids. Most freiman fathers asked to say they introduced their children to the Beatles through the film Yellow Submarine. And even if they have no idea what the hell is going on, he says, at least the kids will giggle through a hard night's hard day watching 4 funny looking English guys run away from screaming teenage girls. Getty ImagesEmbrace Singalong (All Together Now!) Just at the time when the Beatles are coming, there was an explosion of children - a boom, you might say - and the band recognized it. McCartney in particular has a flair for singalong. Yellow Submarine had Paul straight up seeing if he could write a children's song just because no one else in rock 'n' roll would have thought. There's something very easy to understand about music, says Freiman. Complexity is hidden in wonderful melodies, choirs are easy to sing, it is easy to understand the lyrics; they write songs that kids can really appreciate because they're fun. With that in mind, start from the beginning. Early tunes such as I Want to Hold You Hand, She Loves You, and Please Please, I are the big little bits kids can dance and click along with, says Freiman. Other singalongs he recommends: the meaningless Ob La Di, Ob La Da, Ringo voice octopus garden, and always lovely Here comes the sun. And if all your child really wants to do is hit his head: Back in the USSR on repeat. Ease organic discovery by helping to make compounds as you probably know children are programmed to immediately give up everything you present to them as cool. A more effective, if also more methodical, approach is to establish a link between what they already like (Wheels on the Bus) and what you know they should like (Drive My Car). Listen to what they listen to, see what they're reacting to, and identify connections to things you're familiar with in the Beatles catalog, whether it's pure sound or lyrical content or ideas, says MacFarlane. For example, his now 24-year-old son responded to the theatricality and intensity of Eleanor Rigby as a 5-year-old classical music lover. When your kids appreciate the whole process the Beatles are part of, you stand a better chance of getting them to really listen. Of course, it's easy for him to say - his child was in classical music at 5 years old.
