## D link dir 809 manuale italiano

Product Status (Revision B1): Live The AC750 DIR-809 dual-range wireless router is an affordable but powerful wireless networking solution that combines the latest 801.11ac high-speed Wi-Fi specifications with dual-band technology and Ethernet ports to provide a seamless network experience. Download the Data Sheet Store List Increased reach and reliability of wireless AC technology covers your home even more, while advanced DIR-809 security features keep your data and network safe from intruders. The Ac750 DIR-809 dual-dian wireless router uses the latest wireless technology to deliver top Wi-Fi speeds of up to 433 Mbps at 5GHz and 300 Mbps at 2.4GHz. Browse the Internet, chat and play online on 2.4 GHz bands using a smartphone or tablet while streaming digital content, at 5 GHz through the bandwidth of streaming players and tablets. You can also use the AC750 wireless dual-core router to increase coverage of your existing Wi-Fi network. To get started, just open the browser and get access to the master of customization, and then follow simple step-by-step instructions. You can also use the Fast Router Settings app, which is available for iOS and Android smartphones and tablets. 1 Maximum wireless signal speed derived from the design specifications IEEE 802.11ac and IEEE 802.11n. The actual bandwidth of the data is variable. Network conditions and environmental factors such as network traffic, building materials, and structure, as well as network overheads, reduce the actual speed of data bandwidth. Environmental factors can negatively affect the wireless signal range. Wireless coverage and speed are the relative performance of the D-Link. How do I connect my laptop to a wireless router? Read the answer Always stay up to date Subscribe to the router setting newsletter This page contains a user guide in the form of a PDF for the Dlink DIR-809 router.
