

## Activate Windows Server 2008 R2 Crack

DOWNLOAD: <https://tinurli.com/2ikc8u>

---

cat file for your KMS server can be distributed to all computers of the network via pcsx-mod or another pcsx-mod like PowerISO. Once the .cat file is created, transfer it to the Windows computer which you want to activate from pcsx-mod and run the command: `pcsx-mod -i C:\users\administrator\desktop\Slmgr.cat` When you run the command, it will ask you to open the slmgr.vbs file, you can save the File as slmgr.vbs. Make sure to save it in your pcsx-mod folder, and you can open it and press enter. After a few seconds, it will ask you to confirm the setup, and the message "The Windows Service is running on this computer" will appear.

2.2.2. Rebooting after installing the KMS server with PSO of IEC61937 ----- ![Slmgr.cat on pcsx-mod]( \*\*Notes:\*\*

1. Before you reboot the PC, backup the .cat file of your KMS server, and it will be placed in the slmgr.vbs file. 2. Copy the file to the Windows computer that you want to activate via the KMS server, and you will see the message: "The Windows service is running" after a few seconds.

2.2.3. Rebooting after installing the KMS server with PSO of IEC61937 ----- ![Slmgr.cat on pcsx-mod]( 520fdb1ae7
