With Box, you can safely store files in the cloud. You can also access information wherever you are at any time. This intuitive app syncs information from your desktop and phone. It is a handy tool when you are in meetings or away from your desk. With Box, you can share the necessary files with your colleagues or update documents from your mobile device. There's also the ability to view different types of files and enjoy full-screen quality. When you install Box, you get 10GB of cloud storage for free. You can add extra security to more sensitive files with file-level security controls. You can access your information and folders offline for added convenience. You can view documents and stored files using a real-time search tool. There is also an easy way to share large files with friends and colleagues. This is done through the link-sharing method. All you have to do is copy the automatically generated link and you're good to go. It's a versatile cloud storage program because you can save photos and videos too. The download speed is slow at times, but in most cases it depends on your network connection. Box is a secure, fast, and user-friendly system to manage important files wherever you are. If you have a phone, you have access to all your important information and folders at the touch of a button. Where can you run this program? This app requires Android version 5.0 and up. Is there a better alternative? No. Box is a reliable cloud storage system for Android phone users. DropBox works in a similar way, but with less space. Switching to cloud storage makes it easier to access files. Box is a safe and secure place to store your information. It's an effective tool and a top-notch folder management option while you're out of the office at any time. Should you download it? Yes. If you find yourself away from your desk and need critical information on the go, this is an effective system to use. Hotspot Shield created a VPN designed to be fast, easy and clean. Open the app and it gets to work right away and finds the best servers available. A VPN for Android that focuses on speed, ease of use and privacy. It's a security app that stands out. Hotspot Shield VPN is a clean, simple interface. Once you start, it shows you a map with your location. The default option is to find the fastest local server. Others, like the Windows version, choose the previous server connection. That makes a version way faster to use. Another top-notch feature is that it adds selected apps to the secure list. When these apps go online, Hotspot Shield protects them without interference. A VPN can be set to deactivate when the phone is in sleep mode to save battery life. It can also be installed for automatic activation depending on the networks, such as mobile, unprotected and secure networks. Privacy is the main reason for the use of VPNs and, at first glance, the company promises to prevent data registration. There seems to be some logging going on, however. The company states that all data generated by online activity is removed from servers after the session closes. The company is trustworthy, but it is a VPN. Data registration, in a sense, wins the target. There is a free version, but all the interesting features are available through 1-month, 6-month and 12-month plans. The payment setting is comparable to UltraVPN and CyberGhost. However, this app still stands out among the crowd. Where can you run this program? Hotspot Shield VPN works on Android 7.0 and up. It's also available for iOS, Windows 7 and later, as well as Mac. Is there a better alternative? Yes. There are other VPNs with more functionality out there like Express VPN and CyberGhost. Hotspot Shield VPN design for speed and ease of use, and it does exactly what it claims with very little customization. The fine print tells us that it does log some user data and it's not the cheapest of the group. There have been so many thoughtful technologies packed into this VPN so it can find the fastest and safest route for data. It sacrifices some customization for simplicity, but the compromise provides a very sleek tool. Should you download it? Yes. If you're looking for a safe, safe and fast way to browse the web, this is a great choice. Virtual private networks (VPNs) bypass websites and regional blocks and allow you to create secure Internet connections. X-VPN provides new IP addresses for mobile and desktop devices. X-VPN is a virtual private network application that works across multiple platforms to help you maintain your online privacy on any device. The X-VPN comes with an intuitive, simple user interface. You get access to the servers with one button to turn off. On display, you'll also find a Megabyte manual that shows you how much data you have left. When it comes to servers, the X-VPN has them in more than a dozen countries, and it will connect you to one automatically depending on your place of residence. The speed and usability is excellent once you are connected. For added security, this program also supports P2P file sharing. You can transfer and download files without compromising your privacy. The main selling point for this service, however, is its flexibility. You can sync it on all devices and use it on multiple Android, Apple, Windows and Mac platforms. Unfortunately though, it lacks the Linux version. Where can you run this program? X-VPN works on Mac OS mobile devices Windows 7 and above, as well as on Android and iOS mobile devices. Is there a better alternative? Yes. While the X-VPN is good, it comes with some restrictions, especially if you don't pay. Some excellent alternatives include ExpressVPN, Anonine, and AMUNE Private. Private It comes with some drawbacks, the X-VPN is great for cross-platform users. This VPN gives you everything you need. Should you download it? Yes. If you find yourself needing a VPN on many devices. Otherwise, there are better alternatives, though not so flexible. Play a fun word puzzle game on your Android with Word Connect Word Connect is a free game app for Android that allows you to try to form words from stirring letters. This is the official app that allows you to watch videos from the Internet directly on the Android device. YouTube works just like its web version: subscribe to channels, search videos, see recommended videos, share videos and that it also has voice search and instant search suggestions. You can also throw videos on tv, comment on videos, and also loved and disliked them and letting the world know how you feel about said video. Enjoy watching YouTube videos for Android. Check out Tom's Guide for more information android and Android Games. Also check out the forums for Android. Download If you were in search of a decent VPN on Android that won't break the bank, your wait is over. After releasing on iOS earlier this year, the popular free and unlimited VPN Opera is finally available for Android devices. Opera VPN allows you to connect safely to the Internet anywhere in the U.S., but it also allows you to route traffic through Canada, Germany, Singapore or the Netherlands so you can access any blocked content. And more virtual seats are on the way. In addition, Opera VPN blocks advertising and advertising trackers, although the app itself has several of its own. You can also check the security of any Wi-Fi connection with its built-in security test, which checks connection encryption and identifies any potential security threats. Best of all, it is a completely free service with no login or subscription required, and there are no restrictions on the data. You can download it in the Google Play Store at below.iPhone: Virtual private networks (VPNs) are often expensive business, but opera, the company is better ...
