Lincoln movie study guide answer key

Are you taking AP World History this year? Or consider taking it at some point in high school? Then you need to read this AP World History study guide. Instead of cramming every name, date and place in your head, learn how to learn the AP World History exam so you can learn basic ideas and feel ready for the day's test. We'll also go through some of the key strategies you can use to help you prepare effectively. The AP World History test is challenging, with only 8.6% of test participants getting 5 in 2019. But if you study properly during the year, you may be one of the few students who ace this test. Below are six tips to follow to be well prepared for the AP World History exam. Read each one, apply them to the test preparation, and you'll be well on your way to maximizing your AP score! 2020 AP Test Changes due to COVID-19 Due to the covid-19 coronavirus pandemic, AP tests will now be conducted remotely, and information on how this will work is still evolving. Keep up to date with the latest test dates, AP online review and what this means for you in our article of frequently asked questions AP COVID-19. Why should you learn at the AP World History Test? It's really so important to study the AP World History Test? Absolutely! But why? Let's start by taking a look at the kinds of points students usually get on the exam. The following chart shows what percentage of the test subjects received each possible AP score (1-5) on the AP World History test in 2019: AP Score Percentage Tested, who received a score of 5 8.6% 4 18.8% 3 28% 2 28.8% 1 15.8% Source: College Board As you can see, approximately 57% of test participants scored 2 or 3, about 27% scored 4 or 5, and only 16% scored 1. Since most testers scored 3 or below on this Test, it is safe to say that many AP world history students have not scored as highly as they could have been. (However, the test is undergoing some big changes for the 2019-2020 school year, so we can't make too many direct comparisons between this old version of the test and the new one. While 3 is not a bad SCORE by any means, some colleges such as Western Michigan University require at least 4 in order to get a credit for the exam. If the school you are applying wants 4 or higher, putting in sufficient learning time for the test is a definite requirement. Also, if you apply to highly selective schools, 5 on the AP World History Test (or any AP test, in fact) may act as a tipping point in your favor during the admissions process. Finally, getting a low score test, i.e. 1 or 2, can make colleges question your ability to pass the test or question your potential to succeed in your school. You don't want this to happen! What's on the AP's World History Exam? Before we give you our six expert research tips for AP World History, let's briefly summarize the structure and content of the test. The AP World History Examination consists of two sections: Section 1 and Section 2. Each section also consists of two parts: Part A and Part B. That's what you come across on each part of each section of World History: Section Type Question Time No Questions % Score 1A Multiple Choice 55 Minutes 55 40% 1B Short Answer 40 Minutes 3 (for third, select 1 of 2 tips) 20% 2A Paper-based paper (DB) 60 minutes (including 15-minute reading period) 1 25% 2B Long essay 40 minutes 1 (choose 1 of 3 tips) 15% And here Review the types of tasks that you will be asked to perform: Analysis of historical texts, as well as the opinions of historians and interpretations of history Score historical documents and make an argument in support of your assessment Write an essay on the subject in the World History Note that by the 2019-2020 academic year, AP World History is now much less in scope and is called AP World History: Modern (another course and exam titled AP World History - The ancients is in the process of being done by the College Board). These changes were made mainly in response to ongoing complaints that the initial course on world history was too broad in scope and had previously spanned thousands of years of human development. Hopefully this will make the test a little easier! Now that you know exactly how the AP World History test is set up, let's take a look at our six expert research tips. We don't claim our best secrets for ourselves. How to explore for AP World History: 6 key tips below are our best tips to help you get a great score at the AP World History Test. Tip 1: Don't try to remember everything if you start your AP world history class with the expectation of memorizing all human history, think again. Although AP World History is testing for a wide amount of time, you don't have to learn every tiny detail along the way; rather, the course is dedicated to teaching key models, key cultural and political developments and significant technological changes throughout history. Beginning in 2019-2020, the AP World History course and exam will be organized in nine divisions that cover a range of periods, starting around 1200 AD and ending with the present: AP World History (modern) unit time period % exam Group 1: Global tapestry 1200-1450 8-10% Unit 2: Exchange Networks 8-10% Unit 3: Ground Empires 1450-1750 12-15% Unit 4: Connections 12-15% Block 5: Revolutions 1750-1900 12-15% Block 6: Consequences of Industrialization 12-15% Block 7: Global Conflict 1900-present 8-10% Unit 8: Cold War and Decolonization 8-10% Unit 9: Globalization 8-10% For each period, you need to know the major world powers and forces driving politics, economic development and changes however, you don't have to have every detail memorized to do well on the test. Test focus on understanding big patterns and developments, and be able to explain them with a few key examples. For example, you don't have to know that in 1492 Columbus sailed the blue ocean; you also do not need to know the details of his travels or information about his cruelty. However, you should be able to explain why The European colonization of America took place, as well as the economic consequences it had for Europe, Africa and America, and how colonization affected people's lives on these three continents. Knowing a few specific examples is essential to success in the short answer section. The answers to questions 1 and 2 will present you with a secondary source and a primary source, respectively, and then ask you to provide a few examples or reasons for a broader topic or historical movement that relates to the information provided. You'll have flexibility in which specific examples you choose, just as long as they are relevant. The short answer section is three long questions that cost 20% of the total number of tests. You will have 40 minutes to complete it. Specific examples can also strengthen your essays and improve your ability to break multiple options on the topic; however, first focus on understanding the big picture before trying to remember the nitty-gritty. If you come from THE HISTORY OF THE U.S. AP, this advice may seem strange. But unlike U.S. history, which is more fine-grained, AP World History exam writers don't expect you to know everything, since they test a much bigger topic. AP USA History will essentially test 400 years of history in one place, so it's fair to expect that students know a lot of the right names and dates. But for world history, the same level of detail is not expected; this test has been taking place for 800 years around the world. Instead, you should focus on understanding common patterns of important topics through history. This will not only save you time, but will also keep you sane as your tutorial throws literally hundreds of names, places and dates at you throughout the year. Speaking of your tutorial... Tip 2: Keep an eye on reading! When it comes to AP World History, you can't sleep through class all year long. Skim the prep book in April and then expect to get a perfect 5 on the test. You learn a huge piece of human history, after all! Trying to cram for this test at the end of the game is both stressful and ineffective because of the huge amount of material you have to cover. And all this reading will hurt your eyes. Instead, keep up with reading and do well in your world history class to make sure you build a solid foundation of knowledge throughout the year. So when it hits the spring, you can focus on the exam himself and the topics he'll probably check, as opposed to desperately trying to learn almost a thousand years of human history in two months. If your teacher doesn't already require you to do something like this, be sure to keep notes about your readings throughout the school year. It could be in the form of outlines, a resume, or anything else that is useful to you. Taking note will help you process the readings and remember them better. Your notes will also be an invaluable spring research tool. Finally, check the website of any tutorial that uses your class. Many tutorial websites have additional features such as head outlines and resumes that can be excellent research resources for you throughout the year. Tip 3: Read the Preparatory Book (or two) in the spring, even if you keep up with AP World History throughout the year, you'll probably be a little hazy on the topics you learned in September when you start studying for a test in March or April. That's why we recommend getting a preparatory book that will provide a much broader overview of world history, focusing especially on the topics tested on the exam. (Make sure this is an updated book for the new modern focus of the AP World History Course and exam!) If you have studied well throughout the school year, reading a preparatory book will trigger your background knowledge and help you consider. Think of your prep book as your second, much faster to go through world history. And in case you're wondering, no, the preparatory book itself won't fill you in on the necessary depth of knowledge for the entire test. You can't replace reading a textbook during the year by reading a preparatory book in the spring. The AP World History multiple-choice section especially can ask some pretty specific questions, and you'd definitely blind spots if all you do is read the preparatory book rather than the actual tutorial. Also, you won't be able to explain the examples in your essay in detail if you've only read a few paragraphs about major historical events. Tip 4: Be prepared to move to 1 MPA (minute for question) To prepare for the AP World History exam, knowing the material is only half the battle. You should also know how to use your time effectively, especially in the multiple-choice section. A section with multiple answers (section 1, part A) asks 55 questions in 55 minutes and costs 40% of the total score. This only gives you one minute to question, so you have to move fast. And to be prepared for this fast pace, practice is the key factor. Taking the AP World History Exam without practice first would be like jumping in a NASCAR race without a driver's license. To practice walking on your own, it is very important that you get a preparatory book containing practical tests. Even if you read the textbook carefully, took notes and reviewed the material, the very Practice the actual sections with multiple options so you can get used to the timing of the test. While there are several standalone questions, most of them come in sets of three or four and ask you to look at a particular source, such as a graph, image, secondary source, or map. It's a good idea to skip and get back to tough questions (as long as you keep track of time!). Your teacher should give you several quiz options or tests throughout the year to help you prepare for the test. If your teacher doesn't do this, it will unfortunately be up to you to find a few practical questions from prep books and online resources. See our full list of AP World History practical tests here (and be sure to find updated materials for the new 2020 Modern Exam). You have to create your own multiple-choice strategy as you study, for example by using the elimination process, be prepared to read and analyze photos and diagrams, and be constantly aware of your time. I recommend wearing a watch when you practice so you can keep an eye on how long you spend on each issue. Finally, be sure to answer every question in the exam. There are no penalties for incorrect answers, so you might as well guess about any issues you're unsure of or don't have the time. In short, make sure you practice AP World History several options for questions, so when you sit down to take the exam, you'll feel confident and ready to move fast. You will get 60 minutes per question based on documents, or DB, including a 15-minute reading period; The DB is worth 25% of your final class. After, you get 40 minutes for a long essay that costs 15% of your bill. For each essay, you should be able to brainstorm quickly and write an essay that responds to a request, is well organized, and has a compelling thesis. The dissertation is a summary of one sentence of your main argument. For the sake of the AP essay, it is best to put a thesis at the end of the introductory paragraph so that the grader can find it quickly. When arranging your essay, each paragraph explains one part of the argument, with the theme of the sentence (basically, a mini thesis) at the beginning of each paragraph that explains exactly what you are going to For the DBS, you will need to bring all or most of the provided documents into your argument in addition to your background information about the testing period. Testing, for example, in the DBS about the effects of the Spanish flu during World War I, you must demonstrate your knowledge of World War I as well as your ability to effectively use documents in your argument. See our full DB's writing guide here. For Long Essay, it's up to you to provide specific historical examples and show your broad understanding of historical trends. (Again, that's why doing reading is so important since you have to provide and explain your own historical examples!) Throughout the year, your teacher should have you doing writing assignments, including in-class essays, to teach you how to write good essays quickly. Since you will be writing your essays manually as well, if you struggle with writing manually quickly, you can create your writing (i.e., your ability to quickly translate thoughts into words by writing additional practice essays on your own. If you need to work on writing fluency, it's best to practice with lighter writing topics. First, find a magazine hint to write about (this site has hundreds). Next, set the timer. 10 to 15 minutes is better. Finally, write as much (and as fast) as you can about the hint without making any big spelling mistakes or grammar. When the time is up, count how many words you have written. If you do this several times a week, you will step up your writing speed, and your word counts will continue to grow. Once you have created this skill, it will be much easier to tackle the AP World History free answer section. You can also practice on your own using the old AP World History to freely answer questions. However, note that the test has been revised for 2019-20 (now the focus of its attention is only 1200-present) and 2016-17, so the old questions will have the old content and instructions. In fact, there's actually used to three essays on the AP World History test-in addition to DB, there has been a change over time essay and comparison essay. Now, there's only one long essay. Be sure to compare old questions with the most up-to-date examples of the most up-to-date AP and exam courses. Tip 6: Take practical exams and set a target score in the spring, aiming to take at least one full practice exam-ideally in late March or early April once you've learned most of the world history material. By full practical exam, we mean the entire AP World History test. Time yourself and take it in one sitting, after official time limits. Why would you do that? This will give you the opportunity to experience what it would like to take a full AP World History exam before you sit on the real thing. This is You build stamina and improve your time. All the practice in the world won't help you if you run out of steam on your last essay question and can barely think. Also, set a target score for each section. The good news: you you should be directed 100% to Section 1 and committed points for each essay in section 2 in order to provide the 5th highest possible score. Far from it, really! The truth is that a high score with multiple response options (50/55) with average short answer scores and free response scores (say 6/9 for a short answer, 5/7 on DB and 4/6 on a long essay) can net you a score of 5. Similarly, an average score with multiple response options (35/55) with high short answer scores and free response scores (say, 8/9 for a short answer, 6/7 on DB and 5/6 on a long essay) can also help you 5. Set realistic score goals based on your personal strengths. For example, a really good writing student can go the average multiple-choice/strong essay route, while a stronger test taker can go the other way. You can also be somewhere in between. Also, don't be put off if your target score is much higher than your current scores. The whole point of the practice is to eventually meet your goal! If you have a target score, practice, practice, practice! Use old exams, practical exams in (high-quality) preparatory books and free-answer questions related above. You can even ask your teacher for old AP world history tests and essay questions. (Just be aware of key changes in the AP World History exam in recent years, so you can tweak practical questions as needed.) The more you practice before the test, the more likely you are to meet or even exceed! - your AP goal. Bottom line: How to prepare for the AP World History Test While AP World History is a challenging test, if you follow all our tips in this AP World History training guide and properly prepare for the entire school year, you can definitely pass the exam and may even be one of the few students who gets 5! Just make sure to keep up with reading, use an updated spring training book, and practice a lot for multiple options and free response sections. With clear target scores for each section and plenty of practice under your belt, you'll have the strongest chance of getting 5 on test day! What's next? How many AP classes should you take in total?
