All wild bird subscribers who get digital access now have digital access to their magazine content. This means that you have the option to read your magazine on the most popular phones and tablets. To get started, click on the following link [.com mymagnow website](#) and learn how to access digital magazines. Get digital access they get tired of hiking to spots or the time will come in the careers of all duck hunters who are ready to explore more water. Therefore, there comes a time when you need a boat to get in and out of the swamp, but not just any boat, the best duck boat. But where did you start looking for a boat and what do you need for your rig? When you hear Prodrive, most people think of shallow water outer plates and you'll be right. But Prodrive creates its own line of high quality aluminum boats. Prodrive currently offers three models: the X series, the SBX series and the TDX series. Each of the series has its own backsui use and features. But the X series and TDX or wood series that stand out most for being the best duck boat. The X Series - Prodrive X Series started to match their wonderful shallow water outer plate. After numerous tests and drafts, the X Series was built with tapered chimes and a smooth bottom, giving better top-end speeds, higher weight capacity and, of course, manoeuvrability. Because when it comes to duck hunting, you need to have a rig that can be cut around stumps, logs, grass, shallow spots with an arm twist. Driving through the harsh conditions of wetlands and flooded wood, The Pro-Drive created a hull thick enough. Therefore, all boats are composed of 1/8 thick 5086 aluminum. Layout and design - When it comes to X series styles, sizes and layouts, there are a lot of options to choose from. Therefore, you may choose the option to choose a 16'-20' boat with a width of 48-54 and a side of 18 side height-21. The inner layout has many options. However, some of the most common and

most necessary for duck hunting are: Multi-position gun box, trolling motor bracket, LED light bar, subfloor other than sliding paint and of course many other options. When it comes to amenities, Prodrive didn't much to wonder. If you are looking for one of the pioneers of tough, sturdy aluminum boats. Excel Boat is the best duck boat manufacturer. Location located inJust 70 miles north of View, Arkansas, little rock. Excel boats tailor boats to fishing and hunt customers need. F4 Shallow Water - F4 Shallow Water Aluminum Boat has been designed to provide maximum performance when matched with surface drive motors like Mad Buddy. If you're looking for a boat that can slide down logs, slide on wetland grass and fly into duck holes, the F4 is the best duck hunting boat. With a smooth, almost flat bottom, F4 can go through just about anything. 16-19 tapered chin and it provides a quick response turn. If you've ever wondered where the fall of wood or shallow water began. Looking no further, Excel boat owner Glenn Foreman started this revolution more than 18 years ago. Now everyone wants this feature when they are looking for the best duck boat. Available in 16-19 feet and a width of 51 to 60, plus you can throw anywhere from 14's 50-60 horse motor. It's one tough boat that's why it makes our list of the best duck boats. Layout and design – Excel F4 is infinite when it comes to overall functionality and layout. First, it is equipped with rod and gun storage, bow rails, completely flat floors, storage trays and storage boxes. But if you plan to take F4 to the next level, there are a lot of options and designs to choose from. Choose from four different floor plans, from single to dual gun storage or a fully open layout. In addition, there are 8 different colors to choose from to suit your hunting ground. With live wells and trolling motors, you have the option to make this not only the best duck hunting boat, but also a top-notch backsui fishing boat. Since 1992, War Eagle has been a pioneer and stands out for creating the best duck hunting boats. All War Eagle boats are made using all welded aluminum, and a wing transom design that allows each boat to maneuver and process in any type of water condition. War Eagle is known for having absolute best camouflage paint and quality. Therefore, if you are looking for a proven process that was last painted in the wetlands, War Eagle should be one of your top 3 duck boats to consider. Gladiators are 17'4 and 50 wide. It is also made with 23-inch sides to keep dry, but low enough to climb with waders. But gladiators are also built with step float boxes in transom to make it easier for you and your dog to get into your duck boat. Gladiator bows are made extra long, which war eagles call duckbilest! helps to deflect through grass, cattail and brush. This comes as a standard feature along with adjustable hand rails, rear pods, floor and wall Linex sprays. If you've never had a Linex bedliner, they're one of the toughest surfaces, and they're not just tough against bruises, scratches, water, and anything else you can put through it. Essentially, what it means, it's perfect for a duck boat. Layout and design – Gladiator has one of the more open layouts and floor plans. It is not as customizable as other duck boats. But sometimes keeping it simple is perfect for hunting ducks. It's about duck manties, gun cases, dogs, and anything else you need to take restrictions on. Having open floor space is perfect. While gladiators have a lot of storage for small items, and any boat accessories you might need. Have you ever wanted to make exactly how a completely custom duck boat you came up with it? Located in Morgan City, Louisiana, Uncle J is a leading manufacturing and welding company that has been turned into one of the best duck boats for the production of custom shallow water boats. Custom Shallows - All Uncle J boats are custom made and designed to suit your input and needs. First, you need to call the shops and start informing them that you plan to use a boat, duck hunting, bow fishing, or bay boat. You can then proceed to the required width, length and motor size requirements. Most people assume that ordering a custom duck boat is going to break the bank. But it's not that you have something you never need, it's quite the opposite. Other manufacturers can build boats with storage, a feature that costs a lot but is not worth hunting you do. Instead, Uncle J can start on a low budget and add what you want or want. The second additional advantage to this model is that you can build features on your boat in the exact place you want. For example, go down to where you want the seats to be, such as where you need the lights or where you want to install the gas tank. Layout and Design – As we've talked about, layout and design are up to your imagination and budget. If you want a gun storage box, or cooler holder, just let them know. Uncle J Boat builds it into your specs. When it comes to quality and manufacturing technology, Uncle J's boat uses only the best people in the industry. They spend countless hours guaranteeing that your boat will stand up the conditions you can throw at it. Gator Tracks began in 2000 with the help of Allen Wall, Kent Saxon and David Porter. Gator Trax was born due to the need for custom shallow water boats. The three founders had a passion and intent on ordering what their customers wanted. Therefore, when Gator Tracks formed the idea of custom shallow waterOff. In addition, with the help of the mud motor craze, Gator Trax has become a famous brand and duck boat manufacturer. When Gator Trax first started, they could only chose three sizes. However, with growth and demand, you can choose from more than 50 sizes and combinations, but you can also customize the layout and features. Marsh series shallow water boats - because most waterfowl hunters are looking for boats that can reach untouched duck holes and swamps. You need something that has enough size for the gear but it's not the size that's hard to hide or maneuver. That's why Gator Tracks developed the Marsh series of boats. Back water beasts designed to hold three or four hunters. It depends on whether you want a 14' or 16' boat. Layout and Design - When it comes to the design and layout of the Marsh series, it is fully customizable. When you place your order, you can simply run through the add-ons that your boat has. For example, if you want a custom-built matching blind, you can add it. If you need a specific seat in a specific location, you can also order it. There are also options for LED kits, gas tank mounts, GPS mounts, battery brackets or box lid pads. The options are endless and it all depends on what you need and what you have for your budget. However, Gator Trax is very transparent in price. Therefore, if you check out their website, you will get a great idea of what a boat or accessory costs. Powler Boat has been building and creating some of the best duck hunting boats for the past decade. Each boat is designed and tested for duck hunting. The model is not developed without the intention of hunting from there first. With that in mind, each boat is built with 0.125 thick 5086 marine grade aluminum. Designed for any surface drive, long tail, or overboard mounting you want within capacity. The Powler boat is designed to make it through some of the roughest water found in duck hunting holes. They are so confident that as long as you own the boat, the hull has a lifetime guarantee for all welds and transoms. I would have to say that they are one of the only manufactures that support such a guarantee. Phowler Extreme Sneak Boat - There are 6 different models to choose from from Powler boats. But the best duck boat models must be their Proullar Extreme Sneak series. Built at a bottom of 44 inches or 50 inches and a top of 60, this sneak boat is the perfect duck hunting boat setup. The boat is designed with an almost cockpit approach to keep your gear and itself dry, but the rest discreet, which is very stable in any water condition. As for the strength of the boat, it can support anything from a 12 hp copper head to a 36 hp prodrive. The Proullar Extreme Sneak is one tough boat that has a number of options. For example, you can choose from 14' to 18' boats, depending on where you hunt. LayoutDesign – When it comes to layout and design, the Extreme series has many options, similar to Gator Trax. Powler has an online price, so you can build a boat with your budget in mind. All you have to do is let the Powler team know what you want. Some of the options available are deck rails, layout covers, layout sheets, hydro turf, extra handles and much more. Finally, certainly at least the Timber Creek boat. As one of the new custom boat manufacturers, Timber Creek has bringing back custom boat buildings with a touch of modernization. With so many established duck boat manufacturers offering series and lines. Timber Creek has the motto Whatever you can do we can. They have resulted in fully custom duck boat making while being a leader in innovation and custom fabrication work. Each boat is custom-made to your specs for the exact purpose you want the boat to be. Tyler Cluitt is the sole owner and founder of Foley, AL. He grew up in the back water of the Alabama River and mobile causeway. With his extensive experience and production details, he started one of the best duck boat companies today. Custom Shallow Water Boats – As mentioned as of Tyler today, Timber Creek Boat offers only fully custom boats. No model or model is the same unless you need it. Instead, each boat is built for each specific customer. If you look at the options that Build Tyler and his team have completed. Each boat has unparalleled detail and craftsmanship. If you want to do the best duck boat in regards to manufacturing and details, you need to reach out to Tyler to discuss options and builds. Layout and design - When it comes to layout and design, there's nothing timber creek boats don't do. If you can dream of it or want it, Timber Creek will manufacture it and design it for you. The options are endless and that's why if you simply can't find what you're looking for on a duck boat. Reach for Timber Creek and start building. When it comes to finding the best duck boat for yourself. There are a lot of things to consider. The first thing to think about is how the length of the duck boat will meet your needs. But first, you need to think about where to board the duck hunting boat. Do you hunt in large lakes, rivers and coastal waters? The downside is that when you get a 20' + boat, you limit yourself to being able to hunt small seas and swamps. Having a long boat not only provides stability, but also adds weight capacity, but the longer it is, the harder it is to get to small water or rivers. Therefore, many waterfowl hunters look for boats that are 17-18' as a general starting point. This length provides plenty of room and stabilityMost duck hunting water. But if you tend to hunt wood, small rivers, swamps. The 14-16 boat is going to give maximum manoeuvrability around stumps, logs and shallow water. I always recommend riding a friend's rig where you want to hunt with an idea of how the length of the boat works best. Width – If you are similar to the length of a boat, the width has its drawbacks in both, but not so much. Most duck boat suppliers have a couple options to choose from, from 44-50 widths. The narrow boat makes it easy for small shoals. But the wider bottom provides more stability and floor room for the police, dogs and hunters. I'll take a look at your local boat dealer and see what suits your gear most comfortably. You buy a brand new boat and don't want the width to be too small for the gear you need to hunt ducks. There are quite a few options when it comes to determining the type of hull design to choose from. First, the best for shallow water are flat-bottomed or modified V-hulls. The reason the flat bottom works and is widely adopted is because it slides and skims on shallow water, logs, brushes and grass. But once you start entering the rough water, the flat-bottomed boat will be one sketch adventure. They do not have the ability to remain controlled in rough waters like the V-hull. There are a number of V-style options, from the full V hull to run the bow on the stern. There is also a modified V-hull that runs V on the nose but transitions to a round or almost flat bottom. The V makes it easier to steer the boat if there are choppy waves or rough water, but runs a little deeper in the water. Each duck boat manufacturer has their way of building the hull, it is sometimes what distinguishes them. Therefore, talk to your local dealer to understand what is best for you most likely hunting conditions. The ultimate question when you are buying a duck boat is choosing a motor. Now, many years ago the craze for having mud motors took off. Everyone thought you should have a mud motor and could duck the hunt. But that's not always the case, but it's about the state and water you're planning a duck hunt in. They each have advantages and they can't both shoot ducks, but consider two options before choosing your dream duck boat. Mad Motor - Mad Motor is a really shallow water motor. They can essentially run outside the water or in the water. Instead of the motor needing water to cool the water and circulate it. The mud motor is air cooled. This allows you to run on the surface of the water. It gives you the ability to push away about logs, stumps, mud and anything you can skim across. Plus mud motor is built tightlyNails, depending on the manufacturer, they have their own way of protecting props, but they can do anything. The downside is that the motors are above the surface and close to the driver, so they are very large. In addition, they do not have a maximum finish speed or load carrying capacity height. Plus if you are a Great Lakes hunter or a big river hunter the water will soon be rough. Surface drive motors do not have the same stability as overboard. Overboard – The use of outboard motors is perfect for large deep V-boats that need greater water stability. Outboards are tried and true, there are a lot of places you can reach overboard. Plus almost all outer plates have the opposite, but having the reverse with a mud motor has become a pretty new addition. Plus, if you want to use your boat for fishing in the off-season, the outboard motor will be much easier to run than a mud motor. However, there are a lot of people who have two boats in two different hunting situations. Nevertheless, they each have their purpose and both can get you into your duck hole. For most duck hunting boats you can customize it according to your preferences, if you have the ability to buy new. For example, if your boat requires LED lights, you can specify where and how many you want. If you need a gun storage locker on the right, left, or both sides of your boat, you can make it happen as well. In addition, with the number of boat manufacturing, they each have their very own style and layout. One of the best things about buying a duck boat is that each usually has a different hair than the next. As each hunter has its own way of storing and then hunting. When you go to build or buy the best duck boat, look at all the layouts to see what works best for you. Consider where to save and place it. Maybe you are going to buy a duck boat to use and would like to make it more customer or add some accessories to suit your hunting style. The following options are the top ones to consider: for the number of mornings, it is useful for you to have a bright LED spotlight and enter the swamp before the night. I recommend looking at the light bar for the front or side of the boat. Not only will this help you find your way in the morning, but it will shed light on the spread of your ont. They are very affordable and you can turn them off as you hit your spot in the morning if you run them on the switch. I also recommend pivoting like ram mounts and running them into something that can be turned to give you the option to adjust them. One thing most people tend to ignore is hiding their duck boat. People I'm inclined to cover up more are always better than less. Flashy camouflage paint work is not always going to hide you from ducks. ThereforeWetland grass and natural-looking cover are happening to give your duck boat a much more realistic look. Avery Real Glass is easy and easy to attach to blinds and duck boat rails. Plus it can be cut or tied in any way you want to hide your boat. Best Duck Boat Best Duck Hunting Boat Duck Boat Marsh Boat Boat
