Create Send Call Values to URL Action ⓘ

General Settings

URL:

https://api.e4sip.com/groupsms/2318675309-5551234567/2319464162/This is a group SMS test/

In the URL field above, enter the full URL path to the CGI program that you would like the IVR to pass data to. You can add values to be passed to your URL by clicking the "Append" button below. This will append the selected variable name to the end of your URL enclosed with %'s, When this URL is submitted the %'s and variable names are replaced with their corresponding values.

Example: http://www.mydomain.com/cgi-bin/app.cgi?account=%ACCOUNT%&digits=%PIN%
