branded Android-worn watch, then the D'09 could be the one you should have the look. Although it doesn't work on Android or the forked version of Android, it can meet your basic needs as a smartwatch. It works at Nucleus OS and provides features such as sleep monitoring, Pedometer and sedentary reminder, etc. D'09 comes with a few themes to be precise with five themes, and you can change them by following the steps listed below. Note: The steps listed below may range from one version of the D'09 smartwatch to another. On the market there are several variants of D'09 smartwatches, which include Padgene, Tsufeng, Durga, GDLL, zidu, 321OU, Wzpiss, Sazooy, Heshi, AEIFOND, Minger, SinoPro, etc. Now choose general settings. Scroll down until you see the theme settings. Click on it and you will be presented with five themes. Choose any theme and click Home on your watch to take a look at the topic. If you don't like the theme, then follow steps 1-3 again and this time choose a different theme. That's it! Now you know how to change the theme on the D'09 smartwatch. How to change the theme on S'09 Smart Watch Phone was last changed: March 5, 2020 by Alpesh Alpesh dz09 smartwatch themes download
