A weekend of participatory global online broadcast honouring Water as our source of All Life, highlighting personal and social innovations that address the needs of a planetary culture in harmony with Water.

Advocacy | Activism | Ceremony | Community | Music | Dance | Film | Education

WHAT IS THE VOICES OF WATER EXPERIENCE

Sparked by the theme of the 28th UN World Water Day of *Valuing Water*, this innovative experience will feature the resonant voice of Water as it flows through our world to explore “*Valuing Water as Source*”. We are engaging the many voices of Water Stewards and Water Lovers around the world as we draw up our collective wisdom; each speaking from our unique perspective as indigenous protectors and wisdom keepers; scientists and ceremonialists; musicians and storytellers; elders and youth.

You're invited to join your voices to the stream as we embrace a true paradigm of Water.

With deep gratitude, the Voices of Water Team

Voices of Water - Valuing Water as Source

OUR PURPOSE

By exploring the many dimensions of Water living inside and outside of us, we look through the inclusive lens of whole systems transformation seeking to bridge the gap between our inspiration and our actions. Our aim for the Voices of Water World Water Day experience is to highlight individual social innovations that address the pressing collective challenges facing all Watersheds on Earth at this time.

We remember Water as the source of all life on Planet Earth. Water is our birthright, not a resource commodity to benefit only a few members of one species. Now is the time to rally our networks, listen to the indigenous elders, and begin learning how to connect with the abundance of all life and the Earth itself. We are being called to stand as the True Guardians and Stewards of our Source Water and fragile Biosphere.

OUR FORMAT

Voices of Water seeks to champion the individual social innovations and solutions addressing the pressing collective challenges facing every Watersheds at this time.

The journey begins on March 20 with our "Water Immersion" gatherings of Water Stewards ~ opening the field with a Water blessing ceremony followed by a full day of participatory play, connecting our participants with exploratory co-labs, workshops, forums, meditations, and many other immersive activities conducted in multiple Zoom breakout rooms.

The "Dance for Water" FUNdraiser celebrates the spring equinox on March 21 as we raise the vibration in a 8 hours broadcast of live performers and pre-recorded DJ tracks streaming from various locations. This is a fun-filled frequency experience into Water expressed as music and movement.

March 22, on "World Water Day", we will flow through a series of 4-hour curated themed program blocks highlighting speakers, presentations of both live and pre-recorded music, film, and activism inspiring art inspiring activism. Themes of this day are following our Source Water through the planetary Water Cycle.

This final day will include simultaneous Zoom breakout rooms where our audience can engage in open conversations expanding on the topics from the main broadcast, and explore how they can apply these solutions in their own lives. The intention of this event is to move us into activation for the next steps.
