Evaluate and review your experience This particular company helps people with addiction obstacles. Most customers are by court order to participate in the program. In addition, the company helps people with addiction obstacles. Most customers are by court order to participate in the program. In addition, the company helps people with addiction obstacles. Most customers are by court order to participate in the program. In addition, the company helps people with addiction obstacles. Most customers are by court order to participate in the program. basante arduo pues se trabaja con pacientes con enfermedades o trastornos mentales y eso estresa un pocoWas this review useful? The company for the step. There is a chance of promotion if you are in the right department. The company promotes from the inside first. Then the company allows growth and experience. Was this review useful? Understanding managers, but high demand. Training could be better; however, most employees are very helpful. Plenty of driving if you're not office staff. Was this review useful? I promise that you will not be happy in this company, the manager will never hold your confidence, they will stack your back, will smile and then stack your back again. This is crazy. Please run, run!!! Was this review useful? The work there is very out. I like workinwas this review is useful? Number over quality of care: and overlooked let me start by saying that I started working with this company in October 2018 and I got training one year and one month after I asked for it. This training came after another former appraiser left, I became a target because of the fact that so vocal. Mind you, I shared the fears that I who back shot me with a guide to conjure something just to write to me. I refused to sign it for many reasons, one of the reasons was because I was the one who paid attention to billing and planning issues. Why would I sign up to write about something they're doing wrong? Not only did I mislead in an interview about the bonus I wanted to get and I signed a contract, it was all LIE! They created a bonus contract that even if I worked 365 days in a row, I wouldn't be able to get a bonus. I witnessed three appraisers leave for one year due to poor management, training, unreasonable job expectations and lack of communication. New leadership has been hired and what they care about numbers is not anything else. If I have three clients scheduled for my last hour of work, I should see them; no matter what I have to do in my personal life. I complained about staying later and not being able to do it on my second job, and the response I got was well to not be rude, but we are concerned about our business (banyan). Why am I still here? Because I love the real work I do for clients, not this business. I can go on and on. Was this review useful? Don't take care of the staff, I worked here and was constantly bullied and targeted. Went to the human resources department to complain about the situation, and nothing was done. A few homophobic comments were told to me and I was bullied by the supervisor. Don't work here because they're just going to work on you and never give you a raise. They don't care about their employees at all, even when they are discriminated against. Was this review useful? Unfortunately, I don't recommend looking for a job in my particular location. Management is very imperious and with little potential for advancement. Basic wages should simply be called to pay because there is no room for commission or raise. I know people who have worked here for over 10 years without promotion. The benefits do not outweigh or compensate the environment. Was this review useful? The under-appreciated importance of business leaders. The salary has been changed from hourly to salary. Get ready to work from home. Management has no experience in case management. Turn the course low. Was this review helpful? If you're not in a click it's hard to get the time. Managers never educate you, basically tear you down. They are always focused on all the wrong things rather than fixing what is broken. They don't care about your security one bit. They're breaking the law. Money. They force patients to sleep on the floor because of the overcrowding of the device for a quick buck. They don't help patients as they assume people are coming out of here worse than they came in. but they always like to have 40 plus patients as they assume people are coming out of here worse than they came in. but they always like to have 40 plus patients as they assume people are coming out of here worse than they came in. but they always like to have 40 plus patients as they assume people are coming out of here worse than they came in. but they always like to have 40 plus patients as they assume people are coming out of here worse than they came in. but they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they assume people are coming out of here worse than they always like to have 40 plus patients as they are the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse than the assume people are coming out of here worse that the assume people are coming out of here worse that the assume people are coming out of here worse the assu overworked and customers are just numbers. Was this review useful? A productive but not much fun place to work in a typical day at work involves clients including input and do consumption to see a psychiatrist. Sometimes we do more than we get paid. The graphics in the system are a little disorganized because customers always complain about the waiting time. Free lunch sometimes from Reps.Was this review helpful? Put behavioral health technicians to do the work of a behavioral health practitioner. The administration only worries that the beds are being filled and no actual treatment plans are given to customers or to help them in any way. Low wages. This place just gives more responsibilities/duties and no compensation. Case managers have a higher turnover than McDonald's. I really don't recommend anyone work here. Was this review useful? If you like being more worked, stressed, and frustrated just do yourself a favor and avoid banyan! Poor management skills, management involves applying a lip stick and taking selfies. Although voicing many pressing questions with the supervisor was said to stop the conversation to answer personal text messages. Total disrespect. Management has nothing to do with the staff, will you be treated badly if you don't brown your nose fixed hours and holidays offManagement has nothing to do with staff too busy inventing banyan will also help you develop a wider set of skills with the help of a hand supervisor. Was this review useful? The management team lacks leadership skills. Too busy trying to customers or employees. Too much to list. Was this review useful? I had a great clinical experience at Banyan and really got to explore a lot of different clients from different walks of life and demographics. I would recommend this as a great experience. Was this review useful? The company has poor management and has no idea how to fix them. Tells you what you have to at least 25 face-to-face per week and 15 hours of documentation. The company is not interested in patient/customer care. They are only interested in how much service you account for. The company is simply fired more than their employees because of poor management decisions. The company has no positive future, and it's sad because it's a social services agency. Colleagues, they offer a lot of help. Terrible management and prospects of the company. Was this review useful? Helpful? banyan health systems oakland park fl
