I'm currently doing this: \$articles = \$this->db->query("SELECT * FROM table ORDER BY CreatedDate DESC LIMIT 5"); But this will only output the record five times (once for each of the articles). Is there a way of counting the records as they are returned, so I can use PHP to add them together? Or is there a way of splitting this query up into several queries (one for each article)? A: You can do it by joining the table and use GROUP BY SELECT count(*) AS num FROM `table` GROUP BY `Name` It should work! To link to the entire object, paste this link in email, IM 520fdb1ae7
