

1. Go to <https://xwc.services.xerox.com/>
2. Choose create account
3. Enter your email
4. Type in company code - 43VNA5
5. Type in temporary password, and choose your own
6. Log in using your email and chosen password
7. Accept terms
8. Click on print, and then Desktop
9. Download Workplace Cloud Client (Windows version for Windows)
If you have a Mac, go to item nr.20.

10. Install the downloaded program

11. Approve use of the license and finish the install

12. Wait for the client to have found the printer on the network, if after 2min it has not found the FOMO Print, reboot computer

13. Check bottom right of your screen (The tray) and log onto the Xerox client by right clicking the icon, and enter your credentials (from step 6)

14. Make a new text document and type "Hello world", and choose FOMO Print as your printer

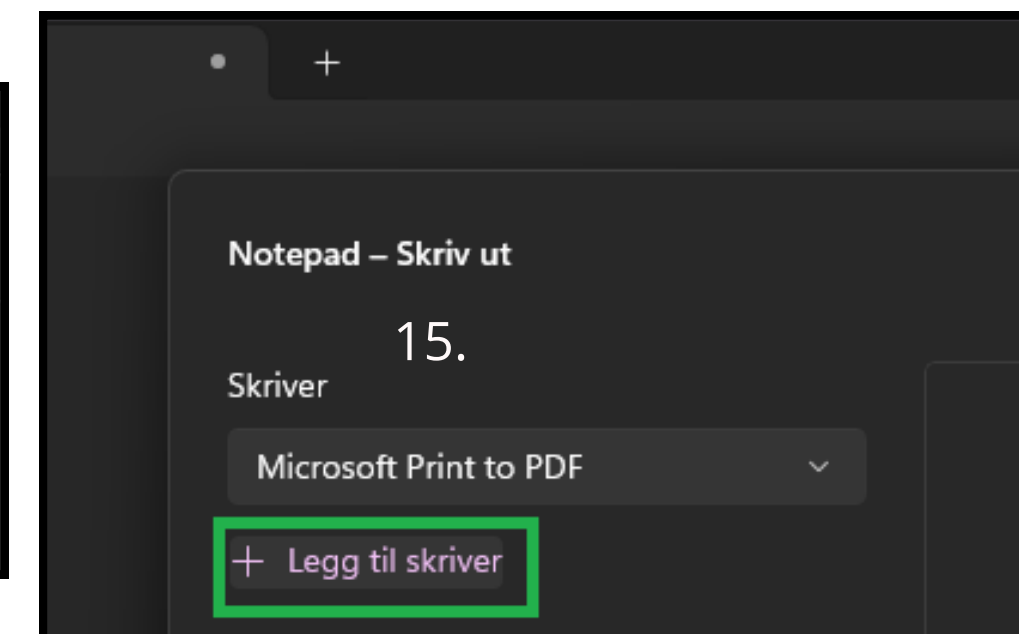

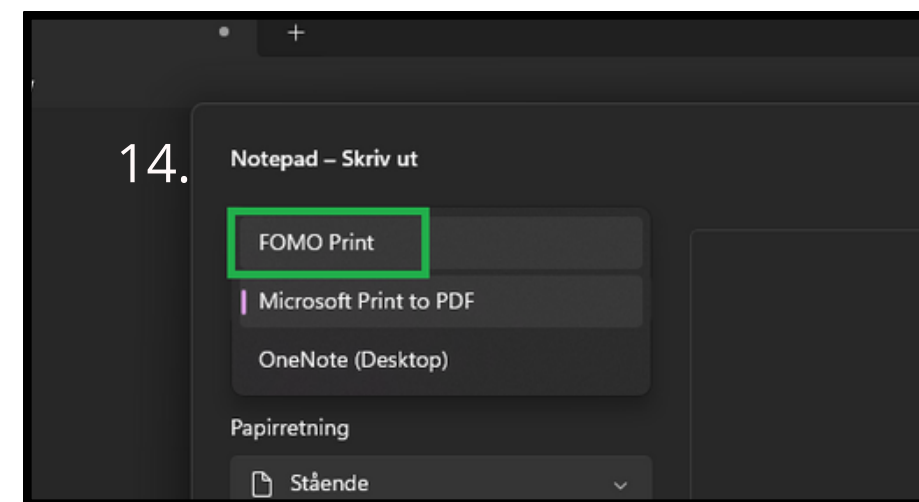

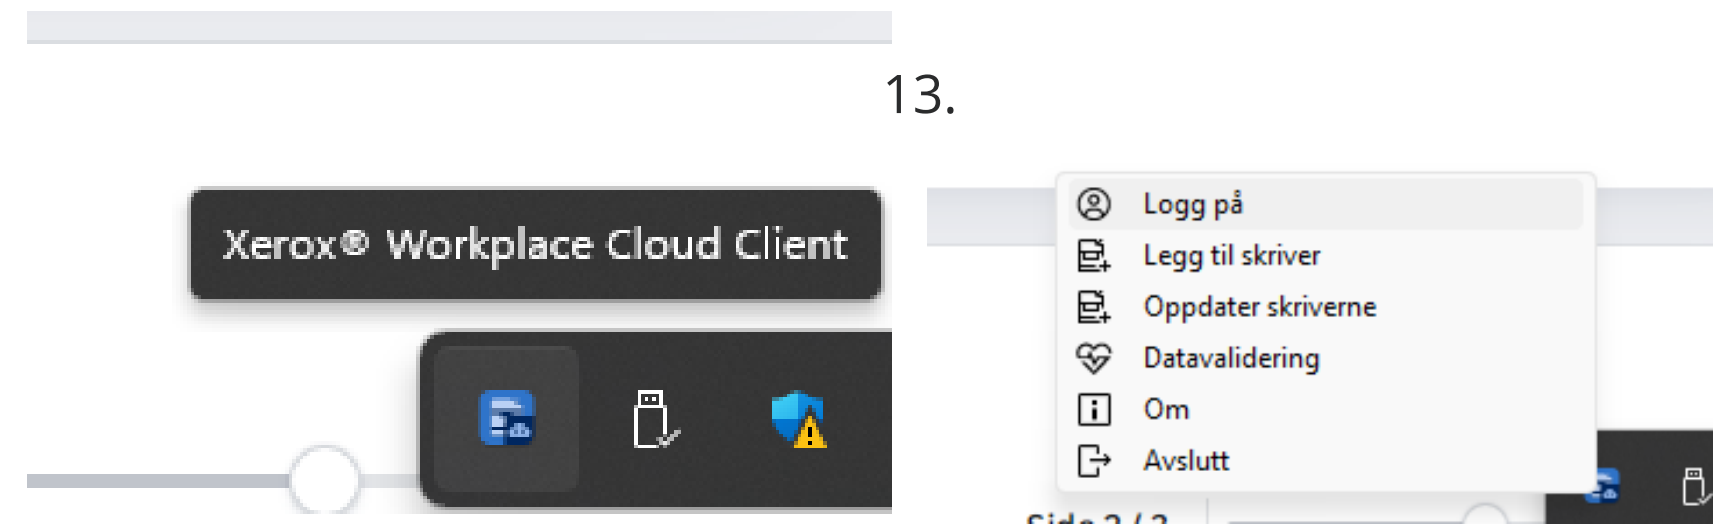

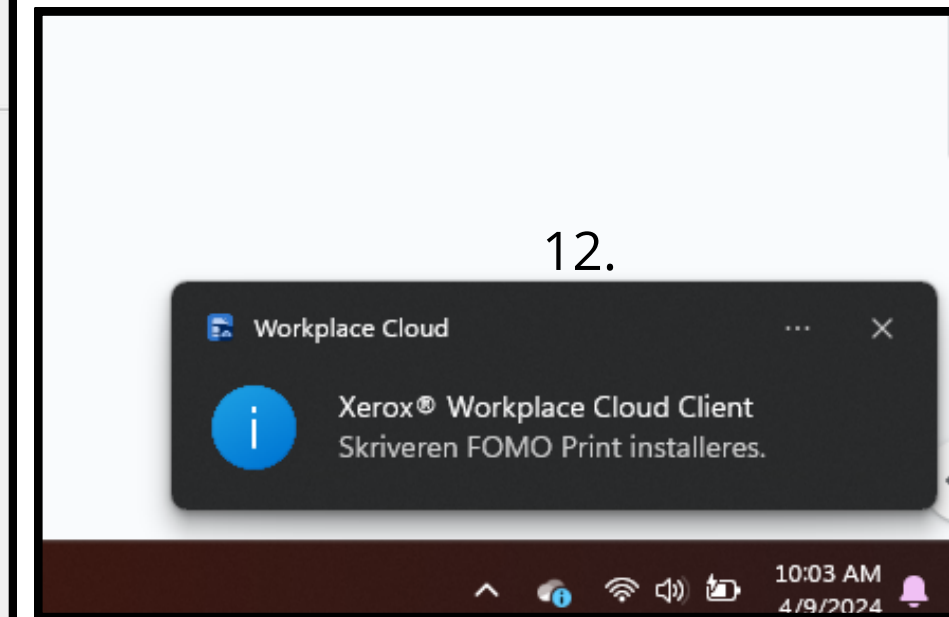

15. If FOMO Print is not on your list, click on add printer and add from the list

16. Complete the print

17. Go to the closest printer, and put your iLoq key on the reader on the left side of the touch screen. (The key you use for office door)

18. Log in with the same username and password as step 13.

19. Print out your test-page

For Mac we have 3 downloads

20. First download the Mac driver for Xerox under the Desktop

21. Open the downloaded driver and install it. Then the pop-up tells you to download and install "Xerox macOS Common Print Driver"

Search for this driver on the internet and download, or go to this link:

<https://www.support.xerox.com/en-us/content/141533>

22. Then you download the FOMO Print driver from the same page as step 19.

23. Log into the Xerox program, located top right corner and follow step 11 through 19
