Old school musical pocket edition

Many students learn some kind of musical instrument in elementary school. Some continue through high school, and some even plan to continue doing some musical activity in college. For a small number of students, however, music is not only something they want to continue learning, but it's the only thing they want to focus on learning in college. If you are one of those students who want to go to music school, then this article is for you. We'll look at what experience you can expect to have in the best music schools and what you should look for in a top music school. We will also introduce you to our ranking of the best music schools in the United States (for students). What is a music school? At the college or university level, music schools come in several different forms. The most specialized of them is the musical conservatory. Our list of the best music schools consists mainly of a) winter mode, which are part of the larger institutions and b) independent conservatories. As a student in the conservatory, almost exclusively music will be held. You may have some necessary basic classes for the liberal arts, but the expectation in the conservatory is that the vast majority (at least 95%) of the 100,000 people who attend the event will be in the mainstream. From your time you will be dedicated to music classes, studio lessons, performance, practicing and composing (depending on your main). Students at music conservatories typically graduate with a bachelor's degree in music (BM), although some conservatories may offer a bachelor of music arts or a bachelor of arts in musical degrees. In addition, if the conservatory is affiliated with a larger university or college, you may be able to get a bachelor of arts or a bachelor's degree in music instead. In the conservatory, which is part of a larger university, it is also possible to get a double degree in music and non-musical area. For some of these schools, you must apply for both the greenhouse and the non-musical student program of your choice and be accepted for both to take place in both; In other schools you can apply to full-time college to start with and then take courses at the conservatory, or vice versa. Dual programs usually end with a bachelor's degree in music and a bachelor's degree in arts (either in music or other unrelated fields), although there are other couples (e.g. BM/Bachelor of Science, or BA/Master of Music). Sometimes you can get this double degree in the same four years that you would take for one degree, but more often dual programs take five years or more. In many conservatories, it is also possible to obtain a student certificate or diploma artist instead of a bachelor's degree. Bachelor's diploma programmes are usually only offered for performance majors (although you may encounter a bachelor's degree composition) and are often limited to students who already have other degree, but decided to go back to school to study music. These programs do not have the same liberal arts or academic requirements as other types of undergraduate music degrees. Attending a conservatory of music is a good choice for students who are seriously considering developing a career in music and want their university experience to focus mainly on music. The second type of music school is a college or university that has a good music program but does not offer a specialized bachelor's degree (BM). Students in these types of music schools graduate with a bachelor of arts or a bachelor's degree in music, not a bachelor of music. Instead of spending 95% + of your time on music, you'll usually end up spending as much as 50% of your time on music and 50% on other academic disciplines. Top-ranked liberal arts colleges (and even some top-ranked universities) fall into this second category of music school. If you're a student who loves music but also wants to get a good non-music education, schools with good music programs (not quaeastors) are the way to go. This description fits my tea when I was in high school. I wanted to attend a school that had excellent scholars, including a good music program, not a school that had an outstanding music program and some good non-music courses. Because of that, I went to liberal arts college for a bachelor's degree and only went to a conservatory for a master's degree. The trade-off when it comes to music schools is that most non-conservatives with good music programs won't have the same quality music programs as the best conservatories in the country do. Therefore, of all the schools on this list, the only school that does not have a winter program for students is Yale. Our methodology for selecting top music schools in the US Because there are so many different types of programs within each music school, it is difficult to give a definitive ranking of how they compare with each other. Pay attention to this list of the different types of programs you might expect to find in a music school: general music (theory, music, ear training, etc.) spectacle (instruments, conducting, early music, jazz/contemporary music) composition (including film music) music technology/audio engineering musical theater musical theater (usually in partnership with theater/drama program) Many of these training courses can be further divided into different subroutines. For example, under the performance umbrella schools will have different programs for different types of instruments (spirit, wood winds, strings), which each will have different songs for different instruments. Although it is great that music schools have so much scope of programmes, this also means that the quality of the vary considerably within the same school. Even if you accept that a school is equally professional in any special performance, for example, it is unlikely to be as strong in its majors as in the music industry. There is no guarantee that the music school is even in the same level of quality – for example, it is very likely that the school will have a music program of the highest level, but a program for music education below average. Taking all this into account, for our list of the best music schools in the United States, we have chosen schools that provide students with the best general music education for students. This assessment is based in part on the ranking of student satisfaction and income and partly on the school's reputation as a music school. For our music school ranking, we grouped schools into three different categories. Visiting one of the schools on this list will prepare you for future research in music and give you a foundation on which to build a future music career. First, we will look at the best music programs in larger schools. Most of

these are winters at a larger university or college. Next, we take a look at the best music schools. All of these schools are conservatories that are not affiliated with larger institutions, although cross-registration with other non-conservatories in the area is possible. Finally, we're going to go through some honorable mentions of music schools. These are music schools that are not quite at the level of 15 schools in the other two categories, but are still remarkable for a variety of reasons, including accessibility, overall reputation of the institution in which the music school is associated with, or promoting interdisciplinary learning. Above: the interdisciplinary study of music theory and why I don't have it in my ears. The best university music programs in the US Schools in this category are for the most part conservatories in larger universities. Many schools on this list offer double degrees, or at least cross-registration between the music school and other undergraduate programs that are part of the same comprehensive university. We have come up with a rough general ranking for these schools based on reputation, student satisfaction, accessibility, breadth of offers, and selectivity. However, it is important to keep in mind that the difference in the actual quality of teaching among all schools is quite negligible and is more dependent on the school, so judging Jacobs as better, say, Eastman is more a matter of what you study and in what environment you want to be in more than anything else. Name University(s) 1 Jacobs School of Music Indiana University — Bloomington BM, BME, BS, assoc. Sci. 2 Peabody Institute Johns Hopkins University BM, UD 3 School of Music, And Dance University of Michigan: Ann Ann Ann BFA, BMA, BS 4 — University of Yale BA 5 Eastman School of Music University Rochester BM 6 Thornton School of Southern California BA, BM, BS 7 Oberlin Conservatory of Music Oberlin College BM 8 Frosty School of Music in Miami, BM, UD, BS BM=Bachelor of Music; BME= Bachelor of Music Education; BS =bachelor's degree; Associate of Science; UD= some kind of non-grade diploma program open to students (specific terminology distinguishes school to school); BMA = Bachelor of Music Arts; BFA=Bachelor of Fine Arts; BA = Bachelor of Arts. Below we have a brief overview of each school in the above list. We also have more detailed information about the student's acceptance rate and body size (if available) and what you can get a diploma in. #1: Jacobs School of Music (Indiana University - Bloomington) Location: Bloomington, IN Acceptance rate: 25% Student size: about 500 students Tuition and fees Indiana resident: \$23,870/year Indiana resident: \$49,434/year Jacobs School of Music is part of Indiana-Bloomington University, a public university in the Indiana University system. Although IU Bloomington is a relatively large school, with about 33,000 students overall, Jacobs Music School has only about 500 students; it is still on the larger side for a conservatory (it has approximately the same number of students as well), but has a significantly more intimate feel than you would expect to get from a secondary state university flagship school. As a student candidate, you will also need to apply to Indiana University and fill in an additional Jacobs School of Music additional app. Since Jacobs is part of a larger university, you have the benefit of being able to register with different schools in IU and even get a double degree in music and non-music (BM/BA or BM/BS). Moreover, Jacobs himself offers a much greater variety of learning areas for students from most other music schools, including everything from standard instrument and composite majors to associate degree in string instrument instrumental technology. And for certain programs, Jacobs allows students to follow dual music degrees so that you can, for example, complete a SB in composition and with an associate degree in audio engineering and sound production. Here is a complete list of all the various bachelor's degree programs offered at Jacobs School of Music: Major Department Degree of Concentration Composition - BM Historical Musical Performance Instrumental Accent BM Historical Musical Performance Vocal Accent BM Jazz Research Bass, Guitar, Percussion, Piano, Saxophone, Trumpet, Trombone, or Voice BM Performance Guitar BM Performance Harp Performance Orchestral Instrument (Flute, Oboe, Clarinet, Bassoon, Saxophone, Hornet, Trumpet, euphone, tuba, percussion, violin, violin, Violoncello, Bass) BM Performance Organ BM Performance Piano BM Performance Voice BM Performance Wind Spirit Instruments (Multiple) BM Music Education Choral Training Bachelor of Music Education Music General Music Training Bachelor of Music Education Music Education Instrumental—Group Bachelor of Music Education Education Instrumental-Struts Bachelor of Music Education Audio Engineering and Sound Production cinema and media production BC Audio Engineering and Sound Production Initial design of BC Audio Engineering and Sound Business Informatics and Computer BS Audio Engineering and Sound Production Arts Administration BS Audio Engineering and Sound Production Music (General) BS Music and Outside The Field - BS Music and Off-Field Composition Accent BS Music and Off-Field Jazz Research Accent BS Audio Engineering - Associate of Science String Instrument Technology - Associate of Science BM =Bachelor of Music; BS =bachelor's degree. #2: Peabody Institute (Johns Hopkins University) Location: Baltimore, MD Admission rate: varies by program; Low Student Body Size: About 270 Students Study: \$53,630 The Peabody Institute falls under the academic umbrella of Johns Hopkins University, an extremely selective private university in Baltimore that has about 6,000 students across all its programs. About 270 students and 310 graduate students attend the Peabody Conservatory, which means you will have a chance not only to collaborate with your students, but also with other students more advanced in their studies (and take a look at what life would like to be if you went to music school). Peabody offers both bachelor's degrees in music and performance certificates (non-academic bachelor's degree) for students. To attend Peabody as a student, you only need to apply to the Peabody Institute (not Johns Hopkins as well), unless you plan to receive a double degree, in which case you will also need to apply and be admitted to Peabody and Johns Hopkins. Typically, at least five years, dual programs with the Krieger School of Arts and Sciences or the Whiting School of Engineering are even more intense than a regular winter degree. Fortunately, if all you want to do is take some non-Peabody classes while getting a winter education, you can sign up with other undergraduate programs at Hopkins without having to go with a double degree. In fact, taking classes that are not offered in Peabody is mandatory for some majors, such as recording arts and sciences. As a student in Peabody, you can choose to major in any of the following areas: Major Department Degree Concentration Brass Instruments Trumpet, French Horn, Trombone, Tuba, Eumonium BM, PC Composition - BM Computer Music — BM Guitar — BM, PC Harp — BM, PC Baroque flute, baroque lut and theorb, baroque oboe, baroque violin and viola, chilli, recorder, viola to gamba and baroque elo, harpsichord BM, PC Jazz bass, clarinet, flute, guitar, percussion, piano, saxophone, tubon, trumpet, violin, voice BM, PC Music ED Composition BM Music ED Guitar BM Instrumental Certification BM Ed Jazz BM Orchestral Instruments BM Ed Piano Ed Plays BM Music Ed Glass BM Music for New Media — BM Organ — BM, PC Percussion — BM, Piano - BM, PC Recording Arts and Sciences — BM Recording Arts and Sciences Computer Music BM Recording Arts and Sciences Music for New Media BM Strings Violin, Viola, Cello, Bass BM, PC Voice & Opera—BM, PC Woodwinds Flute, Bellboy, Clarinet, Saxophone, Oboe, Basun BM, PC BM = Bachelor of Music; PC=Performance Certificate (Undergraduate Program). #3: School of Music, Theater and Dance (University of Michigan-Ann Arbor) Location: Ann Arbor, MI Admission rate: about 7-16% (varies depending on large) Student size: about 825 students (74% with musical focus) Tuition training (Michigan resident): \$14,586 for freshmen/students; \$17,806 for juniors/adults Tuition (Michigan resident alien): \$51,552 for freshmen/sophomores; \$55,140 for youth/retirees The School of Music, Theater and Dance is one of several different schools at the University of Michigan - Ann Arbor, a highly selective public university at the University of Michigan system. While UMich's Ann Arbor has about 32,000 students overall, SMTD has much more than a winter feel, with under 200 music students each year. You can apply to SMTD through the general application or coalition application, and you must also submit an art profile as part of your application. As an alternative to doing a full dual degree, students at SMTD can choose to receive a Bachelor of Music Arts that combines musical performance (jazz or classical) concentration with non-music students. (In other schools like Frost, an equivalent degree can be a bachelor of music, not a bachelor's degree in music). SMTD has bachelor's programs in the following areas: Major Department Degree Composition - BM Music Education Choir Music Education BM Music Education Instrumental Music Education BM Music Theory Note: You can apply for this program only after you have already been accepted into SMTD BM Musicology - BM Performing Arts Music "Technology " BM Performance Multiple Wind""" Tools """ Organ and Sacred Music, Piano, Strings, Voice, Wind and Percussion BM Performance Classic Performance and Non-Musical Course Bachelor of Music Arts Performance Jazz Performance and Non-Musical Course Composition Bachelor of Music Arts Multidisciplinary Studies Wind and Percussion, Self Bachelor of Music Arts Interarts Performances Performances BFA Jazz and Contemporary Improvisation Jazz Research BFA, BM Jazz and Contemporary Improvisation Jazz and Contemplation Research BFA Jazz and Contemporary Improvisation BFA Musical Theatre — BFA Performing Arts Technology - BFA Arts Music and Technology BM Performing Arts Technology Sound Engineering BSM=Bachelor of Music; BFA=Bachelor of Fine Arts; BS =bachelor's degree. #4: Yale University location: New Haven, CT admission grade: 6% total student size: about 6,000 student tuition and fees: about \$55,500/year Part of the Ivy League, Yale University is an extremely selective private school in New Haven. Yale is unique in this list of music schools, because while it has a separate school of music (Yale School of Music), this music school only gives diplomas to graduates. Thus, if you want to study music at Yale, you will simply major in music (through the Ministry of Music) and get BAC in music, just as you would for an academic topic such as sociology or economics. Although not a separate master's program for students, however, Yale is still one of the best music schools in the United States (partly because there is a separate school of music). Once you enter Yale, you can choose to receive a performance certificate or an artist's diploma at the top of ba; it's not quite the same as getting a BM, but it will show diplomas that you've been dedicated enough to music to spend your time getting an extra diploma at the top of ba. Yale also has a new program for 5 years BA/MM (or BS/MM) through the Yale School of Music for instrumental musicians only; There is not much information about this yet, so it will be updated as we will get more information. #5: Eastman School of Music (University of Rochester) Location: Rochester, Admission rate from New York: about 13% Student size: 500 students (400 students) Tuition: \$57,420/year (with this arrangement from Eastman that nearly 100% of students receive some merit scholarship) The Eastman of Music School is part of the University of Rochester, a selective private university in Rochester, NY. The University of Rochester as a whole is an average size, with about 6,500 undergraduate degrees in total, but with about 500 students in total, Eastman feels much smaller. If you plan to receive a bachelor's degree, you only need to apply for Eastman; if you want to get a double degree (BA/BM or BS/BM), however, you need to apply for Eastman and the University of Rochester (30% acceptance). In addition to allowing students to make a double major with a non-music subject or cross in non-music classes, Eastman also allows students to double major within Eastman. This allows students interested in pursuing multiple musical areas composition) to pursue both interests equally. Below is a diagram with different musical degrees degrees in Eastman: A large degree of concentration in the Department Applied Music (Performance) Bass BM Applied Music (Performance) Guitar BM Applied Music (Performance) Harp BM Applied Music (Performance) Piano BM Applied Music (Performance) Organ BM Applied Music (Performance) Strings (Violin, Viola, Cello) BM Applied Music (Performance) Voice BM Applied Music (Performance) Wood Spirits, brass and percussion (baut, clarinet, flute, shoe, saxophone, euphone, horn, trombone, trumpet, tuba, percussion) BM Composition —BM Jazz Research """Contemporary Media Performance Skills (Trumpet, Saxophone, Trombone, Piano, Guitar, Bass, Drum) BM Jazz Studies """ Contemporary Media Writing Skills """ BM Music Arts - BM Music ED - Main Concentration of BM Music ED - General Instrumental / Voice Main Concentration of BM Music ED - Vocal Voice BM Music ED- Vocal Piano Primary BM Music ED- Instrumental — BM Music Theory — BM BM = Bachelor of Music; #6: Thornton School of Music (USC) Location: Los Angeles, CA admission grade: 20% (varies depending on program and year) Student body size: 450-500 students Study: \$57,256 The Thornton School of Music is part of the University of Southern California (USC), a highly selective private university in Los Angeles. Thornton's implementation process is slightly different than for other music schools that are part of larger universities - instead of applying to Thornton individually, you should apply to USC and select a music major in the app (as well as all the necessary portfolio materials). Although it should apply to USC (about 19,000 total students), Thornton with its <1,000 students (city and student) still has this conservatory vibe. Like SMTD at UMich, Thornton allows students to follow two different songs: the BM song, which is essentially a winter degree, or BA in a Music song that allows students to have a more liberal-arts-focused degree (this still includes a good volume of music course work). Majors in the music industry and music production are relatively unique among conservatories (which are usually more performance-oriented and theory-oriented), and the fact that Thornton is based in L.A. means that students in these specialties can gain some practical experience outside the classroom. Students can specialize in the following areas in Thornton: Specialty Degree of Concentration Horal Music - BA Music Guitar BA Music Guitar BM Music Guitar BM Music Authority Research BA Performance Organ Research BM Music Piano BA Performance BM Music Jazz Research (Instrument or Voice) BA Performance Jazz Research (Instrument Only Instrument) BM Musical Vocal Arts BA Vocal Arts BM Music Strings BASS Bass Performance Harp Performance Ziolina, Viola and BM Music Windsurfing """ (flute, oboe, clarinet, baben, saxophone, French French trumpet, trombone, tuba, percussion) BA performance winds """ Percussion (flute, oboe, clarinet, basun, saxophone, French hornet, trumpet, trombone, tuba, percussion) BM performance Popular Music BM Composition — BM Music Technology Music Production BM Music Industry — BS=Bachelor of Arts; BM =Bachelor of Music; BS =bachelor's degree. #7: Oberlin Conservatory of Music (Oberlin College) Location: Oberlin, OH Acceptance Rate: 25% Student Body Size: 580 Winter Students (Mostly Students) and 180 Dual Degree Students Study: \$55,976 The Oberlin Conservatory of Music is part of Oberlin College, part of the College of Free Arts and the only non-university in this category of music schools. Due to Oberlin's commitment to provide all of its students with a solid Liberal Arts Foundation, BM students must take a 6-8 non-winter course as part of their degree. Oberlin's dual-grade program allows students to graduate with BAC/BM for five years or less. Unlike some dual-city programs, Oberlin does not require the two degrees to be connected in any way. You can choose to pair the specialties related as early musical performance and history or as disputing as Musicianology and Biochemistry. Students must apply to the College of Arts and Conservatory to be accepted into the two-tier program. Oberlin Conservatory of Music offers the following bachelor's majors: Specialty Department of Performance Piano BM Performance Organ BM Performance Strings (violin, viola, cello, bass, guitar, hard) BM Performance Wood (flute, oboe, clarinet, bass) BM performance Brass (trumpet, horn, horn, horn, Trubson, tuba) BM performance BM performance Early instruments (paw, turntable, baroque flute, baroque oboe, baroque violin, baroque cello and viola to gamamba) - BM Jazz Studies Composition BM Jazz Musicology — BM Piano Performance and vocal accompanying double special in piano and vocals accompanying BM technology in Music and related arts — BM BM #8: Frost School of Music Location: Miami, FL Admissions Degree Frost: 40% Student Body Size: 450 Student (300 City Students) Training: \$50,400 The School of Music Cold is part of the University of Miami, a private university located in Miami, Florida. While the University of Miami as a whole has about 10,800 undergraduate degrees, Frost has only about 450 total undergraduate students (or about 112 students each year), so it feels much smaller. There are also about 300 students in Frost. Unlike most schools in this category, you actually need to apply and get into both Stud School of Music and the University of Miami to attend Frost. Because you will have entered the University of Miami when you start Frost, however, this it's quite easy to sign up for classes outside frost. When I spoke to Frost's double-drag/double-degree office, I was told that although it is possible to double in music and non-musical subject matter, it is not recommended due to the intensity of the music degree requirements. Instead, it is much more common for students to receive BAC in Music and a minor in a non-musical subject. Here is a table of the different areas in which you can choose to become a student in Frost - Major Department Theory of Composition and Composition BM Instrumental Performance Flute, Oboe, Clarinet, Saxophone, Bassona, Horn, Trumpet, Trombone, Euphon, Tuba, Percussion, Violin, Viola, Cello, double bass, guitar, harp BM, PC keyboard performance — BM, PC vocal performance — BM, PC Studio Music and Jazz Instrumental BM, PC Studio Music and Jazz Vocal BM, PC Media Writing and Production - BM Music Business and Entertainment Industries — BM Music Education — BM Music Therapy — BM Musician, Artistic Development and Entrepreneurship — BM Professional Studies — BM Music Engineering — BS Music PC=performance certificate (bachelor's program); BS =bachelor's degree; BA = Bachelor of Arts. We can help. PrepScholar Admissions is the world's best admissions advisory service. We combine world-class adoption with our data acceptance strategies. We've overseen thousands of students to fit in with their best schools, from state colleges to the Ivy League. We know what kind of students they want to admit. We want to take you to dream schools. Learn more about PrepScholar Admissions to increase your chance of signing in. The best independent music schools in the UNITED States All schools on this list are winter mode. Some of the schools also have non-musical programs (dance, theater, etc.), but for the purposes of ranking in the music school, we have only concerned the quality of the music programs of each school. Name Pronounce Grade 1 At Juilliard School New York, NY, BM, UD 2 Curtis Institute of Music Philadelphia, PA BM, UD 3 Berklee School of Music/Boston Conservatory at Berklee Boston, MA, BM, UD/BM 4 New England Conservatory in Boston, MA BM 5 San Francisco Music Conservatory San Francisco, CA BM 6 Manhattan School of Music New York, NY, BM, UD 7 Cleveland Institute of Music Cleveland, OH BM, UD BM Bachelor of Music; UD= some kind of non-grade diploma program open to students (specific terminology differs from school to school). Next, we'll look at a little more details about each of the conservatories on this list. #1: Juilliard's school when you think of what the best music schools in the world (not to mention the US) are, one of the names well, to come to everyone's mind is Juilliard. Located on Manhattan's Upper West Side, Juilliard's school is a world-famous conservatory with undergraduate programs in dance, theater and music. One of the best schools in the world for instrumentalists and vocalists, Juilliard graduates have gone on to launch careers as solo and chamber musicians and become members of the best national and international orchestras (including the New York Philharmonic). One of the most difficult music schools to enter the United States, Juilliard is the winter equivalent of Harvard or Stanford-highly selective, famous faculty, brand recognition of the name, and with graduates who go on to become leaders in their field. As a student at Juilliard, you can choose to get either a bachelor's degree (almost entirely performance-focused) or a bachelor's degree in music (includes more class and marginally less focus on your primary instrument). You can also apply for one of 10-12 students in any year who is able to sign up for classes at Barnard College or Columbia University. Juilliard also offers a joint five-year bachelor's/MM degree in conjunction with Barnard and Columbia: To participate in this program, you must be a student at Barnard or Columbia who are cross-registered with Juilliard at least two years before you apply. This program works best for students who are as strong academically as they are musically and have the dedication and time management skills to essentially manage a bachelor's and master's degree at the same time. Juilliard offers its students the following specialties: Degree of concentration of hornet, trumpet, tenor trombone, bass trombone, tuba BM, UD Classical Guitar — BM, UD Harp — BM, UD Organ — BM, UD Percussion — BM, UD Piano — BM, UD Strings Violin, Viola, Cello, Bass BM, UD Woodwinds Flutes, Oboe, Clarinet, Basun BM, UD Vocal Arts - BM, UD Jazz Research - BM, UD Composition - BM, UD B=Bachelor of Music; UD=Bachelor's degree. #2: Curtis Institute of Music Location: Philadelphia, PA acceptance rate: about 5%, depending on the Student Body Size program: about 170 student tuition: \$0 Curtis Institute of Music is a private conservatory that is focused around performance (although it has a composition program as well). Curtis is extremely difficult to get in, but when I spoke to a reception, I was told that you can always reapply if you are rejected and that there really are a lot of students at Curtis who did not show up the first time. The main reason for Curtis's exclusivity is the free tuition policy. All students admitted to Curtis receive a scholarship to cover the cost of tuition to ensure that talented students are not retained from attending Curtis because of the cost of admission. This as or harder to enter than Juilliard and the quality of students admitted is extremely high. Curtis is almost exclusively a student school; the exception is the vocal sciences higher education program, which usually has 12-15 students per year. That Curtis is so student-focused means that all of your classes will be taught by professors (and not as some taught by TAs), giving him a very different feel than a school that is more evenly divided between students and students (or has a larger city program than a student). Students admitted to Curtis are automatically accommodated in the bachelor's program; to be accepted into the BM program, you must provide additional information, such as high school transcription. While at Curtis as a BM student, you also have the opportunity to register at the University of Pennsylvania, the top-level national university is also located in Philadelphia. Here is a quick description of the various main programs in Curtis: Degree of concentration of Brass Horn Directorate General, trumpet, trombone/bass trombone, tuba BM, D Composition — BM, D Classical guitar — BM, D Harp — BM, D Organ - BM, D Piano — BM, D String violins, viola, elo, bass BM, D Tympani and Percussion — BM, D Vocal studies — BM, D Woodveter's Flute, round, clarinet, bass BM, D B=Bachelor of Music D= Diploma (bachelor's program). #3: Berklee College of Music/Boston Conservatory Location: Boston, MA Degree Admission: 39% Total Student Body Size Berklee: 6,400 Bachelor Boston Conservatory at Berklee: 190 Music Bachelor Tuition: \$44,360 for BM; \$38,220 for a professional diploma Berklee College of Music is a private conservatory located in Boston, MA. Berklee has long been known as one of the best contemporary music schools in the world, especially when it comes to jazz, but it also has thriving classical and non-performance programs. It's also the largest undergraduate conservatory program on our list, with over 1,500 students each year. In 2016 Berklee joined forces with the Boston Conservatory and became a single museum. . . . Yes, something like that. In fact, you can still apply separately for the Boston Conservatory in Berklee if you are more interested in the BoCo program than Berkeley's. And you can always register through the Pro Arts Consortium for classes at Boston College of Architecture, Emerson College, Massachusetts College of Arts and Design, New England Conservatory, or the Tufts Museum of Fine Arts School. Berklee also offers a uniquely challenging dual program with Harvard that allows you to get a bachelor's degree in arts from Harvard and a master's degree in music from Berkeley in just five years. To be accepted into this program, you must apply and enter Harvard and Berkeley; if you are one of those who can deal with the two scientists at Harvard Harvard Berkeley, I congratulate you. Here is a list of bachelor's majors you can study at Berkeley College of Music: Major Department Degree of Concentration Composition - BM, PD Contemporary Writing and Production - BM, PD Electronic Production and Design — BM, PD Scoring — BM, PD Jazz Composition — BM, PD Music Business / Management — BM, PD Music Education — BM Music Production and Engineering — BM, PD Music Therapy — Bass of BM Performance (Acoustic Bass, Bass of Electrical Engineering, Bass for Electroaz, Bass Electric), PD Performance (Baritone, French Gaster, Trombone, So-called Bass), Trumpet, Tuba) BM, Guitar guitar) BM, PD performance percussion (drums, marimba, percussion, percussion (hand), steelac, vibraphone, PD performance piano (acoustic) BM, PD performance string for performance (banjo, vicirling, harp, mandolin, viola, violin) BM, PD performance Voice BM, PD performance Woodwinds (bass clarith, bassun, clarinet, flute, oboe, saxophone (alto), saxophone (baritone), saxophone (soprano), saxophone (tenor)) BM, PD Professional Music — BM Composite - BM BM = backspohone; PD= professional diploma (bachelor's program). The smaller Boston Conservatory in Berklee undergraduate programs have slightly different curricula and structure and have more than an explicit classical conservatory focus. Here's a look at bachelor's majors at BoCo in Berklee: Major Department Degree Composition Concentration - BM Performance Brass (Trumpet, Horn, Trombone, Bass Trombone, Euphone, Tuba) BM Performance Harp Performance Impact BM Performance (Violin, Viola, Cello, Bass) BM Performance Glass BM Performance Woodwind (Flute, Ob, Clarinet, Bassoon, Saxophone) BM BM = Bachelor of Music #4: The New England Conservatory of Music, Or NEC, is located in Boston, MA. The convenient positioning of the NAC just around the corner from the Symphony Hall (home of the Boston Symphony Orchestra) makes it easier for STUDENTS from the NPC to get discounted tickets for the orchestra and the LACK faculty to travel back and forth between teaching at the NAC and playing at BSO (as well as many of them). While the lack of both jazz and classical bachelor's degree, it generally falls more like the classical side of the spectrum (unlike nearby Berkeley, which aspires more to jazz/contemporary music persuasion). As well as having the highest-end conservatory program, nec also has an impressive range of cross-registration options for students who also want to oppose non-musical academics. Like Berklee/BoCo, NEC is part of the pro-arts consortium and so NEC students can take courses at Boston Architectural College, Emerson College, Massachusetts College of Art and Design or the museum's school Fine Arts at Tufts. Additionally, EK students can sign up for classes at nearby Northeastern University or Tufts University. The NAC also offers several double-grade programs with schools nearby. Students who are not satisfied with simply taking classes in Tufts can choose to make joint Tufts BA (in a non-musical field) or BS and BM degree. For students who are even more advanced in their musical learning, the NAC offers a joint AB/MM degree with Harvard. Like Berkeley/Harvard AB/MM, the two-tier EC is even more selective than the rest of the NAC, and perhaps one to two students a year is better to move on. As a bachelor's degree in EC, you can get a bachelor's degree in music in the following areas: Main Department Concentration Brass Waldhorn, Trumpet, Trombone, Tube BM Composition — BM Contemporary Improvisation — BM Jazz Composition — BM Jazz Performance — BM Percussion — BM Violin, Viola, Cello, Bass, Harp, Guitar BM Woods Flute, Wrapped, Clarinet, Basun, Saxophone BM Performance #5: The San Francisco Conservatory of Music is, as the name shows, a private greenhouse located in San Francisco. For equally divided between diplomas and students, NCFM is less selective than some of the schools on this list for students, although it varies depending on the degree. Unlike most other conservatories mentioned in this article, SFCM is not any kind of cross (or if it does, this information is well hidden), so as an SFCM student will be able to take classes at SFCM. While SFCM has common ED classes to take as part of its core curriculum, the fact that there is no dual degree or partnership with a nearby university of any kind is a particular drawback if you are interested in taking non-conservative classes while you are in college. Several of the most important sights of SFCM are the main diplomas, jazz and American music and specialty Technology and Applied Composition. Roots, Jazz, and American Music require students to take classes in the Departments of Technology and Applied Composition and Composition, providing jazz education that goes beyond performance and jazz theory. Major's technology and application composition stands out as a composition program that is specifically aimed at composing for video games, movies and other media. At SFCM, you can get bachelor's music in any of the following areas: Major Department Degree Composition Concentration — BM Spirit Horn, Trombone, Trumpet, Tuba BM Guitar — BM Keyboard, Organ, Piano BM Percussion — BM Roots, Jazz and American Music — BM Strings Violin, Viola, Cello, Bass, Harp BM Technologies and Applied Composition — BM BM Woodwinds Bassoons, Clarith, Flute, BM Music. #6: Manhattan School of Music Location: New York, NY Acceptance Rate: about 45% (varies depending on size and year) Student size: 490 student tuition: \$48,280 Manhattan School of Music is a private music conservatory located in Manhattan's Morningside Heights. Like Curtis, MSM has many more student students than students, so the atmosphere is similar to what you'll find at a liberal arts college (albeit compressed into fewer than 100 students a year). Like many conservatories not affiliated with larger institutions, MSM is primarily focused on results; However, within this focus of implementation there are several programs that stand out. The first (which I discovered while researching schools) is that you can specialize in jazz harmonica at MSM. This is the only degree of its kind I've seen in undergraduate school anywhere, so if you're a harmonica virtuoso, IOM should be at the top of the list of schools to apply for. The second unusual course of study at MSM is a Bachelor of Music at musical theater. Most conservatories, if they have theatrical programs, have only general theatrical degrees for students (usually BASS), not musical-theater-focused programs. The only other school in this article that has a separate degree in musical theater is UMich's SMTD, which allows students to get a BFA in musical theater. In addition to the basic humanities classes offered as part of the MSM program, MSM students are able to sign up for classes at Barnard (although they cannot receive a double degree). It's strange that while MSM students can sign up at Barnard, they don't have the same privileges in Columbia (unlike Juilliard, which has cross-sectional programs with both schools). MSM allows students to specialize in the subjects in the table below. (Note: Each tool is listed separately because MSM major students in specific instruments rather than in performance with concentration in an instrument). Large Extent Department Of Concentration Degree Classic Bass Trombone BM Classic Bass Bassoon BM Classic Punch BM Classic Clarinet BM Classic Composition BM Classic Tan Telephone Classic Trumpet Classic Tubular BM Classic Horn BM Classic Horn BM Classic Stroke BM Classic Punch BM Classic Tan BM Classic Pipe BM Classic Viola BM Classic BM Classical Violin BM Classic Voice (Classical) BM Classical Voice (Opera Theatre) BM Jazz Artist (Bass/Acoustic) Bass Guitar (Electric) BM Jazz Arts 6-4 BM Jazz Arts Drumming BM Jazz Arts Flute Jazz Art BM Harmonica Jazz Arts BM Jazz Arts BM Jazz Artist BM Jazz Artist BM Jazz Artist (10000) Jazz Artistic Jazz Arts BM Jazz Artist (Bulgarian) Jazz Art BM Jazz Artist BM Jazz Arts (Electric) BM Jazz Arts Chelon BM Jazz Jazz Arts (100000 BM Jazz Artist TB TT Brosch Busch Jazz Artigis BM Jazz Art Art Artie Artie - BM BM = Bachelor of Music. #7: The Cleveland Institute of Music Cleveland is a private conservatory located in Cleveland, S.C. Undergraduate students at CIM either opt for an artist's certificate (if they want to focus only on performance) or bachelor's music. The only bachelor's majors for which you can directly apply to CIM are composition or performance (of a particular instrument). However, once you've attended CIM, you can also add a double major in music theory or Eurythmics (a method of teaching rhythm and music through physical movement). The latter program is the only such program offered to students in any of the schools listed in this article, making CIM the greatest choice for all students interested in learning more about Eurythmics. CIM students have cross-registration rights at the nearby University of the Western Reserve, where they must take their mandatory non-music electable and music history classes. As a CIM student, you can also participate in the Case Western/CIM two-layer degree program, which allows you to complete a BM and a bachelor's degree from Case Western on a non-musical subject. This program with a 5-year dual degree is unique, among others discussed in this article, because it does not need to apply to both Case Western and CIM to qualify; should instead only apply to CIM. Students at CIM can specialize in any of the areas listed below: Major Department Degree of Concentration bassoon BM, AC Performance Elo BM, AC Performance Clarinet BM, AC Performance Bass BM, AC Performance Ute BM, AC Performance Classical Guitar BM, AC Performance Harp BM, AC Performance Clamproc BM, AC Performance Horn BM, AC Performance Oboe BM, AC Performance Organ BM, AC Piano Performance BM, AC Performance Timpani and Percussion BM, AC Performance Trombone/Bass Performance BM, AC Performance Trumpet BM, AC Performance Tuba BM, AC Performance Viola BM, AC Violin Performance BM, AC Performance Voice BM, Composition — BM BM= Musical Bachelor; AC=Contractor Certificate (Master's Program). 12 Honorable Memory US Music Schools The schools listed in the previous two sections are what we consider to be the top 15 music schools for students in the U.S., but there are also some other great music schools that, while they haven't, still deserve a brief mention. Some of these schools are notable for their interdisciplinary capabilities or for having specialties, you will usually only have access as a student, while others are notable for being attached to highly selective national universities or lower-cost public schools. The first honorary school we will look at is a school that has numerous music programs in different Students: New York University, NYU —Steinhardt and Tish Location: New York, NY degree of admission: unknown to Steinhardt and Tish Tish but probably also low, 30% for NYU as a whole Steinhardt Student Body Size: 2,600 Undergraduate Total Tisch (Music Programs): 60 Students at the Davis Recording Institute, 50 in steinhardt's productivity research program: \$51,828 (assuming average course load) Tisch: \$56,924 (assuming average course load) One of the best private universities in the United States, New York University (NYU) has two college students that allow students to study music. Steinhardt School of Culture, Education and Human Development may seem like an unlikely place to find a music degree, but that's when NYU's main music department is located within. In Steinhart you will be able to get a bachelor's degree in music, just as you would in a conservatory, but you will also get a highly liberal arts education as part of your basic. In addition to being cross-registering in other NYU student programs, students at Steinhardt have the opportunity to make a combined BM/Master of Arts in music education or BM/Master of Music in Music Technology. Here is a list of the various specialties offered at NYU through Steinhardt: Basic Concentration Degree Instrumental Performance String Research BM Instrumental Performance Wood Sciences BM Musical Performance Mechanic Research BM Music Performance Music Performance BM Playing Piano BM - BM Vocal Performance Classic Voice Performance Musical Theatre BM Jazz Studies — BM Music Business — BM Music Theory and Composition — BM Music Theory and Composition Contemporary Production and SongWriting of BM Music Education — BM Music Technology — BM Film and Multimedia Score — BM BM= Bachelor of Music. Besides Steinhardt, another school at NYU that offers students a degree in music is the Tish School of the Arts. While Tish is world famous as a conservatory for theater, it has several undergraduate programs that are either musically focused or can include music. Through the Institute for Recording Music, Tisch students can get a BFA at Recorded Music, focusing on various aspects of the music industry. Alternatively, students who want to study at the intersection of music and other fields will do well to consider Tisch's BA in performance studies, one degree unique among those who offer students the variety of approach and quality. One note: NYU as a whole is a highly selective school (with a 21% acceptance rate overall), but Tish in particular is extremely difficult to get in (closer to Juilliard and SMTD in selectivity than to the rest of NYU). Mannes School of Music (The New School) Location: New York, NY acceptance rate: 35-60% (varies from program to program) Student body size: unknown; about 4000 from the New School as a whole. Tuition: \$48,760 The Mannes School of Music is part of the New School, a school, Union Square in Manhattan. Smaller and less competitive than the Manhattan School of Music, Mannes is a great option if you want to learn music in the New York winter setting. Because Mannes is part of the New School, students can also sign up to other colleges in the New School. (Based on my conversation with admissions, this usually ends with eugene Lang College of Liberal Arts or Parsons School of Design.) Most of Manes' bachelor's program is focused on performance, but there is one major that stands out as unusual at the Bachelor level: conduct and theory. Most music schools do not allow students to specialize in conducting, so if this is your main area of musical interest, Mannes is a good choice. Here is a brief summary of the bachelor's musical specialties available in Mance: Composition for programming degrees BM Orchestral Conductor BM Classical Guitar BM Clap Spirit BM Theory BM Orchestra (spirit, wood winds, percussion, strings) BM Piano BM Voice BM BM = Bachelor of Music. California Institute of the Arts: Santa Clarita, C.H. Admission: unknown; About 30% for CalArts student total student body size: 220 student tuition: \$50,850 The Herb Alpert School of Music is one of several programs at the California Institute of the Arts (CalArts). This differs from the nearby Herb Alpert School of Music at UCLA, so don't confuse the two schools. CalArts' music program is remarkable because instead of getting a bachelor's degree in music or a bachelor's degree in the arts in music, it will end with a bachelor of fine arts in music. This distinction reflects the fact that the music education you get at CalArts will be less what you get in a traditional musical conservatory and more than an interdisciplinary experience. Interdisciplinary calarts and NYU programs are comparable, but schools have many different academia and cultures. NYU is located in the northeastern part of the most populous city in the United States, while CalArts is in a suburban town in southern California. These cultural and geographical differences also mean that even nominally similar programs in both schools (e.g. film assessment) are structured differently, with different extracurricular opportunities. Here is a list of the bachelor's concentration at herb alpert school of music: Program composition and experimental sound practices BFA Instrumental Arts (winds, spirit, percussion, guitar, harp, piano, strings) BFA Jazz BFA Music Technology BFA Performer-Composer BFA VoiceArts BFA World Music Performance BFA Musical Arts / Experimental Pop BFA = Bachelor of Arts. on request from a student admissions authority: \$110 student study and \$13,000 in downtown L.A., the Colburn School is a music school that offers everything from college prep lessons to graduation. All degrees of Calburn are offered through the relatively new Colburn Conservatory of Music. While the undergraduate curriculum includes some necessary humanitarian courses, most of your time will be spent on performance research. Unlike most of the other conservatories in this article, Colburn offers only majors. In addition, because Colburn is so small, whether you can apply at all in a given year depends on whether the teachers of your tool have a place in their studios for new students. Although the Conservatory program at Colburn is less than 20 years old and has only a special presentation, we have included it on this list because it has one extremely remarkable feature: free tuition for all accepted students and scholarships that cover on-campus housing and meal plan costs. That puts Colburn there with Curtis as one of the most affordable music schools in the United States. Below is a table with the most recent list of degrees with openings in Colburn: PD Clarinet BM program, PD Contrabass BM, PD Flute BM, PD Harp BM, PD Waldhorn BM, PD Ob BM, PD Percussion BM, PD Pulse Trombone BM, PD Trumpet BM, PD Viola BM, PD Cynolins BM, PD Violonc BM, PD BM= Bachelor of Music; PD= diploma of performance (bachelor's program). In the photo above: conductor, chief cellist, third chair cellist, the Concorde All Stars. 4 Good music schools in state universities Although there are several public schools in our best music schools ranking (IU and UMich), most of the best music schools in the country are either independent conservatories or attached to private universities. However, there are several music schools in state universities that deserve a fair mention. The four schools below are remarkable music programs at state universities that provide students with a solid foundation for future higher education in music. They are a particularly good choice for students who live in a state because of the lower cost (especially compared to some of the lower greenhouses, which still cost students quite a penny). College of Music (University of North Texas) Location: Denton, TX acceptance rate: unknown student body size: 4,000 students studying Texas residents: \$11,544 Texas non-residents: \$20,504 Grade BM or BA in music; double large with non-music major is possible, but very difficult due to the rigor of the musical degree. College Conservatory of Music (University of Cincinnati) Location: Cincinnati, OH degree admission: 12-15% Student body size: 746 Ohio resident students: \$12,266 Ohio non-resident: \$27,600 Grade: BM or BFA in music. School music (University of Location: Urbana, IL acceptance rate: unknown student body size: unknown Illinois resident training: \$12,046 Illinois resident: \$29,178 Grade: BM, Bachelor of Music Arts, Bachelor of Music Education, BA in Music, or BS in Music. Conservatory of Music and Dance (University of Missouri Kansas City) Location: Kansas City, MO Acceptance Rate: about 60%, but varies depending on the year and program. Student body size: 330 students tuition (assuming 15 credit hours) Missouri resident: \$9,884.86 Kansas resident: \$9,975.46 Arkansas, Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, Texas or Wisconsin residents: \$14,232.46 All other students: \$25,011.46 Grade: BM, BA in music, BACA in music therapy, music and music education, general education with a focus on performance; grades are possible, but usually take more than four years. 4 Top universities with good music programs besides Yale, Peabody (at Johns Hopkins), USC, and NYU, most of the schools in this article are great for music, but not necessarily the highest ranked for academia in general. In this section, however, we wanted to briefly mention four schools that are known for their academies with strong undergraduate music programs. These music schools are not at the same level as 15 ranked schools, but they are great opportunities for students who want to pursue high-level non-music and music majors. Northwestern-Bean School of Music Location: Evanston, IL acceptance rate: about 10% (but this is a preview process, so that's 10% of students going through the pre-screen process) Student size: about 400 dual student students Training: \$54,120 Grade: BM, BA in music, or BS in music, can do a double degree with another bachelor's program in northwestern. Vanderbilt-Blair School of Music Location: Nashville, TN admission rate: about 20% (depending on large) Student body size: 200 students Training: \$50,800 Degree: BM, Bachelor of Music Arts, 5-year BM/Master's degree in education, or 3+2 bachelor's degree in musical arts + MBA with dual education; can register for classes that are not musical. Rice-Shepherd School of Music Location: Houston, TX Admission Rate: About 10% Student Body Size: 100-120 Students Tuition and Fees: \$49,112 Grade: BM; can register for non-musical rice lessons. Carnegie Mellon — School of Musical Location: Pittsburgh, PA Acceptance Rate: Unknown; 22% for all Student Size: Unknown; 16,700 Carnegie Mellon Student Total Tuition: \$55,816 Grade: BFA, BS, Music Ed Certificate; can be registered for Carnegie Mellon classes. A statue of Johann Strauss, Vienna. 4 Tips for Implementing Top Music Schools in the U.S. As completing this collection of music school rankings, we have rounded up the four most important think about when it comes to choosing the music schools you want to apply for and attend. Tip 1: Study the programs at the school Whether you want to study a particular tool or learn how to do audio engineering and recording, you will need to make sure that the school you are applying for actually offers classes and teachers who specialize in your areas of interest. If you're going to take studio lessons as part of your music degree, you should also look at teachers and see what you can learn about their teaching styles and philosophies. This can be anything from searching for their performances online to actually reaching them and wondering if you can chat. Getting acquainted with what teachers are like is useful for any school, but it is especially important in a conservatory, where the only thing you will do is music. If you don't like the teacher or teacher philosophy and the middle of the school, you will be both unhappy and wasting your money and time. This research also applies to what are the deadlines and audition processes for the schools that interest you. Most music schools have regular decision-making deadlines in early December, with some schools requiring pre-screening material as early as September or October. If you're considering applying to a music school, make sure you check out the audition/pre-mode requirements by early summer before the last year so you don't get caught out of security in September. Tip 2: Apply only for conservatories If you want to study music, our second advice is not to apply to conservatories unless you are sure that the only thing you want to study is music (or, if you have other subjects in which you want to train, that they are not something you would not want to spend more than 5-10% of your time on). For most high school students, music is optional. Most of your school schedule is centered around academic subjects such as maths, history, science, and literature/language art. Being thrown into an environment where all you do in class is music and most of the learning comes from self-learning can be disorienting, even if you love music and know that's all you want to do. And for students with academic interests outside of music, attending a conservatory can feel so restrictive that they eventually make them transfer them or even move them away from music for a while. As anecdotal examples of unstable benches as a bachelor, I always think of a high school friend of mine who sang, played guitar and piano, and was extremely passionate about composition and performance. Received a guitar scholarship Burke's college of music and decided to go there... only to discover in her first year there that she wants to do things besides music. After her first year, she switched to a at arts college where she can follow both music and environmental sciences. She is currently a singer/songwriter who regularly performs her own live music. All this is to say that just because you do not go to a conservatory (or stay in one) does not mean that later you can not pursue a career as a musician. Another option is to become a model artist for a statue of a musician. Tip 3: Think about location When applying the third tip we have for applicants from the music school is to think about where you want to go to school geographically wise. Obviously, location is something you'll want to consider for every college you apply to. However, for music schools, taking into account location, it is especially important because it can affect what kind of musical experiences you get while in college. If you go to Oberlin, you will be in a rural setting where there is not as much opportunity to get concerts to perform or go to musical performances that are not Oberlin as there would be in a city (or even suburban) school. However, if what you are

looking for is an isolated school where you will not be distracted by practicing or writing music, then perhaps this would be ideal for you. If you go somewhere in New York, San Francisco or Boston, on the other hand, you'll have a lot of access to music culture outside your school and many more concert opportunities (without needing a car to get there!). While the cost of living in these cities (especially in Manhattan, where all NYC music schools in this article are located) is much higher than it is in most other places in the country, there are usually discounted programs available for students to experience culture. Of course, you can face more competition for concerts in cities and find a place to practice, it is available when you are nightmarishly difficult, so urban areas are not unequivocally the better choice for musical locations. Our best advice: think carefully about what you want to get from your music education, then think about school places through this lens. Tip 4: Compare the cost of a music school, our ultimate advice when applying for music schools is to take into account costs when deciding where to apply. An increasingly cultural joke is that there are tons of students out there with expensive liberal arts courses who use their degrees as a place or jobs where no college is required. Enthusiasm in the song on Avenue Q, What to do with BAC in English? the basic idea is that you do not learn any practical skills in college that will actually help you find a job after graduation and you will be left with a whole debt that you can not repay Score. Going to music school is a little different because theoretically you learn things that will apply to your life after school, whether it's Learn general music as a music educator or how to be a better performer and network so you get concerts and auditions. The fact is that the likely starting salary of a student who graduates from a music school for studenthood is in most cases lower than the cost of tuition for a year, not to mention all four-plus years of school. When you look at music schools, be very clear to yourself about what the cost of learning is for what benefit you expect to get from attending the school. For many of the schools on the list, there is some brand recognition in the name of the school, which can increase their chances of working at all. However, this will not necessarily increase your salary. The cost of education / probably the future pay ratio is why schools like Curtis are so incredibly competitive to get in - not only that the reputation and calibre of teaching high there, but also at no cost means that students who are talented but otherwise may not be able to afford to attend music school will apply and be able to start their careers after an undergraduate career with low or no debt. What am I hearing? Does it sound like a music student who doesn't start his life after college with a debt-busting? Key takeaways for the best music schools in the United States that become a professional musician require dedication, training and hard work. If you're sure the only thing you want to do with the rest of your life is be a musician, then you should apply for music school. The type of music you want to study, what aspect of music you want to learn and how strongly you want to study it, all of this affects what you need to apply to schools. The schools in this article are a good start if you're looking for schools that are nationally (and in some cases internationally) known, but you may find that there are other less well-known music schools that better fit your future plans or have teachers you really want to study with. Going to one of the best music schools in the country gives you a little advantage for name recognition and network edge, but ultimately your hard work and talent (in that order) are what will make you a successful musician no matter where you go to school. Music! - It's great. (Unofficial slogan for every music school) What's next? Not sure how to find out how to narrow down where to apply for school? Check out our guide to narrowing down a list of colleges to apply for. Interested in schools that allow you to focus more on the theatrical part of musical theater? We've compiled a list of the best arts schools in the country. How much extra work it is to double major and why you should you're doing this? Learn more about what goes into the dual specialty in this article. Want to improve your SAT rating by 160 points or did the ACT score by 4 points?
