(Update: Added Gravity of the Moon) Back when the entire torrent bit was big news and gamers were arguing with each other over the fact that the GTA V had leaked and become a torrent courtesy of the console, some pirates leaked cheat codes for the game on Xbox 360. Following in his brother's footsteps, the PS3 version of the GTA V is now also on the receiving end of some oh-so-cute cheats. IGN and GTA 5 codes posted a list of cheats for the PS3 version of the game and just as you would expect, it's basically the same cheat stuff as the Xbox 360 version. They've been tried and tested to make sure they work, so this shouldn't be one of those scenarios where you download the game and enter the code and find yourself standing there as you mistakenly left the Jimmies at home and forgot to bring a belt to keep your pants up. Anyway, the codes are below. You don't have to type them through your phone like in GTA IV, but I kind of wish it was so... I enjoyed typing codes and then quickly gaining access to them when I needed to just pulling up on my mobile phone. It was convenient, easy and without problems. You will need to use the D-Pad to enter targeted commands, and you will need to do so quickly. Successful implementation of the code should result in a confirmation request on the screen. Yes, I should also point out that if you decide to enter any of these codes into the game you will not be rewarded with any trophies during your playback session. If you want trophies, you'll have to earn them the old-fashioned way.
