And with an interface similar to the actual YouTube, it's most likely true that you'll find this app just to use. Even so, as you go to watch any video you like, the interface will give you the opportunity to download it. Easy, simple and familiar, using this cool YouTube video uploader will never cause you any fuss! Once the APK file is downloaded, the installation will take a slightly different method, which will be explained later. Although it is true that the app is a really great app. This allows you to enjoy unlimited fun while watching your favorite YouTube videos, even if you're not connected to any internet connection. However, there are some drawbacks to this video uploader carries as well. Pros This app is the only app to operating Android that really uploads youTube videos to your device. With an interface similar to YouTube, you can also view videos easily just like when you do it through the official YouTube app. There are a few Available to download the video faster. You have the opportunity to pause and resume downloading from anywhere. There are different video resolution options you can choose from. It supports not only 240p and 360p, but also high definition 1080p, combined with another app called MP3 Media Converter. Although it is mostly known as an app that allows users to upload videos from YouTube, you can also download from other sites such as Dailymotion and Vimeo. There is a separate section where you can track all the videos you download and download. Cons Despite this, not all videos can be uploaded, which is unfortunate, of course. As we hinted above, you can only download high-definition video with support because it requires an MP3 media converter too to accomplish this task. Unfortunately, many users complain about how this app is often cut off, which means that this app is quite unstable. When uploading videos, it's best for you when you're in a better network (Wi-Fi is preferable), since it's very difficult for users to download when they are on a 2G network. How to install Tubemate for Android Here are the steps needed to install Tubemate on your Android device. Make sure the APK is already loaded. Go to the Settings menu on your device and then open the Security tab. Find the Unknown Sources option. There is a button next to the Unknown Sources option; switch it, and it will light up. By toggling the button, this means that you allow any apps that are downloaded because of the play store that will be installed on your Android device. Go to the place where the APK you downloaded is stored on. Also, just by opening it from the Download menu. Click on the file to start the setup. Agree with the permissions the app asks for and then install the APK file. Wait until the download is complete, so you can finally watch movies and TV shows online right from your Android device! How to actually use, there is a reason why the Tubemate app has an interface similar to the official YouTube mobile app. This is because this video uploader app for Android device access to YouTube as an overlay. And as you choose the video to download, you will be given two options: watching or downloading videos. And since you're using this app here to download, just click on the green arrow at the bottom of the screen. Then you'll find a pop-up that offers two options: Download and watch. Even if it allows you to upload videos in any capacity, it actually depends on the source of the video. In addition to this, there are also various streaming options that are similar to what is given to you when you upload any video. All videos uploaded with this app are stored in MP4 format, which can be found in the default Video folder. You can also download MP3 from the video using Please note that the sound quality is likely to vary, depending on the original quality of the video. Even so, the sound quality downloaded from this app may be lower than expected, although it still listens anyway. THE MP3 files downloaded using this app are stored in the MP3 folder on your device. All in all, it's always easy to save and download videos from YouTube using this app. Video quality options are widely available, so you are free to choose which one you would like to keep on your device, including high quality. And while the sound quality is more like streaming views, this will be enough if you only want to try an audio clip.
