Risk Disclosure: WARNING: Past performance does not guarantee future results. Investment returns and principal value will fluctuate, so that investors' shares, when sold, may be worth more or less than their original cost. Investing in any mutual fund, index or actively managed, does not guarantee that an investor will make money, avoid losing capital, or indicate that the investment is risk-free. Actively managed funds sometimes outperform index funds. An investor cannot determine in advance which actively managed fund will outperform the appropriate index. Just because a mutual fund is an index mutual fund, it does not guarantee a performance superior to an actively managed mutual fund. There are no absolute guarantees in investing. Advisory services are only offered to clients or prospective clients where GRPC and its representatives are properly licensed or exempt from licensure. This website is solely for informational purposes. Investing involves risk and possible loss of principal capital. No advice may be rendered by GRPC unless a client service agreement is in place. An investment in Exchange Traded Funds (ETF), structured as a mutual fund or unit investment trust, involves the risk of losing money and should be considered as part of an overall program, not a complete investment program. An investment in ETFs involves additional risks such as not diversified, price volatility, competitive industry pressure, international political and economic developments, possible trading halts, and index tracking errors.
