

BinaryEdge - www.binaryedge.io

BinaryEdge is a cybersecurity company that scans the entire internet and acquires real time threat data. Our clients use this data to secure their networks and find their exposure to hacker attacks.

Job Description

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application, Taking an active role on how the application looks as well as how it works.

Benefits

- Ability to work from anyplace - fully remote team, you are able to work from home, a local cafe or your favorite place
- Flexible hours - this is not a 9-5 job, you have some flexibility in the hours you work, we understand that inspiration comes at different times for different people
- Join a young, vibrant, exciting team that is working on the future of cybersecurity
- Every 6 months we get together to work on projects together like a hackathon

Role & Responsibilities

- Be part of a remote team
- Develop new user-facing features
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Collaborate with other team members and stakeholders
- Focus on bringing visibility to product features to our clients

Skills And Qualifications

- Proficient understanding of web markup, including HTML5, CSS3
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Proficient understanding of client-side scripting and JavaScript frameworks, including AngularJS
- Good understanding of Mocha, Selenium or similar for testing
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Proficient understanding of code versioning using git and the github environment
- Good understanding of SEO principles and ensuring that application will adhere to them
