Nav Social Menu Search This Blog Chloe Walsh on Slow Fashion I'm a big fan of fashion magazines, not only for the beauty and styling tips, but also for the other amazing content and the slightly elevated standards that are usually found in the pages of a print magazine. But when I read the word 'slow fashion', I realized that I'm not really a huge fan of it at all. First of all, is there such a thing as 'slow fashion'? Let's just say that I'm not familiar with the term. However, my first thought when I saw the term was, 'oh no, the fashion industry is going to have to adjust'. And, if I'm being honest, I have a hard time accepting the term 'slow fashion'. What is it about? The term 'slow fashion' or 'slow fashion movement' refers to a collection of different concepts. Fashion industries are slowly adjusting their production process to be more eco-friendly. Fashion is slowly changing. That is already the case. However, there are ideas being discussed such as sustainability, eco-friendly clothing, and slow fashion. I'm sure that I'm not the only one who is finding this concept a bit tricky to accept. To be more specific, the slow fashion movement is about encouraging consumers to slow down their consumption. I'm not sure that I understand the argument behind this one, because it seems to me that by doing so, you'll actually be taking a step back. Personally, I'd say I have a hard time accepting the term 'slow fashion' because fashion is already changing. It's been changing for years. Is that not slow enough? Why slow fashion? Now, let's try to figure out why this concept is being implemented. The idea of slow fashion is to increase awareness and reduce the amount of waste that is being produced. While I can definitely understand that the fashion industry is trying to reduce the amount of waste being produced, this seems like a very hard task. Fashion is such a transient industry. 520fbfae7
