Visa hela texten 1. Basics of server and web server administration. 2. Preparing to install the server. 3. Installing servers. 4. Name-scoring. 5. Server management. 6. Configure Web Server 7. Install and test a program environment. 8. Providing e-mail services. 9. Extension of the web environment. 10. Securing the web environment. 11. Monitoring and analysis of web environments. 1. Server and Web server administration basics.2. Preparing to install the server.3. Install server.4. Name resolution.5. Server Management.6. Configure Web Server7. Installing and testing the program environment.8. Providing e-mail services.9. Expand the web environment.10. Securing a web environment.11. Web environment tracking and analysis. This book is not really about a web server administrator. It's a strange mixture. Contains a lot of treatments of home-this-then-do-it server software installation and basic configuration. And it contains some descriptions of protocols and the like. But there is a wealth of real practical expertise of web servers. Expertise.
