

Hayden Barke

Hayden Barke is a Principal of Argon IP, a boutique Patent Attorney firm that provides intellectual property protection services for companies and individuals in Australia and other countries.

Hayden's advice is clear, and commercially-focussed. His approach to intellectual property protection is rigorous, and marries deep technological and intellectual property law expertise to provide clients with quality outcomes aligned with business intent. This approach is maintained throughout all phases of managing client's intellectual property portfolios. Hayden also has significant experience in protecting industrial designs internationally, and his design filing strategies utilize this experience to maximize protection in this niche field.

Hayden has experience working with multinationals, universities and research institutions, specialist industrial design firms, small- and medium-sized enterprises, start-ups, and entrepreneurs.
