Plate carrier dayz

Hello everyone, whether the Carrier plate is really worth it and makes it a function to keep you alive. What are you guys doing? See you there I don't use it, but it's more that I look more like a field vest, but yes, I don't know, I believe some guys will test it with a press vest/plate carrier doing everything to exactly protect you press vest and rider jacket shot with Mosin pretty close distance equally dropping from 100% hp to about 75% (white not filled with cross) carrier plates will protect you, but I think it's vulnerable to shots. If you get a shot from the side under your arm expect your lungs to explode before disappearing into black. I saw people shot with AK, the carrier plate was destroyed, but they survived. If you doubt any dayz science check out a utuber called WOBO. He came out of the womb in a white lab coat. He explores the mechanics of playing days in our favor. Good luck buddy, just Jack I hate wearing a carrier plate, it's too heavy We did a recent test (2 days ago) with a press vest that people say also provides protection. We fired one shot at the man's chest of a dead center wearing a press vest just shirtless under about 8 feet and he took them in the middle of yellow health. We did the same test for a person wearing a high-capacity vest, the results were the same for both vests, of medium yellow health. We repeated this test for the full health of people using M4, which took them to red health. So as far as we can see the press vest and high cover vest provide the same protection. As for the ballistic vest we plan to repeat this test soon. Curious if anyone else has experienced it. Good work Sergeant. Who was a volunteer for catching duty bullets? 🤔 anyway. I was killed wearing it lol probly because they wanted my stuff... good to the man at the tisy military base that killed me, I'll find you one day and thanks for not showing me mercy at all... I have to thank you for your lesson. Now I know who I should become in a country of infected people. I took 4 or 5 shots to the chest with a gun and it didn't even make my screen darken. Can't provide statistics, but I always wear one just because. Still. I was killed wearing it lol probly because they wanted my stuff... good to the man at the tisy military base that killed me, I'll find you one day and thanks for not showing me mercy at all... I have to thank you for your lesson. Now I know who I should become in a country of infected people. Don't lose your brother's faith. There are a lot of good people around. Find a village or other faction base and make some contacts. you end up with a much more friendly that will make the occasional KOS less painful. Hope to see you in the game Sir 🍷 Nice Work Sergeant. Who was a volunteer for catching duty bullets? 🤔 myself and named Patrick by turns lol now this is what I call taking one for the team team good work o7 This guy emptied his entire Makarov magazine to my chest when I entered the house in Elektro for 0.63. I just laughed at him for not taking any damage at all. Then his gun started making clicking sounds. I immediately got a kitchen knife and was ready to cut the guy, but then he admitted that he just scared me when I came busting up the house in the middle of the night so we became friends. I think I would have done the same. If you read this Khan I'm glad we met, you are a true gentleman! But yes, I took 0% damage from Makarov. I don't know if it was a problem with the registration of bullets or not. I think this issue needs further investigation. I was shot three times today by an AKM player. All 3 hit my carrier plate and it took me to red health and a few seconds later it went up to yellow. My friend killed the player by shooting them once in the chest with AKM, and that the player had no protection. They didn't limp, so I can safely assume they were in full health. I once emptied a full AK MAG on a guy from about 20/30 meters away, he and 2 others had a friend of mine surrounded in a barracks at the VMC. He killed me after that, I was so angry, I was sure a few bullets hit him. My friend rushed and killed them all, he said: The guy who killed you was the carrier plate. It made me happy because I was a little ashamed that I didn't kill him, I had to aim at his head! I think it seems to offer protection anyway watching the video on the slomo cool heck, he had a bullet sponge and half we checked it right after the 1.0 run..... The Carrier and High Cap plate absorbs the same amount of bullet damage. By now, things could have changed. Kill one person; You are a murderer, kill 10,000 people; You're a psychopath, but kill them all?... , you're God JORDAN Comments Share vest that provides some protection. This vest can be modified to have the pockets of the vest or the gun holder. All this can be found on military bases. Community content is available under CC-BY-SA unless otherwise stated. More Days' Wiki As part of the Single Community Platform project, your wiki will be moved to a new platform in the next few weeks. Read more here. From Day' Wiki Solid Plate reinforced bulletproof vest, capable of absorbing various types of shock damage. Can be expandable with a holster and extra bags. - In the game, the Carrier plate description is part of the modular clothing in Day' Standalone. This vest is usually found empty, but can have attached bags (24 slots) and a Gun Holster (1x pistol) attached to it. This vest has a strong combination of ballistic protection and a lot of carrying ability, with the downside being that you probably have to do a lot of searching, find all their individual pieces. Gallery edit source Carrier plate with booster plate Carrier with bags plate Carrier Full set crafting edit source » Plate Carrier was previously known as ballistic Vest and was removed in the previous version of the game. It was added again in the 0.54 update. TESTED AND WORKS ON 1.09General information and updates pushed back to Discord.discord.gg: All related attachments work only for the intended model. The items are annotated with MVS to distinguish themselves from conventional equipment. I can add an extra proxy to the default plate carrier bags, but its not currently in scopeAdditionally, this MVS platform can be stored on the armor rack that can be placed using the kit. The kit can be made of 10 boards and 10 nails. The armor rack can be dismantled with an axe. The armor rack only accepts the MVS platform. This is due to the different mod equipment having modified proxy rotations that will eventually prevent this rack from being used for any type of vest. Think of this fashion as an all-in-one package for those who want to show a good piece of kit. Once I get the Ghillie, I plan on replacing my M4 for Winchester or Blaze. The problem is that I can't carry my AKS as a weapon at close range with a carrier plate, and I'm trying to avoid double carrying, since I've heard this could be the cause of my many character napkins. I'll have to change the carrier to a high-capacity vest. So I spent a bit of time googling around, and most of the results I came across said it was virtually useless. You'll take exactly the same number of shots to the chest with a carrier plate as having an attack vest even against a caliber as low as .380.These posts have been a bit old though for at least one year. Has this change or carrier plate still virtually useless compared to just a normal assault vest?
