Amoeba sisters dihybrid crosses answer key pdf

Scroll down to this page under the purple box usage conditions to find the following newly added 2020 themes! Don't forget that the themes are in alphabetical order! :)Archea (new resource!) ATF (new resource!) Autotrophs and heterotrophs new resource! blood system new resource! sodium-potassium pump new resource! immune system new resource! Hardy-Weinberg continues to expand Will the list of all our biological videos in our playlist useful in planning? It's hard to print a playlist online! We have a list of printed out available from our playlist on our course playlist page. Our resources are a tool, and like any tool-efficiency is largely based on how it is used. Please see our suggested use information below for some useful tips! We know that this is a difficult time because of the fears around COVID-19. Teaching at a distance during COVID-19? See our recent helpful post that was developed after increasing questions. Annotated video script TEMPLATES What are the handout commands? FREE and select resume handouts use video cartoons (drawn by Petunia) to help students connect to content after watching one of our short videos. They have questions that can be used as formative assessments to quickly determine what you may need to focus on in the classroom. Many questions are open and ask students to put concepts in their own words (or drawings). All handouts in grid format. Suggested Summary Handout Use Ideas: (1) Use 1-2 grid boxes while class exit tickets in the last 5 minutes of classes. If printed, they all print the front of the back. Students can give out handouts to you as they walk out the classroom door. These formative checks can be used for open discussion the next morning and give feedback-no class needed. The next set of mesh boxes can continue to serve as a series of exit tickets for a few days. (2) Project the handout with a projector. Students complete 1-2 boxes, as mentioned above, as a warm-up or exit ticket in class, but they record their answers on their paper or on the device they use. (There is a feature to zoom in on the Adobe PDF reader, so you can zoom in on the handout). Students can organize their responses in their notes, in an interactive notebook, etc., and be used for discussion daily. Where can I find resume handouts? FREE student team handouts are downloaded on this page. You will need to scroll down about a third of the way down on page under the purple terms of using the box to see where the themes (alphabetical listing) start. Click on the theme to expand. If the theme offers a FREE student summary of the handout, you will see a button that says: Recap- Amoeba Sisters PDF. All of our free resources are placed on this page; We would like to avoid double placing our free items elsewhere. Note: Select handouts for resume resume under the TpT column for certain topics on this page - or see all the team's favorite handouts here. Select teams differ from FREE resumes just because they include their own key response and tend to focus on a more specialized topic. Annotated video script TEMPLATES O and suggested to use: Our annotated video script templates contain an unofficial version of our video script with little improvement to identify sentences and remove filler words to help with annotation. They have key annotations, asking students (1) to highlight parts of the transcript that they already knew (which can be built on), (2) highlight key information that is new to them, (3) come up with their own questions, and (4) emphasize vocabulary. The template has a spacious right margin for students sketch concepts that are memorable or relevant to them. It is important to note that these templates are not the same as video subtitles that play in real time (available for all our videos on YouTube) as they have been edited for better annotation ability. We also don't suggest that students annotate the template at the same time as watching a video! It would be a tempo that could be overwhelming; they are designed to be used after students have watched the video. Where to find them? Related throughout this handout page next to certain topics for teachers to pay teachers (TpT). You will need to scroll down about a third of the way down on this page under the purple terms of using the box to see where the themes (alphabetical listing) start. Or you can see all the patterns together here. P.S. All of our unselected themes in the series already include an annotated video script template with them, as this is an important component of the unselected Series resource. About and proposed use: Our unselected series is an alternative to traditional lectures and notes in the classroom and pays more attention to discussion, student survey, and student creation. All unselected themes in the series include an annotated video script template, slideshow of starter questions with memorable comics/illustrations for discussion in the classroom, and a guide to simplification. Each theme has a piece devoted to. Why does this content matter? And an opportunity for students to use their knowledge fund to create a product. Read more about their use on our Unselected page. Where to find unselected themes of the series? Topics are linked separately on this page next to specific topics for teachers to pay teachers (TpT), but we recommend viewing our Unselected pages where they are all grouped together. What are video-in-mobiles? Unlike handouts and annotated templates Designed only for use after students watch video--video--ceaths can be used both during and after watching the video. However, they only during the video when the video is suspended. Video companions often work with our multiple videos that have a pause feature. In particular, they work with videos where students are asked to pause the video to reflect on the issue. Video companions can resemble questions similar to a team handout (such as a companion codon video chart) or use a script similar to an annotated video script template (such as a video companion review). Recommended to use for video companions: We strongly recommend giving students access to them during the video, but it should be emphasized that they should not be completed while the video is playing if using the pause feature (video will suggest when a pause) is used. They can then be worked out after the video is made. They do great end classes, which can then be considered together for the next day of class as retraining. The review companion is especially lengthy as it treats a lot of videos, so it will be in a few days. Where to find them? We only have two at the moment because they are only created when there is a video that specifically uses the pause feature, as mentioned above. You'll find one under the theme of the Kodon Chart category and the other under the Review theme. Our handouts are for use in the classroom and you can find our terms of use here! Please note that the terms of use prohibit publicly posting response keys made from our handout, as this is a change in our published content (and a disservice to other teachers and students using them). We offer the official Amoeba Sisters to answer the keys (related on this site teachers to pay teachers-TpT) who also have the same conditions. We allow our images and GIFs to be shared on presentations and on social media, provided they are not edited or used for financial gain (i.e., our images or GIFs cannot be in/on the product you are selling). Find out more about our terms of use here. The resources on this page are listed on the topic in alphabetical order according to the purple terms of using box--scroll down a little more. Do you prefer to search according to the proposed sequence? Want to know what theme name to search for? Check out our new course playlist page! What we offer for free: Our videos are always free! We work hard to create them; usually it takes us a month to release one video. You can access our full training playlist here and you can subscribe to our feed to be notified whenever we release a new video! Many video themes offer FREE student PDF summary stuff that you can download and use for all your students that you find below on this page. (Please see our terms of use that spell out their use as they cannot be sold and answer keys made with them may not be available on the internet as it makes it difficult for others to use.) Check out their suggested use in this video. Our GIFs and comics, comics. You can use in your presentations, post on websites, or share on social media--president that you follow the terms of use (which includes that they cannot be placed in the items that you sell, and our name cannot be cropped/edited from them). We believe that our GIFs and comics can make great discussion snacks and work great for asking questions about content! What you'll find in the On TpT column (Teachers Pay Teachers) on this page for certain topics: We sell official answer keys that match the free WEBSITE PDF summary handouts. It helps to support our work. You'll find them linked on this page next to individual topics. We also have a lot of our answer keys in packs that are discounted from buying them individually. Answer keys offer convenience, and they can also be useful if you're new to content. As mentioned in the product description, please don't buy a key without one making sure that you have a free relevant handout from this page, that it goes to it (and that you have determined that the free student handout is perfect for your class). We sell a few select resume handouts that come with their own answer keys. You'll find these related (but not downloaded) on this page. They are stylized just like our regular free grid handouts to use exit tickets, but they tend to cover more detailed/less standard topics. For example, the properties of water and the theory of endosymbiotics have separate handouts (with accompanying keys). We sell annotated video script templates for some videos. You'll find these related (but not downloaded) on this page. The template allows students to sketch out, identify key points, recognize an important vocabulary, and come up with their own questions. Our script is edited on these templates to make them easier to annotate. P.S. All of our unselected themes in the series already include an annotated video script template with them, as it is an important component of the unselected Series resource.Our Unselected Series! The unselected series is designed to be an alternative to traditional lectures/notes and encourages students to question, discuss and create students. There are 18 themes in total in our full first series, and these themes are individually related to this page. We also have them available all together in our 18 theme bundle. What is TpT? Teachers Pay Teachers (TpT) allows teachers creators to be able to financially support themselves for their work, which allows us to continue our creation! TpT contains all kinds of amazing resources (in all areas of PK-12 content!), created by many who, or have been, in. Although we always plan to have free resources (and of course our videos are always free) as this is part of our mission, we appreciate the support from those who buy the items we offer. So I need a TpT account to buy items on TpT? Yes, you need an account so you can access the resource at any time. It's free to make an account on TpT. Here's their general registration page for a personal account: www.teacherspayteachers.com/Signup/Can my school make a TpT account? Or use purchase orders? Check out the new TpT for schools. This allows schools to purchase the items they need through one place for their teachers, and this works well with school purchase orders. Even if your school doesn't have a TpT account for schools, you can buy something on TpT with a school purchase order. Can I just get one mega bundle of everything you have on TpT? We've asked about this more often now, and we know that some TpT creators can offer this. The problem we have is that (A) we are always actively creating and (B) we want to avoid growing bundle because we never know how many resources we will continue to create. So, with that above in mind, here are the options we have regarding the issue of mega bundle: Option 1) We have a TpT response to key packages (which contain only keys). As we do more keys, we continue to place them in new bundles to offer discounts from purchasing them individually. We had people decide to just buy all the packages, but keep in mind that since we often create, there may be some keys that won't yet be in one of the proposed packages. Please note that the answer key packets contain only response keys; We avoid placing our free items on TpT (to avoid confusing double postings), so our free handouts commands are usually exclusively on this page. We also offer the Unselected Series package. Both of these types of bundles offer an interest discount. Option 2) Contact us and tell us all the items you would like in the custom bundle. In your email, can you tell us which ones you would like your custom bundle to include? In order for us to manage user bundle requests, we need at least 4 separate items in it. A) Specific (or all available currently) bundles that go to our free handout team (note: these are just clues like free handouts that match them are on this handout site)B) Specific (or all available at present) select command handouts (which come with their own response keys). C) Specific (or all available at present) Unselected Theme Series from our 18 theme bundle D) Specific (or all in Time available) Annotated video script templates No, not all of our videos have an accompanying resource. This usually happens when we have a new video and have not yet completed an accompanying resource. Since a video that doesn't have a resource won't be on this handout page, please bookmark our full video playlist to access all of our videos. You can subscribe to our The YouTube channel will be notified when we release new videos. Our videos and resources are designed to specifically focus and support TEKS science (Texas standards), but there is often a standard overlap in many places. You will find TEKS listed on this page when applicable. We started to include NGSS, which can be supported by our video themes. However, we want to emphasize that our videos and resources cannot be all-inclusive of any standard because we believe that a strong laboratory framework, student survey and course discussion are critical to a complete decision on scientific standards. Our goal is to add our videos and resources to support the standards that students learn. There are so many free tools for this now that work in Chrome itself! Consider a free, fast Chrome Kami extension or a free Chrome DoxHub app (not related to any of the tools). These tools allow you to annotate and write on PDF files and work well with Google products as well. Here's an example in our quick video screenshot on our Twitter page! Just a reminder though: always check the privacy policy/terms of use of any tool before using in your class. When these handouts are used in the classroom as quick form checks, you are (1) able to guarantee that the answers you receive from the student who handed it to you, (2) you can help students to do so exactly in time help they need, and (3) you can adjust the learning because of reading the answers. They are also built into the discussion class. Once handouts leave your class for work, there are many variations that can take away these opportunities. We believe it is very important to bring this issue despite not getting the issue yet. We want to make sure that the model for students is that we all make mistakes, and that it's not only important to fix them--no grow out of them too. We strive to be lifelong learners and share our learning as it is (on Twitter) or this (on Twitter!) We are faced with an accidental typo or grammatical error. Sometimes we get useful feedback for videos that we need to add clarification or something that was misspelled. The tutorials have methods for handling errata, and as editors, we also looked for ways to handle this. Here's some information on how we handle the different types of these issues in our videos. As for our handouts --if it's a free resource, we can make changes to this page. If it is on TpT, we can update it directly there. If this is more than a small typo on TpT, we can send a note to all TpT buyers giving them why we made a edit. We have created so many comics and GIFs now on so many of our video themes and we think they are so powerful in the class. Take our comic book here about the enzyme (one of our many enzyme comics). Think about the power of projecting on the screen and the questions that can be asked about how this relates to the topic being explored. Or, better yet, ask students to come up with questions. The questions are like: How does this comic book be about our content? What environmental conditions can actually denature enzymes? If this were a reality, do all fermented cultures have the same request? These are just a few examples, and these features are naturally built into our unselected series! We share our individual comics and GIFs-- to start discussions like these, and please feel free to use them--send you to follow our terms of use. As creators, we hope to continue to get better, which means we are doing remake video as our art and audio improves. However, we try to avoid deleting old videos or resources because we want students to see this journey. We believe it is important for students to know everyone starts as a beginner! If we redo the video, we'll usually post a new version of the video link on this page and then still keep a link to the old video too. Old handouts can still be used with new videos as we make sure our new videos still include previous information. Sometimes we'll update old video handouts, but we've found that seems to cause confusion, so we're less inclined to change old handouts. Our videos are FREE! Subscription to our channel is also free and will make us HAPPIEST amoeba! Please subscribe to our YouTube channel! Reminder: Terms of use prohibit the public placement of response keys made from our handouts. This is editing of our copyrighted work (and a disservice to the teachers and students using them). Scroll in alphabetical order, but not sure if you're looking for the same name theme we use? Finish the course playlist page for help! Texas Teachers: Includes Material Covered by TEKS B.6F's Streamlined Biology. Video can support NGSS HS-LS3-1 components. Alleles and Genes Summary - Amoeba Sisters PDFFile Size: 441 kbFile Type: pdfDownload File Answer Key to Alleles and Genes Team. It helps to support our creation! For this video, we offer our annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Note: We have not created a free handout on this topic. ATP Summary- Amoeba Sisters PDF.pdfFile Size: 549 kbFile Type: pdfDownload file You'll find ATP mentioned in many of our comics and GIFs! Find the ATP mentioned in our mitochondrial GIF and cellular transport GIF on our GIF page! Answer Key to ATP summary. It helps to support our creation! Teachers: Includes materials covered by streamlined biology TEKS B.10C, Streamlined 6th grade TEKS 6.12E and 6.12F, and 7th grade TEKS 7.12C. Video can support NGSS HS-LS1-2 components. Biological Levels of The Reem-Amoeba Sisters PDFFile Size: 305 kbFile kbFile pdfDownload file also, check out our biological levels of organization GIF on our GIF page! Texas Teachers: Includes Material Covered by Rational Biology TEKS B.9A. Video can support NGSS HS-LS1-6 components. Biomolecules V.2 Summary - Amoeba Sisters PDFFile Size: 561 kbFile Type: pdfDownload file Also, check out our comics biomolecules and GIFs! Answer Key to Biomolecule summary! It helps to support our creation! The theme is part of our unselected series! Texas Teachers: Includes Material Covered by TEKS B.10A And 7th Class Science TEKS 7.12B. Video can support NGSS HS-LS1-2 components. Body Systems Summary - Amoeba Sisters PDFFile Size: 536 kbFile Type: pdfDownload file also, check out our comic body systems! Answer Key to Body Systems resumes. It helps to support our creation! The theme is part of our unselected series! Texas Teachers: Includes Material covered by streamlined biology TEKS B.4A and 6th class TEKS 6.12A and 6.12B and 7.12B TEKS 7.12D and 7.12F Intro to Cells Recap- Amoeba Sisters PDFFile Size: 715 kbFile Type: pdfDown Fileload Also, Check out our cell comics and GIFs!! Answer Key to intro to resume cells. It helps to support our creation! The theme is part of our unselected series! Teachers of Texas: Includes materials covered by streamlined biology TEKS B.5A and B.5C. See our GIF cell cycle! Note: We have not created a free handout on this topic, but we do offer resources to purchase on TpT. Check out our annotated video script template TEMPLATE, which provides space for students to annotate, sketch their learning, identify vocab, and ask their own questions. NOTE: You can purchase it separately above, or it comes as part of the unselected series below. The theme is part of our unselected series! Texas Teachers: Includes Material That Can Support Orderly Biology of TEKS B.4B. However, our cellular transport video will actually cover transportation components. Video can support NGSS-LS1-2 components. Check out our cell membrane comics. Note: We have not created a free handout on this topic, but we do offer a resource to purchase on TpT. Check out our annotated video script template for this theme. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Check out our ligand comic! Note: We have not created a free handout on this topic, but we offer a resource to purchase on TpT. Check out our annotated video script template for this theme. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Teachers: Includes materials covered by streamlined TEKS B.4B biology. Cellular Transport Summary - Amoeba Sisters PDFFile Size: 600 kbFile Type: pdfDownload File Answer Key to Cellular Transportation. It helps to support our creation! The theme is part of our unselected series! That's why. We offer our annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Note: We have not created a free handout on this topic, but we offer a resource to purchase on TpT. For this video, we offer an annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Teachers of Texas: Includes materials covered by TEKS B.5A and B.6G biology. Chromosome Number Summary - Amoeba SistersFile Size: 668 kbFile Type: pdfDownload file We additionally have two useful GIFs under mitosis and meiosis on our GIF page that show the number of chromosomes during these processes. Answer Key to chromosomal resume numbers. It helps to support our creation! Free Video Resources Select Theme Summary and Key: Select resume handouts are stylized under our free handout team, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handed inheritance are topics that have separate handouts (with accompanying keys). It supports our work! How to read the Codon Chart Video Companion-Amoeba Sisters PDFFile Size: 554 kbFile Type: pdfDownload File Note: This video is a companion handout instead of a team handout. What's the odds? The proposed use and purpose are slightly different. Check out more information at the top of our page where we are talking about the proposed use. Amoeba Sisters Terms of Use Reminder: Terms of use prohibit the public posting of response keys made from our handouts. This is editing of our copyrighted work (and a disservice to the teachers and students using them). Scroll in alphabetical order, but not sure if you're looking for the same name theme we use? Finish the course playlist page for help! Teachers of Texas: Includes material covered by streamlined TEKS B.8B biology and 7th grade TEK 7.11A science. Texas Teachers: Includes Material Covered by TEKS B.6F' Streamlined Biology. Dihybrid Crosses Summary - Amoeba Sisters PDFFile Size: 531 kbFile Type: pdfDownload file Check out our foil GIF, which can be useful for dihybrid crosses! Answer Key to Dihybrid Crosses team. It helps to support our creation! The video has been updated! The script is very similar to the script in the original video, but the new version has improved the art and audio! Both videos will remain! Texas Teachers: Includes Material Covered biology in TEKS B.5A. Video can support NGSS HS-LS1-4 components. Texas Teachers: Includes Material Covered by Rational Biology TEKS B.6C. Video can support NGSS HS-LS1-1 components. NOTE: We don't always update old handouts when updating videos, but we decided Update this handout! It's very similar, but with updated drawings and a few extra topics. The updated handout is below, and just like the old handout, it focuses on two videos. The front (1st page) focuses on the dna video against RNA, and the rear (2nd page) focuses on the video of protein synthesis. UPDATED DNA vs. RNA and Protein Synthesis Summary - Amoeba Sisters PDFFile Size: 445 kbFile Type: pdfDownload file prefer old handout? Click to expand the note: The handout covers 2 separate videos. The front (1st page) focuses on DNA vs. RNA video and back (page 2) on a protein synthesis video. OLD DNA vs. RNA and Protein Synthesis Summary - Amoeba Sisters PDFFile Size: 647 kbFile Type: pdfDownload File Check our DNA vs. RNA comic and RNA Types GIF! Answer Key to DNA vs. RNA and protein synthesis team. Note: We updated this to include both keys--ohno to the original (old) student resume and one to a new (updated) student resume. Teachers of Texas: Includes material covered by streamlined biology TEKS B.12A. Also covers material included in the streamlined 8th class TEKS B.11A. Texas Teachers: Includes Materials Covered by TEKS B.11B. Also includes materials covered by the streamlined 7th Class TEKS 7.10C. Teachers of Texas: Includes material covered by streamlined biology TEKS B.4A. Check out our endosymbiotic comic theory! Note: We haven't created any free handouts on this topic, but we do offer a resource to purchase on TpT. Choose Theme Summary and Key: Select resume handouts are stylized as our free handouts team, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handed inheritance are topics that have separate handouts (with accompanying keys). It supports our work! Texas Teachers: Includes Materials Covered by TEKS B.9C' Streamlined Biology. This covers an advanced topic of how cells can still produce ATP, even if oxygen is limited. Check out our comics fermentation! Note: We haven't created any free handouts for fermentation, but we do offer a resource to purchase on TpT. Select Theme Summary and Key: Select team handouts are stylized under our free handout team, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handed inheritance are topics that have separate handouts (with accompanying keys). It supports our work! Texas Teachers: Includes Material Covered by TEKS B.12C and 7th Class TEK 7.10B Science. Video can support NGSS HS-LS2-4 components. Check out our related comics and gel electrophoresis GIF! Note: We haven't created a free handout on this topic, but we do offer a resource to purchase on TpT. Choose a resume theme and key; select team handouts are stylized just like our regular free handouts team, but they tend to cover more detailed/less standard topics. For example, for example properties, endosymbiotic theory and non-mendelian inheritance are topics that have selected handouts (with accompanying keys). It supports our work! Texas Teachers: Includes Materials Covered by TEKS B.6D. Check out our our gene regulation GIF! Note: We have not created a free handout on this topic, but we do offer a resource to purchase on TpT. For this video, we offer our annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Texas Teachers: Includes Materials Covered by TEKS B.7F' Streamlined Biology. Video can support NGSS HS-LS4-2, HS-LS4-3, HS-LS4-4 components. Genetic Drift Summary - Amoeba Sisters PDFFile Size: 580 kbFile Type: pdfDownload File Answer Key to Genetic Drift Team. It helps to support our creation! The theme is part of our unselected series! Amoeba Sisters Terms of Use Reminder: Terms of use prohibit the public posting of response keys made from our handouts. This is editing of our copyrighted work (and a disservice to the teachers and students using them). Scroll in alphabetical order, but not sure if you're looking for the same name theme we use? Finish the course playlist page for help! Texas Teachers: Includes Material Covered by TEKS B.4B's Streamlined Biology. Video can support NGSS HS-LS1-3 components. Check out our comic book about positive and negative reviews! Choose a resume theme and a key; Choose resume handouts stylized just like our regular free handouts team, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handed inheritance are topics that have separate handouts (with accompanying keys). It supports our work! Texas Teachers: Includes Material Covered by TEKS B.6F' Streamlined Biology. Check out our incomplete illustration of dominance/codominance. Note: We haven't created a free handout on this topic, but we do offer a resource to purchase on TpT. Choose a resume theme and key; select team handouts are stylized just like our regular free handouts team, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handed inheritance topics that have separate handouts (with accompanying keys). It supports our work! Texas Teachers: Includes Material Covered by TEKS B.6G's Streamlined Biology. Video can support NGSS-LS3-2 components. Texas Teachers: Includes Material Covered by Rational Biology TEKS B.5A. Video can support NGSS HS-LS1-4 components. Mitosis Summary-Ameb Sisters PDFFile Size: 2968 2968 Type: pdfDownload file Check our comics cell division (be sure to hit the previous one under the bottom comic to see them all) and our mitosis GIF! Answer Key to LS3-2 components. Texas Teachers: Includes Material Covered by Rational Biology TEKS B.10B. Video can support NGSS HS-LS1-4 components. Mitosis Summary-Ameb Sisters PDFFile Size: 2968 2968 Type: pdfDownload file Check our comics cell division (be sure to hit the previous one under the bottom comic to see them all) and our mitosis GIF! Answer Key to LS3-2 components. Texas Teachers: Includes Material Covered by Rational Biology TEKS B.10B. Video can support NGSS HS-LS1-4 components. Mitosis Summary-Ameb Sisters PDFFile Size: 370 kbFile Type: pdfDownload file We have a lot of comic cell, but this is one of our favorites on the subject. Also, check out our prokaryotic vs. eukaryotic GIF cells! I'm looking for your old video called Prokaryotes and Eukaryotes and old handouts? Click here to access our old Prokaryotes and Eukaryotes videos! He'll stay. Below is our old handout as well. Note: As

mentioned in the product description, the proposed key on TpT moves to a new handout. There is no active clue to this old handout. OLD Prokaryote / Eukaryote Summary - Amoeba Sisters PDFFile Size: 437 kbFile Type: pdfDownload File Answer Key to Prokaryotic vs. Eukaryotic Cells. It supports our creation! Choose a resume theme and a key: Select team handouts are stylized just like our regular free team handouts, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handied inheritance are topics that have separate handouts (with accompanying keys). The theme is part of our unelected series! Check out our protein structure GIF! Note: We have not created a free handout on this topic, but we do offer a resource to purchase on TpT. For Video, we offer our annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Texas Teachers: Includes Material Covered by Rational Biology TEKS B.6C. Video can support NGSS HS-LS3-1 components. P.S. Did you know that we just made a short video on how to read the codon chart? To find it, look under the under The theme on this Page is the Kodon Chart. :) NOTE: We don't always update old handouts when updating videos, but we decided to update this handout! It's very similar, but with updated drawings and a few extra questions. The updated handout is below, and just like the old handout, it focuses on two videos. The front (1st page) focuses on the dna video against RNA, and the rear (2nd page) focuses on the video of protein synthesis. UPDATED DNA vs. RNA and Protein Synthesis Summary - Amoeba Sisters PDFFile Size: 445 kbFile Type: pdfDownload file prefer old handout? Click to expand. OLD DNA vs. RNA and Protein Synthesis Summary - Amoeba Sisters PDFFile Size: 647 kbFile Type: pdfDownload file Note: Handout covers 2 separate videos. The front (1st page) focuses on DNA vs. RNA video and back (page 2) on a protein synthesis video. In addition, the old protein synthesis video still exists, if preferably. Check out our protein synthesis comics and GIFs! The theme is part of our unelected series! Texas Teachers: It will walk briefly through the concept in 37 of our playlist videos. We chose these videos because they have concepts that support many of the biology of TEKS. A video companion for students is available on TPT here! This video companion is closely following our Walk through the Playlist (Biology Review) video. We license part of our art for our Redbubble store. See our research poster tips here. Amoeba Sisters Terms of Use Reminder: Terms of use prohibit the public posting of response keys made from our handouts. This is editing of our copyrighted work (and a disservice to the teachers and students using them). Texas Teachers: This may correlate with many TEKS processes related to the safety of a science lab. Lab Security Summary-Amoeba Sisters PDFFile Size: 395 kbFile Type: pdfDownload File Check out our lab security reminder comic here We license some of our art for our Redbubble store. See our lab safety posters here. Texas Teachers: Includes material covered by streamlined biology TEKS B.6F Check our Sodium potassium GIF! The video mentions how sodium and potassium electrochemical gradients (which a potassium sodium pump helps maintain) can be used by other proteins. Check out our protein transporters graphic! For this video, we offer our annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. Texas Teachers: Includes material covered by streamlined biology TEKS B.5B. For this video, Offer our annotated video script TEMPLATE. Our template gives students the opportunity to annotate, sketch out their learning, identify vocab, and ask their own questions. This video can support NGSS HS-LS1-1 components. Choose a resume theme and a key: Choose resume handouts stylized just like our regular free handouts team, but they tend to cover more detailed/less standard topics. For example, for example properties, endosymbiotic theory and non-mendelian inheritance are topics that have selected handouts (with accompanying keys). It supports our work! Video can support NGSS HS-LS4-5 components. Choose a resume theme and a key: Choose resume handouts stylized just like our regular free handouts team, but they tend to cover more detailed/less standard topics. For example, the properties of water, the theory of endosymbiotics and non-handied inheritance are topics that have separate handouts (with accompanying keys). It supports our work! Note: We are concerned about the increasing number of vaccine-preventable diseases in our area. The video details for this video include links to further read sentences from several peer-reviewed sources that can help solve many of the myths that exist about vaccines. While we don't have any handouts on this topic at this time, check out our relevant illustrations! Teachers of Texas: Includes material covered by streamlined biology TEKS B.4C. Viruses Recap- Amoeba Sisters PDFFile Size: 436 Filkbe Type: pdfDownload file Check out our numerous virus comics (be sure to click the previous one in the bottom left corner of the last comic book to see them all!) and our virus replication GIF! haven't you had an old video and handout on the subject? Yes, here's a link to our old video. The old handout below. We do not offer the key for this old handout. OLD Virus Summary - Amoeba SistersFile Size: 679 kbFile Type: pdfDownload File Answer Key to Virus Team. It helps to support our creation! The theme is part of our unelected series! P.S. Click above graphic to see our blog on the subject. While these absolute statements do not appear to involve edu videos on YouTube (yet), we believe that the effectiveness of this video also depends on how they are used, so we made a video with some suggestions! Offers! amoeba sisters dihybrid crosses answer key pdf. amoeba sisters dihybrid crosses answer key quizlet. amoeba sisters video recap dihybrid crosses (mendelian inheritance) answer key. amoeba sisters dihybrid crosses (mendelian inheritance) answer key. amoeba sisters dihybrid crosses worksheet answer key. amoeba sisters video recap dihybrid crosses answer key. amoeba sisters llc answer key dihybrid crosses. amoeba sisters video recap dihybrid crosses answer key pdf
