Reason Rack Plugin can be used in DAWs like Reason, Ableton, Reason Rack and Native Instruments Komplete. Reason Rack Plugin can be used in any Rack Extensions enabled DAW like Ableton Push, Korg Delta, Cakewalk Sonar etc. (if they are 64 bit) and the reason is that Ableton Push, Reason Rack, Komplete etc. are all based on the original Reason code of Bruce Gorman and were originally created as a standalone DAW. As a standalone DAW none of these supports plugins. Reason Rack Extension is a bit different and can be used in Reason Rack and all Reason plugins (64 bit and 32 bit). Reason Rack Extension is for instance Ableton Live, Logic, REAPER. REAPER is the only one not based on the original Reason code and doesn't support plugins. Reason Rack Extension is a 64 bit plugin and not a 32 bit plugin. Reason Rack Extension is based on the PluginControl. So you don't need Reason Rack Extension to get Reason Rack Plugin. You can have both PluginControl and Reason Rack Extension in 64 bit Reason. Reason Rack Extension is for instance Ableton Live, Logic, REAPER. REAPER is the only one not based on the original Reason code and doesn't support plugins. Reason Rack is the basic version of Reason and it's based on the original Reason code of Bruce Gorman. Reason Rack is just like Reason Rack Extension except that Reason Rack is 32 bit plugin. In Reason Rack there is no need for PluginControl. Reason Rack Plugin and Reason Rack Extension are 64 bit plugins. If you have Reason Rack and Reason Rack Extension then you will also have Reason Rack Plugin. It's possible to have Reason Rack, Reason Rack Plugin, PluginControl in 32 bit Reason but you need 32 bit PluginControl. Reason Rack and Reason Rack Extension are just plugins. Reason Rack Plugin is a plugin. It's not a rack plugin. As far as the differences with Reason Rack and Reason Rack Extension are concerned, the only difference is that Reason Rack Extension comes with some standard modules out of the box. Reason Rack and Reason Rack Extension are 64 bit plugins. But a 32 bit plugin can be used in 64 bit Reason. Reason Rack plugin and Reason Rack Extension are 64 bit plugins. But as we have explained above in the section "What is the difference between Reason Rack, Reason Rack Extension and Reason Rack Plugin", there is no difference between Reason Rack, Reason Rack Extension and Reason Rack Plugin. All plugins based on 520fdb1ae7
