Universal theme patcher

Many different themes for Windows 7 will help you create a unique, stylish, unlike any other shell of your operating system. You can use your favorite wallpapers, color combinations and graphics filters for windows, which in combination with a set of interesting gadgets will help create your exclusive Windows 7. In the special sections of our site you can: Download gadgets for Windows 7 Download themes for Windows 7 Link to download Universal Theme Patcher see at the end of the article. This small patch is designed to set new styles and themes for Windows 7. To install this program, let's do the following: Step 1. We will run the program on behalf of the administrator (the package includes both x86 and x64 bit version of your system). Figure 1. Launch on behalf of The Step 2 Administrator. Click OK to confirm your chosen language. Figure 2. Confirm the selected language Step 3. Then we'll press Yes again to confirm. Figure 3. Information about the installation of Step 4. Then a window will open, in which in this case you need to patch 3 files. To do this, click Patch in front of each file. After each action, you will be informed of the successful operation. Figure 4. Information about the patch to use themes for Windows 7 Step 5. Once you change all the files, you will be asked to restart your computer. Click Yes for the reboot. Figure 5. Step 6 reboot confirmation window. Next, you'll need to copy the contents of the theme to the C:\Windows\Resources\Themes folder. Step 7. In the Personalization section (Start - Department Panel - Personalization) you'll see a freshly set theme. Step 8. As a last resort, re-running this patch allows you to recover the modified files. To do this, click Restore in front of each file and restart the computer again. Figure 6. Windows 7 Theme Patch Author: admin Published: August 1, 2012 Latest changes: June 8, 2017 Universal Theme Patcher applies changes to Windows XP, Vista or 7 that allow you to use unofficial themes and change the look of Windows. It's a portable app that means Universal Theme Patcher doesn't require installation, and will also run with a USB drive. When you run an EXE file, it will first tell you whether to apply the fixes to your system, then open an additional window with three areas, each with fix and recovery buttons. These buttons allow you to fix three specific files, which will then allow you to download and use unofficial themes. Each Universal Theme Patcher patch will also back up so you can go back to your original settings whenever you want. The Universal Theme Patcher interface has some unnecessary complex information on display that can put off newcomers, but nothing to worry about, as only Patch and Restore buttons are important. If you want to use unofficial themes for Windows, Universal Theme Patcher is a quick and painless way to make it possible. Download Now Secure Download Title: Universal Theme Patcher 1.5 Category: Desktop Size: 0.08 MB Developer: deepxw Tags: Desktop, Topics, Wallpaper Opera.System: Windows 7, Vista, XP Language Interface: English Universal Theme Patcher - useful, easy to use, and most importantly free which is designed to bypass restrictions in Windows XP SP2 and SP3, Server 2003, Vista SP1 and SP2, Server 2008, Windows 7, which block the use of themes. Download the Universal Theme Patcher program for free at the links below: UniversalThemePatcher_20090409.zip!!! Visitors in the Guest group cannot comment on this post. Download Left Right Comparison Alternative Programs: Technical Information Rating:5 (56) Rating in Topics:212 Last score:29/09/2020 License:Free File Size:81 KB Version:1.5.0.22 Last updated:11/5/2010 Operating system: Windows XP, Windows Vista, Windows 8, Windows 7, Windows 10 Languages: English Developer:Genericom Total downloaded (Russian):325 Total downloaded (Worldwide):2.063 Windows provides its users with unique design capabilities. You can change literally everything from the background of the desktop to the taskbar. Everyone can customize the computer to their liking. At least that's what it seems at first glance. But, over time, you realize that opportunities are not enough. Standard OS tools do not allow, for example, to make the panel not monochrome, let alone to fill it with any pattern. Of course, for connoisseurs of quality design there are many topics provided on the official website of Microsoft, but over time they get fed up. Moreover, some users could not find anything acceptable among the big list. This is a simple program in its settings, which makes it easy to establish any topic, even downloaded from the site, even created independently. Now, you you don't have to search for the necessary files in the system folders for a long time, change them and pray that nothing will break, because the patch will do it for you. Installing a patch is extremely simple and does not require special knowledge. The Universal Theme Patcher interface is Russified and clear without any instructions. File list q uxtheme patch - lang - Readme.txt - ThemePatcher_ENU.ini - Readme.EN.txt - Readme.txt - UniversalThemePatcher-x64.exe - UniversalThemePatcher-x86.exe Universal Theme Patcher - a free utility designed to change some of the system files of the Windows 7/Vista operating system Thanks to this patch, it will be easy to install any themes of design.Such themes have often format .msstyles (sometimes and .theme, but less often) and they need to be copied into a folder with OS Windows (C:\Windows\Resources\Themes). After that, you should only click on such a file twice - and the theme of the design has changed, without any additional programs. Universal Theme Patcher is suitable for both 32-bit architectures and 64-bits for the following versions of Windows: 7, Server 2008, Vista SP1/SP2, Server 2003, XP SP2/SP3. There is nothing complicated with the program, the installation is simple and intuitive. Choose a language, better great and mighty and click on THE OK Opens a window with information about the installed system and the right files P yes to continue and see the window where will be shown what kind of files we need to patch. choose exactly the ones that need to be patched. Click in turn to patch the patch near each file. When all the necessary files will be patched - Universal Theme Patcher ask you to restart your computer. After the restart you can set third-party topics, whether you have Windows 7, Windows Vista or Windows XP XP universal theme patcher windows 7 x64, universal theme patcher windows 7, universal theme patcher windows 10, universal theme patcher windows 10 64 bit, universal theme patcher windows xp, universal theme patcher 32 bit download, universal theme patcher windows 7 download, universal theme patcher windows 7 x86
