2 COMPARE DEALS We've got a lot of things that can and should be done about cigarette smell, but unfortunately, at least when it comes to e-cigarettes, if you try to do them all, you're liable to end up with e-cigarettes that are far too big, too short or too expensive. Before you invest in any of these, it's best to consider these questions: What kind of e-cig do I want? What do I need it for? Am I a beginner? The kind of e-cigarette you'll want depends on your needs and your budget, and there are e-cigs that can do so much more than just offer the nicotine that you're seeking. If you want a device that can help you quit smoking, you're going to want to get a device that will help you avoid coughing, puffing and breath issues. Then, you're going to want to find a device that can keep you from needing to vape through a lot of e-liquid, so you'll be able to use less nicotine over the course of the day. Finally, you're going to want to find a device that can offer you the ability to take deep breaths and the ability to move without having to think about breathing through your mouth at the same time. As you consider the kind of e-cig you want to invest in, think about what's important to you. Are you looking for a device that's discreet? If so, how discreet do you want to be? Are you looking for a device that you can easily refill without spending a lot of money on a few cartridges? If so, how easily do you want to refill? Are you looking for a device that offers a clean and quiet vaping experience? If so, how important is that to you? Are you looking for a device that offers you the chance to use advanced features like temperature control? 520fdb1ae7
