VOXX LIFE

POWERED BY VOXX HPT™

THE NEW FRONTIER OF NEURO TECH

BETTER BRAIN PERFORMANCE CAN PROVIDE THESE BENEFITS:

1) Healthier and Safer Employees, Athletes and Families
2) Faster Reaction Times and Improved Athletic Performance for Athletes
3) Less Physical and Mental Fatigue for Employees, Athletes and Families
4) Reduce Chances of Injury While Also Reducing Recovery Times if Injuries do Occur
5) Happier Employees, Teams and Families
6) Increased Revenues with Significant Reoccurring Savings Potential
7) More Alert and Productive Employees
8) Improved Information Processing Speeds for Employees
9) Better Sleep, Energy and Endurance
10) Pain Relief and Overall Better Quality of Life

TOP 5 REASONS WHY VOXX HPT IS A NO-BRAINER

1) **Technology is Groundbreaking – ONLY** known technology to enhance brain function by 30-40% within 7 seconds on avg.
2) **Research is Credible – Instant. Proven. Tested.** Works **100%** of the time neurologically. (Proven w/ over 3,000+ positive brain maps)
3) **Testimonials and Stories are Endless – 40,000+** unpaid testimonials on social media.
4) **Affordable –** Improve your **"Brain Performance"** for an avg of $30-$50.
5) **No Risk to Experience Voxx HPT** – **30 Day Money Back Guarantee.**

HOW VOXXLIFE WAS CREATED

Jay Dhaliwal President, CEO

- Starts with a young boy with a deep burning desire to help his mother who was diagnosed with MS at an early age.
- Career in Data Encryption. Brilliant Inventor & Highly Favored Successful Entrepreneur.
- Devoted 10 years to the development and research of VOXX HPT technology for achieving homeostasis in the brain and body through Neurostimulation.

The VOXX HPT Neuro-Path to Wellness and Performance

1. VOXX HPT triggers a very precise neuro-response in receptors on the bottom of the feet and other areas of the body.
2. Sensory Division of the PNS brings information from the receptors to the Brain Stem and CNS.
3. Brain Stem and CNS process, integrate and distribute information and commands based on the information from receptors.
4. The PNS carries commands from the CNS and Brain Stem to the SoNS and ANS triggering control and responses in various functions.
5. Commands to the SoNS and ANS have direct impact on:
   - Vestibular System
   - Balance
   - Spatial Orientation
   - Proprioception
   - Respiratory Control
   - Motor Control, Posture
   - Heart Rate Regulation
   - Skeletal Muscles Control
   - Flight or Fight
   - Reaction Time
   - Pain Regulation
6. User sees Improvements in Balance, Stability, Power, Stamina, Reaction Time, Pain Relief, Energy, Recovery Time, Posture.

CENTRAL NERVOUS SYSTEM

The central nervous system (CNS) consists of the brain and spinal cord and is responsible for integrating, processing, and coordinating sensory data and motor commands.

3

BRAIN STEM

The Brain Stem is composed of the Mid-Brain, Pons, Medulla and Reticular Formation.

The brainstem plays a role in conduction. That is, all information relayed from the Peripheral Nervous System to the cerebrum and cerebellum (CNS) and vice versa must traverse the brainstem. The brainstem has integrative functions being involved in cardiovascular system control, respiratory control, pain sensitivity control, alertness, awareness, and consciousness.

These areas of the brain and the numerous associated nuclei within assist and control the many functions of the autonomic and somatic systems such as the vestibular system, balance, spatial orientation, proprioception, respiratory control, posture, heart rate regulation, skeletal muscles control, flight or fight, reaction time, and pain regulation.

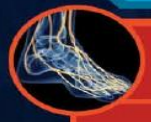
Information processing includes the integration and distribution of information in the CNS and Brain Stem.

PERIPHERAL NERVOUS SYSTEM

The peripheral nervous system (PNS) includes all the neural tissue outside the CNS.

2

The sensory division of the PNS brings information to the Brainstem/ CNS from receptors in peripheral tissues and organs.



Somatic sensory receptors provide position, touch, pressure, pain, and temperature sensations.

Special sensory receptors provide sensations of smell, taste, vision, balance, and hearing.

Visceral sensory receptors monitor internal organs.

Receptors are sensory structures that detect changes in the internal or external environment.

4

The motor division of the PNS carries motor commands from the CNS/ Brain Stem to peripheral tissues and systems.

The somatic nervous system (SoNS) controls skeletal muscle contractions.

The autonomic nervous system (ANS) provides automatic regulation of smooth muscle, cardiac muscle, glands, and adipose tissue.

Brain Mapping Study with VOXX HPT

- This study seeks to demonstrate the relationship between brain function and VOXXLIFE Human Performance Technology (HPT).

- Participants will take part in surveys, balance and stability testing, brain mapping sessions and application of VOXXLIFE Human Performance Technology to further understand this relationship.

QEEG Brain Mapping = GOLD Standard for Brain Neurology

Records 19 Channels Simultaneously! Builds a 3D Neurological Image down to a Voxel in size. (5mm x 5mm x 5mm)

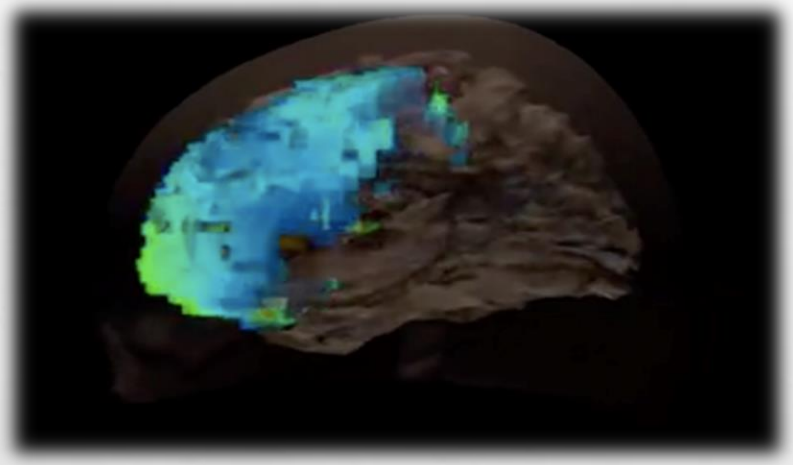
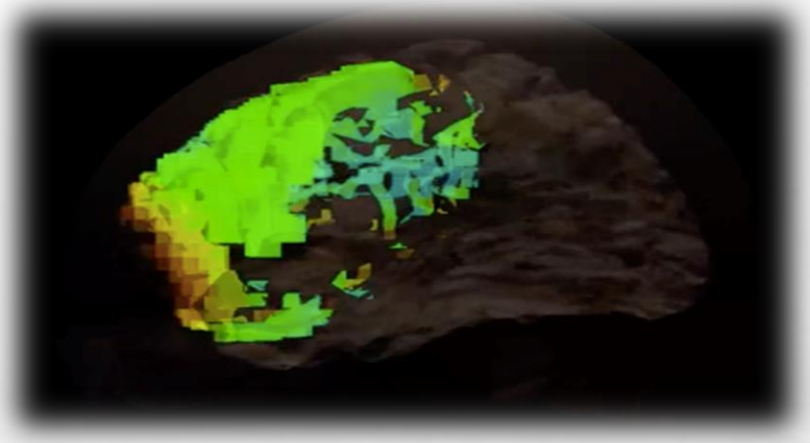
ENHANCED BRAIN FUNCTION

Before – Without Voxx HPT



Blue = Inattention, poor decisions, cognitive decline

After – With Voxx HPT



Green = Improved attention, better decisions, improved cognitive function

Better cognitive abilities proven in ongoing brain mapping studies

- Average 36% positive change from before and after maps
- 100% of participants positively impacted overall
- Improved decision making, reaction time, mental stamina, communication and emotional quotient

Voxx HPT Testimonial

"As a strength coach, I work with athletes in a variety of sports from amateur to professional. Although I've tested numerous products over the years, I've never witnessed anything like Voxx HPT. In my testing with athletes, I'm experiencing improvements in range of motion, balance, vertical/linear increases, and overall stability. This tech is the missing piece to the puzzle for any athlete looking to be at their best on and off the field."

VOXXLIFE

Voxx HPT Testimonial

"As a former NHL player of 15 seasons and avid golfer, I fully realize the importance of balance, stability and recovery time. After suffering a massive stroke in 2015, Voxx HPT has been an exciting discovery with my road to recovery and active lifestyle. Since I started wearing Voxx Human Performance Technology, I have noticed more endurance and less soreness when skating on the ice. With my golf game, I have much better balance, it's been easier gripping the club and I'm hitting the ball much straighter. Voxx HPT is helping me do the things I love better and I would recommend Voxx HPT to anyone wanting to improve their "Brain Performance" and take their game and/or lifestyle to a whole new level."

Brian Propp, Philadelphia Flyers HOF, NHL Left Winger and Avid Golfer

Our World is in Desperate Need of Healing

$6.5 Trillion is spent on Global Healthcare every year

- World Health Organization

If $6.5 Trillion were spent each year on...

- **The Transportation System** - we could pave a road around the world 2509 times a year.
- **The Education System** - more than 85% of the entire U.S. population could go to a private college every year for free.

What is our BIGGEST Drug Problem?

" The biggest and fastest growing part of America's drug problem is prescription drug abuse"

- National Institute on Drug Abuse

" The number of overdose deaths from pain killers more than tripled from 1999 to 2006"

- Pharmacoepidemiology & Drug Safety

" The truth is that preschool aged children are the fastest growing age group being prescribed anti-depressants."
