

Introducing BlueSea™ Prebiotics

The Future of Gut Health is Grown in Maine.

The Ocean's Answer to Modern Gut Health

Consumers are demanding more than just sustainability—they want functional nutrition that works. **BlueSea™ Prebiotics** by Springtide Seaweed merges the pristine power of Maine's cold waters with cutting-edge nutritional science.

By combining our USDA Organic, farm-grown **Alaria Esculenta** with antioxidant-rich **Organic Blueberries**, we have created a prebiotic powerhouse designed to nourish the microbiome, support immunity, and deliver research-backed anti-cancer properties.

The BlueSea™ Product Line

1. BlueSea™ Prebiotic Powder

- **Format:** Fine, soluble powder blend with organic psyllium.
- **Flavor Profile:** Earthy umami balanced with tart, natural blueberry sweetness.
- **Application:** Blend in water or juice, smoothies, functional beverages, yogurt toppings, or oatmeal integration.
- **Key Benefit:** Delivers a concentrated dose of prebiotic fiber and marine minerals in a single scoop.

2. BlueSea™ Prebiotic Jellies

- **Format:** Convenient, chewable nutrient delivery.
- **Application:** Daily wellness routine, on-the-go nutrition.
- **Key Benefit:** An accessible, family-friendly way to integrate seaweed superfoods into a daily diet without preparation.

Why Springtide? The "Solar-Dried" Difference

Most commercial seaweed is blanched or frozen, processes that can degrade delicate water-soluble vitamins and bioactive compounds. **We do it differently.**

- **100% Solar Dried:** We utilize a low-carbon, passive solar drying method that locks in maximum nutrient density and enzymatic activity.
- **Fully Integrated:** We don't just buy seaweed; we grow it. From our nursery to our farm in Frenchman Bay, Maine, to the final package, we control every step of the quality chain.

- **USDA Certified Organic:** We hold the distinction of being the largest USDA Organic Certified seaweed farm in North America.

"We don't just farm seaweed; we cultivate an ecosystem. Our BlueSea line is the direct result of regenerative ocean farming meeting functional food science."

— Sarah Redmond, Founder & Marine Botanist

Functional Benefits Breakdown

Feature	Consumer Benefit
Alaria Esculenta (Winged Kelp)	Rich in prebiotic fibers (fucoidans and alginates) that feed beneficial gut bacteria.
Maine Blueberries	High antioxidant load (anthocyanins) known to reduce oxidative stress.
Synergistic Blend	Research suggests the combination of specific seaweed compounds and berry antioxidants may offer enhanced anti-cancer properties.*
Mineral Dense	A natural source of Iodine, Magnesium, and Calcium often missing in modern soils.

Wholesale & Retail Specifications

- **Sourcing:** Sustainably farmed in Frenchman Bay, Maine.
- **Processing:** Solar-dried, raw (never heated above 105°F/40°C), no additives.
- **Certifications:** USDA Organic, Maine Grown.
