Making toward the end of the first millennium of our era, Beowulf is the grand narrative of the adventures of Beowulf, a Scandinavian hero who delivers danes from the seemingly unstoppable monster Grendel and, later, from Grendel's mother. He then returns to his own land and dies in old age in a fiery battle against a dragon. Poetry is about facing monstrous, defeating it, and then tried to stay on later. In the outline of this story, once remotely and supermaturally familiar at the end of the twentieth century, Seamus Heini receives an echo that summons the verse to power from deep beneath its surface. In what he called the four squareness of narration in Beowulf and is ready for his immense emotional credibility, Heaney gives these epic qualities new and tangible reality to the contemporary reader. ••• The library is no different from citing the image by Betson from books &lt;a href=" " &gt;Fotolia.com&lt;a&gt;citing any other verse in beowulf Modern Language Association (MLA) format.
