If the answer is yes, then quickly download the FunimationNow app to your phone immediately. It is a film application from developer Funimation Productions, LTD. It seems that anyone who hears the name Anime will believe that this company is located in Japan. But actually, this company is based in Texas, USA. This app is really famous for owning many different versions on both online web, PC applications, and both Android and Apple TV TV. And now time to collapse anime world in your phone. Anime Anime Anywhere you can watch Anime anytime, anywhere, anywhere. What makes Funimation different from the rest of the movie apps is the app that gives you a significant store of Anime movies. The movies on this app are completely in this category; there is no other genre. Therefore, each newly released movie title will be uploaded to this program immediately. The refresh time is fast. Each episode has subtitles updated with the English language. Even many films have English expressions after a concise time. Features This is a simple anime viewer, so the features that focus on the user experience are the main search, smart suggestions The application has a simple interface, user friendly. The homepage displays slides with a hot movie title at your first glance. These will be the titles that attract a lot of viewers. So if you're walking around looking for a few movies that suit you, don't forget to take a look here. Each slide displays the name of each video below. Descriptions will also be written under the title of the film. This allows you to get a general look at each of the different movies, helping you visualize the overall content of the movie. You will quickly learn if this movie is right for you. And if you've found the movie you want to watch, or if you want to see if the movie you like has been launched in the app, click the search button and type a few words. The search button is located quite substantially in the right corner of the screen, looking very comfortable and friendly. Above is the logo, and the name of the application. Just below are a lot of different playlists. Marathonning/Auto-play The first list is the titles you see. The time you have seen is saved in the program. When you click on it, the episode will resume from the moment you leave. There's another important playlist: My lineup. This will be the location of the movies you've added to the queue. If both of these playlists have names you can no longer like, or just because you accidentally added them, it's very simple to remove them from the playlist. By clicking the edit button, each movie title appears as the corresponding (-) in the image. To delete, just click (-). Subtitle & Cast Funimation Now is a film application with a large movie store with a number of thousand titles. And of course they're completely free. If you feel annoyed when you are always interrupted by ads, this app is not like that. There won't be anything to bother you on top anymore. You can enjoy watching without having to skip the ad too much again. What a big plus for this application. If you don't know any Japanese at all, the titles will have subtitles in English. In addition, the English dub will be available after a short time from the time of the film premiere. In addition to regular search, users can search further using to filter results. Sort by start date or by genre. In this program, in addition to watching online, users can download movies to carry anywhere, watch at any time. Or, you can continue to watch online as soon as you connect to the network and log on to any device because the software syncs automatically so you can account for data. Another option is Chromecast. If you already know this feature, it has also upgraded and brought this feature recently to users. If you don't know, TVs or TV boxes that support Chromecast will receive your order by pressing this button. Then your unfinished movie will be shown on TV immediately. It's convenient, isn't it? It's Anime - Anytime - Anywhere by Funimation Now. MOD Info? Ads removed ads during video-play disabled Analytics Disabled Note: VPN is required to use Funimation as it is area restricted.
