With this software, you can add music to your slide show, create stunning animated backgrounds, add custom images and much more. Whether you are interested in learning or creating flash, you will get everything you need in one handy application. Create slide shows or photo albums from digital files, video or webcam. The software is extremely easy to use, with a step-by-step wizard-style interface that guides you through the creation of your slideshow.[Evaluation of a short questionnaire for the identification of unhealthy eating habits and daily energy intake in the population of Bogotá]. To analyze the performance of a short questionnaire, the AUDIE (in Spanish) against a dietary history (DH), for the identification of unhealthy eating habits and daily energy intake in the population of Bogotá. It was carried out a cross-sectional study, representative of the population of Bogotá, in which a total of 274 subjects, not treated with medications, were enrolled. Data collection was performed using a web-based questionnaire, including socio-demographic data, a modified version of the AUDIE, and a DH with 24-hour recalls. Logistic regression and AUC (area under the ROC curve) were calculated. It was found that age and BMI were associated with most of the unhealthy eating habits identified by AUDIE. While it showed a better performance than a DH, the AUDIE and BMI showed an optimal performance when both variables were analyzed together, which would facilitate clinical application.Q: Unable to connect to mongodb from python script I've got a python script in which I'm trying to access to mongo db. I've tried it in several ways: 1) 2) ip:27017 3) docker container 4) 127.0.0.1:27017 The script works fine from local machine, but when I try to execute it from the other machines the script fails every time. The error I'm getting is: Unable to connect to the server 127.0.0.1:27017 I think the problem is coming from the configuration of my mongo db, since it works fine from localhost. The db is already created. The mongod version is 3.0 A: In your Python script, add the following line at the top: import pymongo Then make sure you have the appropriate modules installed and 520fdb1ae7
