Cooking fever gems cheat ipad

Edit Comments Share The Free Gem Glitch was a glitch that allows players to get free gems. It worked on all platforms. However, since the update, this error has been patched. Disclaimer: If you attempt this glitch today, your day's 7+ (900 gold 2 beads) reward will be returned to day 1 (400 gold 0 beads) and it will take up to 7 real-life days to get back to where you were. Use old disturbances at your own risk, we will not take responsibility for the potential loss of up to 12-14 gems (than you would normally get by logging in daily, normally, without cheating.) Instructions for historical and entertainment purposes only: Disconnect the device from the Internet. Go to the game and leave. Turn off all automatic time and date settings Change the date by 1 day Enter the game to receive a reward for logging in two days in a row. Fill this out until you reach the premium of 900 coins, 2 jewels. Keep moving forward in one day until you have as many pearls as you want. If you just want jewels, don't want or need coins, there is another method. Complete steps 1 through 3 above Instead of promoting time by one day, change it by a month. Start the game and I'll give you 5 pearls. Repeat until you have as many jewels as you like. Community content is available through CC-BY-SA, unless otherwise stated. Return to cooking fever – Ultimate Strategy GuideHow To Get More Cooking Fever GemsCoins and gems (some call these diamonds) are earned during the game. Coins are pretty easy to get when you have several restaurants open, but cooking fever jewels seem to come much slower. This can be very frustrating, especially when you are still at the beginning of the game when only 2 or 3 restaurants are open. The internet is full of websites claiming to be scammers or hacks to get unlimited free gems. The developers fixed a scam that was previously in play and you cannot install secure hacks; you should know that you may potentially download any virus or malware to your device. Of course, you can buy gemstones directly from Google Play. It's the only real way to cheat and the only way the developers of this great game make money. But if you want to try to play without spending your own money, there are still ways to collect enough gems. Return to the game daily for your welcome back reward; After day 7 you get 2 beads a day for consecutive games. (XP = experience points that appear in the upper-right corner of the screen); Every time you progress to a higher level of experience, you get coins and jewels. You will initially get 2 beads and a maximum of 7 beads per level. Try raising your XP level at least once a day. Click here to learn more about experience points. Play the casino right away after claiming the Daily Daily restaurants; place \$500 bets until you get 15 beads. Thanks to Duo Kom'Ca, we now know that you can win 15 beads twice a day (every 12 hours to be exact) at the casino. You need 5,000-25,000 coins to hit 15 gems in the morning (it seems to average about 18,000 coins) and 25,000-80,000 hits 15 gems in the evening (the average seems to be about 55,000 coins). It is harder to earn 15 gems on days when the game offers discounted prices to buy gems or other specialties. The casino will become available at XP level 7.If you combine this strategy, you may earn up to 39 beads a day (2 for return, 7 xp levels and 30 casinos – if you play exactly every 12 hours). We only play the casino twice a day if the number of gems is very low because it takes a large number of coins twice a day to play the casino. We usually only play the casino once a day and play the restaurant until we progress at our XP level, which gives us 24 gems a day. If you're just starting a game, you've got fewer than 15 XP and only a handful of restaurants, you save a lot of frustration and just focus on getting 2 daily gems to open and play the game so you can add XP at least twice a day. You can get almost as many gems by adding XP (and get more coins) than if you use all your coins to try to win gemstones at the casino. Playing casino is better saved when you have a lot of coins to lose (20,000+).
