In this new edition, Peter Sandner presents the latest Revit Architecture version in a step-by-step tutorial, in addition to the architectural drawing, coordination, and modelling activities most of the user community needs. The main emphasis is on in-depth analysis and the practical use of the latest Revit Architecture features in their proper sequence. The author has focused on creating an architecture workflow where models are created step-by-step. Readers are provided with helpful tips on how to work with the numerous and important tools available in Revit Architecture. In addition to the lessons, readers will find a

comprehensive reference list and a detailed list of architectural features and tools. ****Publisher's note:**** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations. We are grateful to the hundreds of readers who have sent emails asking us to revise the book. We hope this edition will answer all your questions and provide the most comprehensive coverage of the latest Revit Architecture version. We thank David Tipple, Jürgen Gerlich and the other members of the Revit Architecture team for supporting us in developing the book. We would also like to thank our editors, Ingo Marx and Susanne Mettler, for their diligent support. Last but not least, we are grateful to Simone Steinhart, our Revit Architecture teacher, for his support of our efforts and ideas for the book and our team at Springer, especially Timo Oetken, Elisa Gross, Sophie Röder, Katie O'Donnell, Sylvia Reichert, and Anne Chenard. The author declares no competing financial interests. Peter Sandner is an experienced Revit architect and programmer who has been using Revit for more than 10 years. During his career he has worked in numerous projects as a designer, programmer, and project manager 520fdb1ae7
