You are looking for a hidden spy camera that Easy to record videos and take pictures without noticing it? If so, I have a solution here for you. In this article I'll introduce you to a mini spy camera camera capable of recording high-quality videos. AOBO spy camera is one of your best options if you are looking for a highly efficient spy camera. Read together for a full review of the AOBO camera and instructions on how to use it. What is an AOBO spy camera? If you think that spy cameras are only in spy movies, you are absolutely wrong. In fact, there are a number of spy cameras in different shapes and sizes that you can buy directly from Amazon or eBay, and they actually work great! You can even find a spy camera that looks just like a pen and order it right away. But what I'm going to offer you here today is one of the best hidden cameras that you can find on the market. AOBO spy camera is a miniature portable camera that works on WiFi and comes with a built-in battery. If you want to record without being noticed and no one noticing, you need to choose a camera that is as little as possible. The AOBO camera does its best to hide in different situations and this can be a great option for your spying needs in different places. AOBO Spy Camera review features one of the key features of this WiFi spy camera connection. This camera will connect to your smartphone via the SIPC app, and once the connection is installed, you can watch the video live. The hidden AOBO 1080p spy camera is compatible with PCs, Android and IOS. It can also connect 4 cameras at a time to be able to view live video between 4 cameras. This spy camera has a lens of less than 0.31 inches, which is suitable for both internal and outdoor recording purposes. Another amazing feature of the AOBO spy camera is the motion detection feature. When movement is detected in an environment where the camera is installed, the camera takes a photo and sends a push notification to your mobile phone. It also comes with a high capacity of 4000mAh polymer lithium battery, which you can recharge while recording. You can watch both photos and video from the camera in real time, directly connecting the camera to your smartphone or PC. Highlights: Video Resolution: 1080*720/640*480 Video Coding: H.264 Video Frame Rate: 15FPS/30FPS Sensor: CMOS Memory: TransFlash (TF) Maps, Expandable to 128GB supported OS: Windows, IOS, Android Battery: Rechargeable 4000mAh polymer high-capacity lithium battery AOBO spy camera guide As I mentioned earlier, AOBO Hidden Spy Camera supports Window PC, Android and IOS. It is capable of recording both sounds and images. In order to get started with this great spy camera, you first need to install a SIPC on your phone or computer. After that and as long as you're in WiFi you can watch the video live. And when you're not connected to WiFi, the camera will record video storage it on its SD card. Note: This camera does not come on an SD card. You have to buy one if you want. Here are the steps you need to take in order to start watching video: Download the SIPC app on your mobile phone Turn on the camera by plugging your mobile phone to the camera via WiFi Hotspot Video Watching Live on your mobile phone Why do you need to use a spy camera? There are various reasons why someone would want to use a spy camera and of course it is not always with evil intentions. Here are some of the different cases in which an AOBO spy camera can help you. Nanny Camera If your nanny takes care of your children, it is always a good idea to have an electronic camera installed in your home. This will allow you to easily check how your nanny behaves and what your kids are doing. Home security camera When a burglar breaks into the house, they usually disable or cover the security cameras. However, if you use a tiny spy camera, you can keep your security camera from the eye of the robber. In addition, the AOBO spy camera motion detection feature is an excellent feature to secure your home and be notified of suspicious activity in your home when you're on your way. Spy cameras In addition to security purposes, the spy camera can be used for espionage purposes. This means that if you want the surrounding sound or VCR to spy on someone or, for example, to find the truth about your relationship, you can use the spy camera for live video. Video.
