It's totally free to use. How do I clean up battery life? Many third-party apps claim that they can save the phone's battery, but what makes Purify stand out? Cleaning the SaverPurify Battery Saver Smart Save battery determines battery life and adjusts battery-consuming settings, such as screen brightness, accordingly. You can also manually switch from Save mode to Super Save when your phone's battery is rapidly depleting. In addition, we've programmed a full set of rules to manage which apps and when they should be discontinued to fully optimize battery life. These rules are stored in the cloud and are frequently updated to meet the requirements of each individual user. How do I know if my phone is being optimized? On the Purify dashboard, we provide a mobile rating to indicate your phone's performance. If your mobile account is too low, you can click on one click to see the improvements instantly. Also, if you're tired of pressing a button with one click from time to time, you can turn on Auto Purify under the settings, and Purify will still run in the background, stopping apps when you need to. What other benefits do I have when using Purify? Purify Apk can help you archive all your notifications in batches, making your bar notifications look organized and tidy. Try to clean up today to optimize your Android phone, save the battery, speed up your android and remove unwanted viruses. If you have any feedback, please feel free to leave us a comment. This app uses accessibility services. The Accessibility Service's permission allows you to automatically clean background processes and archive notifications from the notification bar. There are plenty of good uses and practices of the device to consume less energy, but there are things we can't do. Fortunately, clean it up. Increased battery life thanks to root features this app is designed to increase battery life, but with features that require root, so that it gets further than other alternatives like CCleaner. Basically, this removes the applications and processes that we open and that prevent the consumption of devices. Well, you can customize the white list of apps that we don't want to be closed in the process. However, this is where we enter the superuser field and also offers us the ability to remove viruses that are all of these applications that come preinstalled and that, even being a bit, also consume battery life. The app can delete them just like other files and the rest of the junk that is stored in the terminal itself. Terminal.
