Sekret machines book 2

Secretions Machines: Book 2 - Fire under Author Tom DeLonge A. J. Hartley Language English Published September 18, 2018 Publisher To the Stars Pages 688 ISBN 978-1943272341 Preceded by Creret Machines: Book 1 - Chasing Shadows Secret Machines: Book 2 - A Fire Within is a sci-fi thriller novel based on real events created by Tom DeLong, American musician, former co-lead singer and guitarist blink-182 and currently Angels & Airwaves and British-American novelist A. J. Hartley. The first edition was published through DeLonge's To the Stars on September 18, 2018. [1] This is the second novel in the fictional series Secret machines after secretions machines: Book 1 – Chasing Shadows from 2016 and the third book in a wider series after the non-fiction novel Secret machines: Gods from 2017. Background Since Chasing Shadows focused on hardware and machines, its continuation of Fire within focuses on themes of consciousness and the human mind. Co-author Hartley said Book One focused primarily on the machines themselves-hardware, if you like-but in the second installment of the series we push the story into a gray area between normal and paranormal in a clearer human terms, exploring the idea that as technology could make exponential evolutionary progress, so would humans themselves. The result continues with the story of the first novel, which builds on where it left off, but shifts the tonality of the narrative into new territory, new adventures and new secretions. [2] [3] To promote the book, To the Stars has released a digital copy of the first three chapters of A Fire Within download. [3] The synopsis A Fire Within continues the story of Jennifer, Timika, Alan and Barry from Chasing Shadows. After being chased by a powerful company, Barry and Alan explore Dreamland while Timika and Jennifer track down an ancient tablet. As with the previous novel in Chasing Shadows, the story is a work of fiction loosely based on real stories obtained by DeLonge through top military and intelligence officials. [2] Reception A Fire Within was generally met with positive reviews from critics. Duke Brickhouse of ExoNews said: No wonder such a accomplished writer as A.J. Hartley, USA Today and the New York Times bestselling author of adventure books aimed at young adults, would create another highly regarded novel. What is surprising is the depth of information that the story conveys, which world is only now on the verge of perception. [4] In a Bookwormex review, the author wrote: Finally, Secret machines book 2: Fire Within is a nice science-fiction work, and while it might be a cookie-cutter and even average in some segments, overall I find it an engaging and fast story with the ability to push me to think of myself. If you have read the first book in the series and this, I believe you will also be quite happy with this second ... especially if you felt that book one was moving too slowly. By placing an order, you agree to be responsible and to pay all these fees if they are due. Packages can take 7-10 business days (or more depending on customs) to reach their final destination. Tom DeLonge - an award-winning creator and accomplished researcher who made history by publishing the first official UFO military record to go through the process of declassifying the US government - and New York Times bestselling author A.J. Hartley continues his thrilling Sekret Machines pose about archaeological adventure, government conspiracy, historical mystery and unimaginable technology with Secret Machines Book 2: A Fire Within. They've seen what's beyond the bounds of possibility. Lights floating in nevada's desert night sky in smooth and fast motions that are impossible even for the most technologically advanced aircraft. They met those responsible for the inexplicable. Men in black suits, white lab coats and military uniforms who don't want their secrets revealed. Brought together by fate - or phenomena - heires Jennifer Quinn, journalist timika Mars, pilot Alan Young, and ex-Marine Barry Regis are linked to incidents they've witnessed, hunted down agents of a wealthy corporate cabal desperate for unimaginable power, and have extraordinary abilities they don't understand, let alone control. Now they're on their own mission. As Alan and Barry test the limits of their strange gifts inside a military complex known as Dreamland, Jennifer and Timika begin searching for an ancient tablet that may contain answers to humanity's biggest question. Are we alone in the universe? Based on the accounts of trusted UAP observers drawn from professional sources within the scientific, military and intelligence communities, Secret Machines: A Fire Within is a second fiction book as part of a multimedia project most ambitious examination of this phenomenon in history. Fire Within is the second novel, Secret Machines, which connects the line between alien conspiracy theories and science fiction storytelling. The second story continues largely exactly where the first ends, with a team of Timika (Debunktion website journalist) Jessica (a wealthy English woman whose father's wealth was invested in the villains of the company), Barry and Alan (both ex Marines and now CIA agents) who have just signed confidentiality agreements after a strange event at the climax of Fire Within's 2nd Secret Machines novel that interseaves the line between alien conspiracy theories and sci-fi storytelling. The second story continues pretty much exactly where the first ends, with a team of Timika (Debunktion website journalist) Jessica (a wealthy English woman whose father's wealth was invested in the villains of the company), Barry and Alan (both ex Marines and now CIA agents) having just signed confidentiality agreements after a strange event at the top of the first book, and now wonders what best to do with themselves now. After a series of strange events, Alan and Barry decide to return to Dreamland (area 51) because... Well, let's be honest, what else would they do? Jessica is being forgivens for disconnecting all her funds from an evil corporation and discovers from Timika that somewhere there may be a second mystical and ancient stone slab. She offers to fund Timika as she goes on an adventure to find a tablet while Jessica returns home to try and shed some light on the secrets of her father's involvement with the bad guys. I absolutely couldn't stop reading this book, and was keen to turn the page for all 671 of them. The story focuses less on the unusual alien inspired ships from the first novel, even if they get a lot of story time, and instead focuses on the unusual and unique bond that forms between our familiar cast plus a few new characters. What happened to them in the first story? What gave them this unique insight into each other's consciousness? Strange abilities, locations, spaceships and races, plus a plot involving a known enemy are all thrown into a plot, chapters are arranged according to character terms, something I really like and makes the story so much easier to follow. Flashing backpoints in history (characterized by a different font – it's simple stuff...) show it's definitely not the first time strange things have happened to humanity. Are they all related? Stories converge in one epic conclusion... and then all of a sudden, it was over, in a bit against the climax. I have no doubt that it leaves the door open for another Novel Secret machines, and I've been given the thumbs up that it will come sooner rather than later. There's a bit of repetition, especially who does a hell of a lot of speculating about his own situation, which sometimes feels like a filler, but aside from this story converge in a satisfying way and I was eager to get to the end and find out what would happen, especially with the new character, archaeologist Nicholas Tan. Tom DeLonge's imagination and A.J. Hartley's writing really worked very well together, and I was happy with another excellent story from the media to The Stars. You can feel the influences from the likes of Bladerunner, Contact and 2001: A space odyssey all pousing your noses, which isn't a bad thing – if you need influences for science fiction, be influenced by the best, right? A fabulous and exciting story that I thoroughly recommend to all sci-fi fans. ... More... More
