January 8, 2020For such a small camera, this thing is super quality. In the box you get a mount with a clip for the camera. You plug the cord into your lighter vehicles and when you start your car it automatically starts recording. How easy is that? You also get a charging cord and cord to connect to the TV to watch what you recorded directly with the camera. You also get an SD card! I've not seen another company that supplies sd cards eith their products. That's amazing! I am very pleased with the quality and functionality of this camera. It even records in the dark with built-in infrared lighting. This review was collected as part of the campaign. The author is a worldandmain.com client. Helpful? January 10, 2020This the perfect camara 1080p mini dash cam is great, resolution is so good that it's a small camera that you can put it anywhere. The camera comes with a holder, making it easier. It even comes with its own 8GB memory stick. This review was collected as part of the campaign. The author is a worldandmain.com client. Helpful? April 26, 2020 Just bought today a big picture and sound! Helpful? January 17, 2020Im surprised that generosity still exists! This dash cam is actually very small and lightweight. But the image quality is not sharp enough for a dash cam. I don't think you can see the license plate at night with this quality. But that's good enough if you want to use it as a babysitter camera. This review was collected as part of the campaign. The author is a worldandmain.com client. Helpful? April 26, 2020S: - Cheap, less than \$20 - Small, placed in your pocket - clip easy With Windshield Mount - Easy Cons: - Low Resolution Video, Only 1.3 MP - No Night Vision, although manufacturer claims otherwise - No motion sensing, although manufacturer claims claims - A little difficult to change the time and date stamp, you have to edit the text file - The time stamp can not be removed - No easy way to change the settings, you have to remember the click of a button - Uses memory fast! Helpful? March 11, 2020Working perfectly if you want a cockpit recorder. Do not record videos and several movies say they are damaged and unplayable. Its cheap for a reason. Save to buy one that will cost your time. Helpful? I like the size and the price. Down side there is no display, so you really don't know what the camera is doing. I had a camera installed as a dash cam in my SUV for a month as a cheap replacement for my Uniden. I pulled it out and checked what he recorded. He didn't write anything down. Thus, reliability is negative. It is necessary to feed from the socket, which is switched on or off with ignition. The mountains are free, no puffs. The picture is fair, but as far as the video, FPS is pretty bad. I would like to drop this as a serious solution for video recording and will look at the best quality camera. Your \$5 better go to a better more reliable camera. LikesDislikesBattery lifeUser friendlinessFor videoSoundFor imageReceme use? May 21, 2020Works as a cheap camera normally clearance. I have a version of CopCam of this camera and it works great. I bought this one because it was on clearance for almost half the price of a CopCam. Followed the T instructions, and that's crap. The instructions are poorly worded and very confusing. The writer probably did not understand English. You're lucky if it records any video at all, nevermind file-damaged message (which most videos that actually record). I tried different micro SD cards and spent more time formatting and playing with this stupid thing than actually recording. The only good thing about this is that now I have a sucking cup of grief for my CopCam. Spend some extra money and buy a CopCam atomic beam. This one actually works and is easy to use. I hate this thing ... Helpful? June 23, 2020 Don't buy! I bought on clarity, still wasted money. Switching modes is diffult because you need to remember the buttons, there is no way to confirm that you are in the mode you want. Some files don't play tank. I bought a reason I wanted a motion detection feature. ONLY RECORDS IN 1 SECOND! Useless. Helpful? February 12, 2020 Recording 1min and 25sec video then stops, but the sound continues, some videos do not work and says that the video is damaged. I followed all the instructions and still didn't work as well. The video plays very quickly as if you are going too fast. It is impossible to set a time. needs some work. Helpful? It's working.
