Mu-2b-60 pilot's operating manual

Mu-2b-60. Mu-2 flight manual. Mu-2b-60 aircraft. Mu-2b-60 maintenance manual.

The Mitsubishi MU-2B-30 is covered in a comprehensive 587-page document consisting of the Manufacturer's Airplane Flight Manual and Pilot's Operating Manual, both written in English. This extensive manual has undergone revisions to ensure accuracy and safety. Additionally, two manufacturer's brochures for the MU-2 and MU-2F are available, each containing around 12-16 pages in the English language. For those interested in accessing further information, a downloadable PDF version of the Mitsubishi MU-2B-60 Marquise Pilot's Operating Manual is provided. It is essential to note that any references made to specific commercial products within this documentation do not imply endorsement or affiliation with the manufacturers or suppliers involved. This is the Pilot's Operating Manual for the MU-2B-60 aircraft, specifically applicable to serial numbers ranging from 700SA to 799SA and 1501SA to 1569SA. The manual consists of 675 pages in its original issue dated September 1, 1978, with subsequent reissues on August 23, 1985, and a revision date of July 15, 2004. It can be purchased without needing a PayPal account, simply using a credit card. Once paid, the manual will be instantly available for download in PDF format, not a printed version.
