Children's Ambulant Toilet

Identified Design Issue

The space will be less than detailed in AS 1428.1 and the grabrail height will be lower.

Departure from Deemed-to-Satisfy Provisions

The users of the toilet will be small children, and the fixtures and fittings will not be functionally suitable if installed using an AS 1428.1 design solution.

The Performance Solution

The solution offers greater flexibility by considering that small children will be the primary users of the toilet. This enhances accessibility, as the fixtures and fittings will be appropriately designed to accommodate the needs of young children.

This example is a hypothetical scenario and must not be used for any specific project.

Assessments must be tailored for each project.
