With Box, you can safely store files in the cloud. You can also access information wherever you are at any time. This intuitive app syncs information from your desktop and phone. It is a handy tool when you are in meetings or away from your desk. With Box, you can share the necessary files with your colleagues or update documents from your mobile device. There's also the ability to view different types of files and enjoy full-screen quality. When you install Box, you get 10GB of cloud storage for free. You can add extra security to more sensitive files with file-level security controls. You can access your information and folders offline for added convenience. You can view documents and stored files using a real-time search tool. There is also an easy way to share large files with friends and colleagues. This is done through the link-sharing method. All you have to do is copy the automatically generated link and you're good to go. It's a versatile cloud storage program because you can save photos and videos too. The download speed is slow at times, but in most cases it depends on your network connection. Box is a secure, fast, and user-friendly system to manage important files wherever you are. If you have a phone, you have access to all your important information and folders at the touch of a button. Where can you run this program? This app requires Android version 5.0 and up. Is there a better alternative? No. Box is a reliable cloud storage system for Android phone users. DropBox works in a similar way, but with less space. Switching to cloud storage makes it easier to access files. Box is a safe and secure place to store your information. It's an effective tool and a top-notch folder management option while you're out of the office at any time. Should you download it? Yes. If you find yourself away from your desk and need critical information on the go, this is an effective system to use. Watch videos from the Internet from YouTube for Android. This is the official app that allows you to watch videos from the Internet directly on the Android device. YouTube works just like its web version: subscribe to channels, search videos, see recommended videos, share videos and that it also has voice search and instant search suggestions. You can also throw videos on tv, comment on videos, and also loved and disliked them and letting the world know how you feel about said video. Enjoy watching YouTube videos for Android. Check out Tom's Guide for Android information and Android Games. Also check out forums for Android. Download YouTube Music uses a huge amount of music already on the video service YouTube and creates a service that is more acceptable for listening to sound. In itself, the app is really more modified YouTube YouTube The curatorships are focused on music and video related to music, but YouTube Red is completely changing the game, turning the app into a full-fledged music streaming service, complete with offline playback and background streaming, and even a big feature of just streaming audio without video. Other images Listen to and watch music on your Android device with YouTube Music. YouTube Music is a free app for Android that not only allows you to find all the songs you are looking for, but also allows you to discover new songs. Explore the various playlists and recommendations offered by YouTube Music to fit your context, tastes and trends. This new music streaming service from YouTube has been completely reimagined. It's even easier to find the albums, singles, concerts, covers or remixes you're looking for. For example, a new feature might find a song by entering lyrics. The paid version of YouTube Music (Music Premium) offers continuous listening without advertising or downloading for offline listening through the Offline Mixtape feature.
