

Become an intern at Beyond Coffee - and help us turn even more coffee grounds into mushrooms!

Do you want to get your hands dirty for the green transition?

Then we might have the internship for you!

At Beyond Coffee, we are looking for a full-time student intern for the spring semester, starting Jan./Feb. 2018.

We make edible mushrooms (oyster mushrooms) out in coffee grounds in our mushroom factories in Copenhagen's Nordvest, in Sundholm by DR Byen and in Humlebæk in the north of Zealand.

In Beyond Coffee, we have grown oyster mushrooms in organic coffee grounds for nearly two years. The coffee grounds are collected using electric means of transportation from canteens and restaurants in Copenhagen. The mushrooms are sold to local consumers from our shop in Jægersborggade and to local restaurants. In the shop we also sell a Grow kit where people can grow their own edible mushrooms in their own coffee grounds.

We are still a young company, but are nevertheless ambitious and therefore constantly developing. We have recently expanded production with two new mushroom farms. There are always many new ideas and projects under way, all of which serve to use the city's resources and waste streams in the best possible way.

Your tasks:

The many work tasks in the company vary in nature. That's why, as an intern in Beyond Coffee, you need to be able to keep your head straight in a busy work day with both administrative and physical tasks.

Your primary work tasks will be:

- To assist in mushroom production, which includes a variety of tasks. Besides production itself, there's collecting coffee grounds, cleaning, harvesting and delivering mushrooms.
- Projects which can involve everything from process optimisation in production, changing work procedures, cooperating with socio-economic partners or something completely different depending on your educational background and qualifications
- Minding the shop and webshop: selling Grow kits, mushrooms and other products, helping customers and ad hoc tasks.
- Administration: ordering products, contact with customers and partners
- Sparring and help with developing new products, partnerships and projects

Your qualifications and background:

It is important that you are a registered student on a relevant higher education, so that the internship is part of your study.

Besides that, we imagine that you:

- Have knowledge about and/or an interest in circular economy. Our great wish and ambition to use the many resources around us in the best possible way is what drives us every single day. We hope you recognise these ambitions in yourself.
- Want to tackle the many different daily tasks, which can range from trivial ad hoc tasks, to mediation to more demanding analytical tasks.
- Are good at communicating both written and spoken either in English or Danish (or both).
- Can take initiative and create an overview.

It is an advantage if you have a B-type driver's license.

The internship in our company is unpaid. However you will get to work a place where we are, when we say we want to make the world a better place. And where we have fun doing just that!

We live in Jægersborggade 35, where we also have a little shop.

If you want to be part of the team, write a short application (max 1 page) before 20th of November and attach your CV. Then we might call you in for an interview. Interviews will be held as soon as possible after deadline.

Write to mikkel@beyondcoffee.dk and write 'Mushroom farmer' in the subject line.

We hope to hear from you!
