

SUN CITY HIKING CLUB

Since its founding in 2000, the Sun City Hiking Club in Georgetown has participated in trail projects which benefit numerous hike destinations managed by local entities. We recognize that without the natural resources available at nearby parks, preserves and greenbelts, our group outdoor adventures would not be possible.

In 2019, Hiking Club volunteers were excited to be invited by the Williamson County Parks Department to assist with trail development projects underway at the fledgling River Ranch County Park. Since then, a team of club members has worked steadily with park management on a variety of tasks. Our assignments have ranged from mapping and clearing hiking trails to assisting with enhancement projects along nature paths and in campgrounds and public areas.

*Other joint efforts with the Wilco Parks Department over the past decade have included trail projects at Twin Springs Preserve, a trail survey at Brushy Creek Regional Trail and the presentation of **Leave No Trace** classes.*

Our membership of active senior citizens is proud to support the goals of River Ranch County Park. We look forward to partnering with fellow park advocates on projects which will keep beautiful River Ranch a safe and well-maintained natural area for all outdoor lovers to enjoy.
