If you use this system, it will be interpreted as a means that you understand and agree to comply with these conditions and constitute unconditional consent to review, monitor, record, audit and take action by all authorized state and law enforcement agencies. DEA leak investigators have long been important members of DEA drug enforcement groups. Originally established shortly after the agency was founded, sabotage investigators are investigating operations involving pharmaceuticals and chemicals that produce drugs. Unlike DEA special agents who are committed to the drug business, saboteur investigators do not have law enforcement agencies, but serve primarily as investigators. Diversion of investigator jobs include performing a wide range of security, regulatory and investigative responsibilities. They conduct inspections of pharmaceutical manufacturers to ensure that the necessary safety protocols are drawn up to prevent theft, security breaches or misappropriation of materials for the production of drugs. Sabotage investigators often work in teams with special agents and agencies to initiate arrest or trial proceedings. These professionals are often crucial to achieving prosecution through expert testimony and evidence. DEA Diversion Investigator Job Job Leak Investigator Jobs Linked to The Following Duties: Checking Pharmaceutical Manufacturing and Distributing FacilitiesExmin Accounts Manufacturers, Pharmacy and Hospital for MisconductGrant DEA Permit to Issue PharmaceuticalsCond Investigation Of Thefts, Security violations or misuse of prescription drugsTestify in grand jury and litigationS provide evidence of wrongdoing by the agency attorneysCollaborate with special agents to arrest criminals in Investigate operations suspected of diverting drugsAs as to become a DEA Diversion Investigator Diversion Investigator Investigator often investigate complex pharmaceutical leak operations and must possess the cognitive abilities necessary to handle this responsibility. Although these positions do not necessarily provide for a degree, the required level of technical and academic knowledge is most often acquired on the basis of a master's degree, master's or postgraduate degree. In some cases, highly qualified candidates can replace their experience in investigative bodies. Applicants must have the following qualifications: Be a U.S. citizenPass drug testPa background investigationPossess valid driver's licensesPossess near normal hearing and visionApplicants must start by clicking on the job placement on USAJobs.gov and a full registration form with the Office of Personnel Management. Applicants must submit additional documents, including: ResumeCTAP/CTAP documentationVeterans' preference documentationOfficial college transcriptCandidates who meet the initial requirements will be asked to complete a written assessment exam. A structured interview will follow. A background investigation will be carried out and the candidate will have to undergo a medical examination, psychological examination and polygraph test. Recruits will be enrolled in the basic sabotage investigator training program. This 12-week program is conducted at the DEA Training Academy and includes pre-Registration InvestigationsReporting Investigations DeA Diversion Investigator SalaryDEA leak investigators can join an agency with a payroll rating of GS-7 or GS-9 with a promotional potential up to GS-13. In 2012, the salary ranges for these three wage classes were: GS-7: \$34,149-\$44,391GS-9: \$37,819-\$49,168GS-13: \$72,032-\$93,641These figures for base salary only and can be adjusted for cost of living, overtime, overtime, and accessibility. Back to Top Hello, I don't know if this is the right place to ask about this (are there DEA sub employees?), but I was wondering if anyone here has experience in the process of hiring a DEA DI. I applied a couple of months ago, and now I'm scheduled for Phase 3 exam). I've seen an example of questions, and this is As I ace it's easy... so for the next part of the hiring there will apparently be an interview and (it's a question) polygraph? I couldn't find if it was just for agents or for all DEA employees. Not that I have anything to hide, but it's something I'd like to know, definitely coming or not. I've also seen some things about medical requirements. I did wartime and I have a service-related disability. I'm curious what they're looking for in this medical checkup. Nothing I have should stop me from doing di-work. It's probably D e me from a special agent, but I'm not trying for this position. Thanks in advance and if there is a better sub, please let me know. Page 2 14 Of the Investigator's Leak Commentary (DI) is a professional who probes the movement of money or product from its source to its destination. In most cases, this work is carried out by anti-drug specialists tasked with investigating the illicit production, distribution or sale of drugs. In the United States, many investigators leak work for the U.S. Drug Enforcement Administration (DEA), though other organizations also hire workers to investigate various leaked products. If you're applying to become a leak investigator with the DEA, you'll need a resume that demonstrates a solid background in data analysis, development decisions, and the ability to learn and accurately interpret federal and state laws. These skills can often be acquired through experience in law enforcement or military service, but can also be cultivated in other careers or through appropriate college degrees, such as criminal justice. The DEA will also check your physical merits with a medical examination. You will have to demonstrate good hearing and vision, although the use of glasses, contact lenses and hearing aids is allowed. Along with medical examination, the DEA will administer a drug test and background investigation before allowing you to become a leak investigator. Specifically, they will see if you have any history of drug use or other dangerous drugs. In most cases, applicants will not be hired if the DEA detects such drug use. Throughout its service, DIs that work on the DEA are subject to random location reassignment. This mobile life may be taxed on some people and applicants must decide for themselves if this lifestyle is well suited. If you still decide to become a leak investigator, you will undergo a 12-week basic training program conducted by the DEA's distraction operations unit. Basic training will give you investigative skills, take care of drugs and drug laws, and help you through practical experience in this area. In addition to tracking illegal there are a number of areas in which someone can become a leak investigator, from the detection of fraudulent banking transactions to illegal diversion of electricity by checking meters in residential areas. Before exploration, however, keep in mind that most of these jobs will not carry the title of leak investigator, which is used almost exclusively in connection with the DEA. Instead, you can be an internal auditor or perhaps a financial regulator. You don't necessarily have to make this career in order to become a leak investigator. Law enforcement agencies and companies often depend on feedback from civilian investigators to successfully solve sabotage. If this is a more viable way, seek the help of leaking investigative associations that train members how to legally assist and cooperate with professional agencies. Agencies.
