## Imaginarium castle instructions

Medieval castle Imaginarium is a children's toy that requires assembly when buying one. The castle contains some moving parts to make a drawbridge, but most parts are flat boards containing slots that slide together. Each part is pre-cut and ready to be assembled. No tools are required to build the lock. Insert Piece S into the slots on the back of the castle wall A. Insert a piece of T in the slot on the back of the castle wall T. Insert a piece of U in the slot on the back of the wall of Castle E. Level the grooves at the bottom of Castle B and C with grooves on top of the walls of Castle E. Tap the walls of Castle B and C down into the grooves to connect all three walls together. Line the grooves at the bottom of the walls of Castle A and D with grooves on top of the walls of Castle B and C. Push the walls of Castle A and D down into the grooves to connect the walls together. Insert the wall of Castle F into the space between the walls of Castle D and E. Place the roof of Castle G on top of the hole between the walls of Castle D, E and F. Insert the tower of Castle J in the holes on the roof of Castle I. Insert dowel d in the holes on the roof of the castle I. Place the newly formed roof of the castle on top of the hole between the walls of the castle B, C and D. Insert the castle tower K in the holes on the roof of Castle H. Insert dowel d into the holes on the roof of Castle J that stick to the bottom of the roof of Castle H. Place the newly formed roof of the castle on top of the hole between the walls of Castle A, B and C. Insert a piece of V in the slots aligned on the walls A and E. Insert the F rod into the wall Insert the B swivel into the same hole, through the F rod. Slide-dividing bridge R on the pivot B and rod F. Push the B turning mechanism and rod F all the way to the tip inserted into the hole at the opposite end of the drawbridge. Attach one end of the E drawbridge line to the holes at the end of the drawbridge. Connect the other ends of the drawbridge lines with holes on the B's rotary mechanism. Insert three parts I into slots on the drawbridge part of P Hill. Close the drawbridge on the hill. Expand the drawbridge at the castle. Line the top of the hill with a drawbridge on the castle. The gap between them should be the same length as a drawbridge. Attach parts of M and L to the windows on the highest tower of the castle. Attach the top of the N lock to the top of the same tower. Insert C poles into the holes on top of the lock N. Attach the roof of the O castle to the pillars. Insert the flag well into the hole on the roof of O. Castle level the slots on the W piece with the remaining slots on the walls of Castle B and C. Tap a piece of W into the slots. Attach the X staircase to the space between the corners of the A and D walls, on the side opposite side of the drawbridge and the hill. Attach the Y and I stairs to the X ladder. Place carts G and H on the outside of the wall of Castle A.
