Advice on choosing a single color according to feng shui. For events. Corel now has a 2017 version (last today), but in terms of I have some points, I'm not happy with the corel X7 version. Living with the digital advertising and printing industry, we can not lack basic software, although in line with modern trends, you are designing less use of this software, as in the past. But in construction production Corel plays a key role because it can be compatible with many types of equipment such as stickers, lasers, CNC ... quickly export digital printing files Why not use the 2017 or X8 versions, but also the corel X7? The X7 is a version that in my case is a stable session and still retains some features that I love: no need to adjust the machine is too strong run smooth than the current version of the X8 Favorite macro system remains (X8 removed available macrocodes) X8 and Corel 2017 nothing changes much, running heavy or hanging and needing a loud machine) At the moment some of you are using the corel X7 or X6 but when you open the network again, you are immediately forced to buy copyright. This fuss always has a lot of solutions. But since we don't yet have the ability to use copyrighted software, hacking is very common, but it's a criminal act, but in this situation we know how to do it now, because we are in paradise using pirated software. Crack X7 steps are not copyrighted. As I said there are many ways to crack the Corel X7 and X6, but as I direct you may be the most appropriate and, in my experience, is the most stable. The probability of success is high. Turn off the network, install and hack the usually customized host file blocks connections with the corel server Setting up the firewall configuration blocking the copyright verification program Set Corel X7 This step is very much guided on other pages (required to disable the Internet). This step chooses the following and follows the instructions Choose option: I do not have a serial number and want to try the product. By clicking Next repeatedly until the next step, I usually only choose CorelDraw and Bistream Font Navigation (font manager), Click Next. This step should always choose GPL Ghostscript to facilitate the export and import of EPS click Next continue to install After all options have been selected, this step is officially installed, click set now and wait for the machine to run This step is the end of the installation process, and we begin to crack the corel After installation we continue to disable the network and start Corel Select, as shown in Select Register later - Click Continue. Coel is finished, we go away and we reboot Corel again. At this point the screen registration appears We click already purchased? Choose the Enter serial number. Open Key in Crack Up - Select Choose CorelDRAW Graphics Suite X7 - Copy the key. (This step you're not pointing to is not to press the Generate Serial number button, and absolutely don't switch between versions in select product field because it can change the serial number and affect the hacking process failed) After the vegetarian key up pick the X7 version and leave so the note doesn't click on the Generate button..., Copy Serial Number and Paste on Next Step Step Click Active Offline - Follow Step 1 (Copy Installation Code from Corel via Keygen) No 2 (click on Generate Activation Code) No 3 (Copy Code Activation by Keygen viaCorel No 4 (Copy Code Activation) Continue). As shown below. Finish the steps on the screen appearEd as if cracked and completed the installation and crack pitch, now then we turn off the corel and edit the host file Edit host This step completely shuts down Corel and access to the next folder : C:-\Windows-\System32-\drivers,' etc. open the host file with a notepad and add the following lines to that file and save it. 0.0.0.0 apps.corel.com 0.0.0.0 mc.corel.com 0.0.0.0 origin-mc.corel.com 0.0.0.0 iws.corel.com PsiService\_2 Добавить строки, отмеченные в конце файла хоста Настройка блокировщика файлов PsiService\_2.exe в папке C:-\Program Files-\Common Files-\Protexis-License Service to control -Window-windowNs Firewall - Расширенная настройка Мы наберем 2 пункта Входящие правила и исходящие правила Выберите входящие правила - Новые правила Выберите файл Select программы Select file PsiService\_2.exe в папке C:-\Program Files-\Common Files-\Protexis-License Service Select Block Connection Press Next, чтобы продолжить наименование настройки (необязательное название), поэтому мы создали раздел Входящие правила : Связанные статьи Технология развития предлагает много вариантов для вас в соответствии с графическим дизайном промышленности.
