It aired on Fox on September 23, 2007. This episode is a reenactment and parody of the 1977 blockbuster Star Wars, which reconstructs the show's characters into the Role of Star Wars. The plot follows Peter, who reenacts the story of Star Wars while the biography is at home. Written by Alec Sulkin and directed by Dominic Polcino. To create the installment, employees asked Lucasfilm, the company that owns the rights to the Star Wars franchise, for permission. Blue Harvest guests include Chevrolet Chase, Beverly D'Angelo, Mick Hucknell, Rush Limbaugh and Judd Nelson. The episode included recurring voice actors Rory Allen, Adam West, Ralph Garman, Danny Smith, John Viner, Steve Callaghan, Kirk Butler, Marc Henterman, Johnny Brennan, John Benjamin, Phil Lamar and Wally Wing. It was watched by 10.86 million viewers and received generally positive reviews from critics. While Griffin watches television, the power goes out and plots as they remain with different forms of entertainment. While they wait for the force to return, Peter decides to retell the story of Star Wars, which begins with Part IV. The Rebel ship is captured by a star destroyer. The ship includes droid C-3PO (Quagmire), R2-D2 (Cleveland) and Rebel leader Princess Leia (Lois). While the ship is being boarded by stormtroopers, Leah tries to send mpeg sending to Obi-Wan Kenobi via R2, but she suffers from the many complications that R2 provides to deliver the message directly. Leah is captured by Darth Vader (Steii), and R2 and 3PO are caught by Jawas, who have to flee to Tatooine in a way out. The droid is sold to the family of a pollinator, whose nephew Luke Skywalker (Chris) wants to join the rebellion and fight the Empire. While cleaning the droid, Luke stumbled upon Leah's message inside R2, and later Farm. Luke and the C-3PO chase him, but are attacked by sand people. Luke falls to one of them (Opi) and Obi-Wan Kenobi (Herbert) discovers, and he takes them to the hut. Leah's message explains that R2 contains plans for the Death Star to be sent to his father on Alderaan's home planet and that obi-wan should ask for help. Obi-Wan tells Luke that he needs to learn the Force's methods and accompany Alderaan, and that he should give Luke his own lightsaber. When Luke realizes that the Empire needs to find a droid, he returns home and, with John Williams, discovers that his home is destroyed and his aunt and uncle are dead. Luke, Obi-Wan and Droid go to Moss Aisley and find a pilot to take them to Alderaan. In local Cantina, they agree to hire smuggler Han Solo (Peter) and Wookiee's co-pilot Chewbacca (Brian) to take him with his ship, the Millennium Falcon. The group is soon discovered by stormtroopers and flees into space, avoiding star destroyers before plunging into hyperspace. Leah is imprisoned in the Death Star, where commander Grand Morph Taquin (Adam West) destroys Alderaan. The Millennium Falcon exits hyperspace and is captured by the Death Star's tractor beam and enters hangar bay. Han and Luke, disguised as stormtroopers, set out with Chewbacca to rescue the captive princess, while Obi-Wan blocked the tractor beam and the R2 and C3PO stayed behind. Han, Luke and Chewi ein to rescue Leah, and four of them jumped into a garbage suit, escaped the Stormtrooper and found the sofa in the garbage masher below. While escaping the Death Star, Obi-Wan turns off the tractor beam and encounters Darth Vader in a lightsaber duel. Vader is holding a sofa to knock Obi-Wan down as others board the Falcon. The Falcons travel to Yabini IV's rebel base, where the Rebels analyze death star plans and find weaknesses. Luke joins the attacking team and Han is rewarded for his rescue and ready to leave. Rebel fighters (including Simple Red, Helen Reddy, Red Fox, Red Button, Red Button, Red October, And Big Red Sword's artificial pack) attack the Death Star but suffer heavy losses during the assault. Luke heard Obi-Wan's voice telling him to use the Force while running, and he pulled out a targeted computer. Vader appears with a group of his fighters, and Han arrives on the Falcon, attacking Vader and his minions, sending Vader's ship into space and attempting to fire Luke's Starfighter. Guided by the Force, Luke fires into the harbor, destroys the Death Star, and returns with his friends to celebrate his victory. When Peter returns to Griffins' home, he finishes the story when the power comes back. Chris pointed out that robot chicken already says that, but thanks Peter everyone keeps them entertained Peter dismisses the show and mocks it, and Chris storms. Production Family Guy creator Seth MacFarlane was the executive producer of the episode. Blue Harvest, which first aired on September 23, 2007, premieres the sixth season of Family Guy. [1] [2] Alec Sulkin, who was on the show for the fourth season, wrote the screenplay. [2] Series veteran Dominic Polcino has been directing the series since his first season. [3] Series regulars Peter Shin and James Purdham. [2] The music in this episode was composed by Walter Murphy. [2] Family Guy creator Seth MacFarlane explained that the reason he parodied Star Wars in particular was because the show's staff were big fans of the film. [4] They also chose Star Wars because Lucasfilm allowed it. [4] Macfarlane revealed that he was creating a parody based on The Lost Ark or Pirates of Star Trek II: Khan's Wrath was originally considered, but assumed they would not be able to obtain permission from the owner of that property (in this case Paramount Pictures). [4] Lucasfilm gave the show staff only one condition: the character should look the same as in the movie. [4] The clip of the episode was shown to audiences at Star Wars Celebration IV hosted by Macfarlane, Sulkin and Falcino, and executive producer David A. Goodman. [5] [6] This episode was previewed at Comic-Con International in 2007. [7] In addition to the regular cast, actors Chevy Chase, Beverly D'Angelo, Judd Nelson, musician Mick Hucknell, singer Helen Reddy and political commentator Rush Limbaugh were guest. [2] Repeat guest actors Phil Lamar, Johnny Brennan, John Benjamin, Laurie Allen, Adam West, Ralph Garman, writer Danny Smith, writer John Viner, executive producer Steve Callaghan, Kirk Butler, executive producer Mark Henteman, writers Wally Wing and Alec Sulkin also made minor appearances in the episode. [2] Cultural Reference This episode was a reenactment of George Lucas's Star Wars Episode IV: A New Hope. Blue Harvest contains many references to popular culture, especially the Star Wars movie series. Most of the episodes themselves are reenactments of George Lucas's movie Star Wars. [8] The name of the episode is a reference to the fake working title for the production of The Return of the Jedi. [8] When Peter tries to start the story, he says it's about love and loss, father and son, and foresight to maintain international gift certificates, and mentions that 20th Century Fox gave Lucasfilm that rights. [4] While text scrolling actress Angelina Jolie, her film Jia, is mentioned by television channel HBO. [8] One of the star destroyers displays a bumper sticker with the bush-cheney mentioning U.S. President George W. Bush. Dick Cheney's 2004 re-election campaign. [8] When the Millennium Falcon enters hyperspace, the visual effects are replaced by an intro sequence of Doctor Who using a version of the Tom Baker-era sequence. And when the Millennium Falcon leaves hyperspace, it arrives at an asteroid. When Leia is caught, Vader asks where he hid his Death Star plan and answers that he's in one of twenty-six briefcases, a reference to a game show deal or no deal. [9] While Luke is watching the sunset, he introduces Star Wars composer John Williams and the London Symphony Orchestra to break the fourth wall and parody scenes from the blazing saddle featuring Bashi and his orchestra. [8] Luke asks the orchestra to play the People's Court theme. [8] In the episode where Luke discovers that he murdered his uncle and aunt, he finds Williams and the entire orchestra dead. This episode saddens Luke because it must be scored by composer Danny Elfman before Luke greets him with a lightsaber. [8] While searching For R2-D2, Luke listens to conservative political commentator Rush Limbaugh's radio show, in which Limbaugh says the liberal galactic media is saying that the planet hose is melting. [8] One of the band members who plays in Cantina asks for a song request and then subtly responds to his question by telling him to play the same song, which is a reference to the fact that the song plays in the movie world lasts for a long time. [10] Obi-Wan plays Luke in the movie Dirty Dance when he never sees Luke again (the time of my life). [8] In the fight against a group of Thai fighters, Luke asks for the origin behind his name. The following footage shows that the pilot is from Thailand. Leslie Nielsen's character movie Airplane! I wish you good luck in your encounter with Thai fighters. [10] As we explore ways to destroy the Death Star, the Rebels watch a training video hosted by basketball player Magic Johnson. [10] Characters from The Chevrolet Chase and Beverly D'Angelo's National Lampoon's Vacation Movie appear driven by the Death Star. [8] Seth Green's voice, Chris points out that Robot Chicken has already played a Star Wars parody (Green is the creator of Robot Chicken). [8] In its first broadcast on September 23, 2007, Blue Harvest reached 10.86 million viewers. [11] This episode received a 5.5 Nielsen rating, a viewership measurement system developed to determine the audience size and composition of TV shows in the United States, based on demographics of 18 to 49 people. [11] The reviews of this episode were generally positive. Common Sense Media called the episode a fantasy favorite satire to three out of five stars. [9] Brad Trekach of TV He also praised Blue Harvest and said it was a fun episode to watch. He thought Macfarlane kept the story pretty well and had enough Connie jokes to make it fun. [8] IGN's Asan Haq criticized Herbert for choosing Obi-Wan, giving him 7 out of 10, but said the other option was spot-on. He concluded the review by saying that the episode was a success, but that he wished there was more to it, given the nature of the source material. [12] After reviewing the entire season later, Haque said that the episode was generally fun, but certainly not very good. [13] In 2019, however, IGN's Jesse Schedeen announced that blue harvest was the first attempt by family guy to dedicate an hour-long episode for Star Wars. [14] Zap2it's Daniel Fienberg also announced the release of Robot Chicken's Star Wars special shortly after, but it gave a positive review and it got worse. [15] Entertainment website Digital Spy's Tom Ames placed third place on his list of best Family Guy episodes in order of Yucukyu and described the episode almost the same [with the sequel] but better. [16] Newsday's Diane Werts gave a more mixed verdict, saying from the bull's eye satire to the unexpected fair, and it wasn't for fans other than Star Wars. [17] TV critic Robin Pearson also gave mixed reviews, criticizing Herbert's character and the author for using the musical moments of the episode that he called an uninteresting waste of time, although he praised how the episode satirized the Star Wars universe; He concluded the review by saying that the more he likes Star Wars, the more he will enjoy it. There's a lot of bad material to remind those who know Family Guy better than Star Wars that there's no change. He gave episode 65 in possible 100. [10] The Parent Television Committee, a frequent critic of Family Guy, criticized episodes that were perceived to be frequent use of sexual conversations, which were enough to have an S-content manual for sexual content (the episode was rated tv-14-DLV by Fox). [18] In 2009, the TV guide was named Blue Harvest #99 and topped the list of 100 greatest episodes. [19] Home Media Episodes for DVD was released on January 15, 2012 on Blu-ray for 1008.
