You can also open the configuration file in the form of a text document. The file format of the configuration file is XML. Compressor settings, per user in the computer's registry. The user can enable or disable the ability to drag and drop. Configure the picture settings such as the picture quality, canvas size, and so on.Q: How to tell if google closure compiler was successful in compilation? I'm running Google Closure compiler on a.js file I've just saved. When I run it, it says the compilation is successful. However, it does not say whether the compilation was successful. So, for example, if I have the following `{ var firstName; function fullName(firstName) { return firstName + " " + this.lastName; } }` and I run the following: `google-closure-compiler version v1.7.0 --compilation_level SIMPLE_OPTIMIZATIONS --language_in java --language_out javascript --js_shell_script.js --js_output_file shell_script.min.js` I get no errors, no warnings, and the compiled JS file says: "Google Closure Compiler v1.7.0" /* * Copyright (c) 2011 The Chromium Authors. All rights reserved. * Use of this source code is governed by a BSD-style license that can be * found in the LICENSE file. */ Here is what the code looks like: `function fullName(firstName) { 520fdb1ae7`
