MiniTool Power Data Recovery Professional Edition is a full-featured data recovery application that recovers all types of files from any type of corrupt or damaged storage media. It allows you to recover data from virtually any storage device and application with virtually any type of problem (including inaccessible and corrupt) including lost, formatted, damaged, overwritten, and missing files, directories, and volumes. If you think you have lost some important data, you can try MiniTool Power Data Recovery Professional Edition. File recovery using MiniTool Power Data Recovery Professional Edition is easy, fast and free! Although the tool's performance is great and it has great features, a price is not required to get a free trial.

Recovery Process: Once you have identified the recovery process, you can determine which types of data recovery to carry out. MiniTool Power Data Recovery Professional Edition will be able to recover files from a variety of sources including hard drives, digital cameras, external drives, flash drives, and many other storage media. With this application, you can restore information from mobile phones, memory cards, digital cameras, MP3, iPod, iPod Nano, Samsung, Motorola, Philips, and Garmin devices. All information recovered is available in a user-friendly interface.

Features: The application's main features are listed below:

- * Recovery of lost files from all types of storage devices
- * Recover files that cannot be found by any other data recovery program
- * Create a dedicated drive to store recovered data to safeguard your data.
- * Recover files in RAW format, including RAW files from digital cameras
- * Automatically identify the file type of the media you are attempting to recover

Allows you to preview the recovered information and select what you need to recover.

How to Recover Files: You will only need to use one of the following methods to recover lost or deleted files.

- * Extract deleted files from a recovered partition
- * Recover files that were accidentally deleted by accident
- * Recover files that were accidentally overwritten by other files.
- * Recover files that were lost due to an error on your computer.
- * Recover files that were lost due to a hardware failure on your computer.
- * Recover files that are lost due to a virus, virus, Trojan, adware, spyware, worm, malware, or any other malicious software.
- * Recover files that were lost due to a virus, virus, Trojan, adware, spyware, worm, malware, or any other malicious software.
- * Recover files that were lost due to a hardware failure on your computer.
- * Recover files that were lost 520fdb1ae7
