User guide, guide and specs for your Westinghouse WDF901SA Dishwasher. The database contains 1 Westinghouse WDF901SA Guides (available for free online viewing or download in PDF): Installation guide. Measure and Installation Guide: WDF901SA, WDF901WA, WDF902SA, WDF902WA IMPORTANT - These instructions are only a guide. For full installation instructions, please contact the product management. If you will not follow the instructions of installing the dishwasher will not be properly installed. The product warranty does not cover incomplete or incorrect installation. You will be charged a service fee for any service call to fix an incorrect or incomplete installation. These instructions only apply to standalone applications. If your dishwasher is equipped with a water hose with a protective valve, you will need the opening of at least 45 mm x 90 mm in the cabinets in order to feed the hose through it. The sizes of the dishwasher are in millimetres. The height of 850 mm with alignment of the foot is screwed at a minimum height. The control panel center 100mm 596mm Cupboard sizes are shown below in millimeters. Opening There should be minimal allowing for some clearance so that the dishwasher can be a 2mm gap between the top of the dishwasher and pushed into place. Bottom of the bench top Note: If the hole is larger than 600mm wide, then the appropriate width filler piece should be fixed in the cupboard before installing the dishwasher. must be equal and no more than 620mm 850mm 820mm 180mm 505mm 555mm edge door 585mm center door hose should not be extended by more than 2 meters or water pumping problems may occur dishwasher rupture on both sides, than 3 mm on each side If the floor is not level, adjust the leveling feet to satisfy Remove all the plastic built under the free-standing dishwasher Fitting under Counter Put the device adjacent to the tap and sump. The plinth of the free-standing device is not regulated. Do not remove the work surface of the device if you want to use it as a standalone unit. Do not remove the countertop when installed under a standard kitchen bench on top. Only remove the work surface of the device for installation under the close installation of a sink or kitchen countertop (820 mm). Make sure the deepening sizes agree with this size. Removal Appliance workTop 1. Remove the rear screws. 2. Pull the countertop behind the appliance. 3. Lift the countertop and move it out of the front slots. Fix the drainage hose at a maximum of 4. Level from the device using adjustable legs. 10 mm below the top of the 5. Install the appliance under the kitchen countertop, ensuring that the water hoses in the dishwasher will be broken or crushed. The device should be readily available for appliances if repairs are needed. SINK 600mm max - 300mm min 1000mm max max OUTLET POWER SUPPLY 230/240V-10Amps Remove the entire plastic membrane from the tap sink trap and fit the drainage hose for the tap with a TAP CONNECTION clamp If the cold water pressure exceeds 800kPa, the pressure reduction valve should be used. Check for leaks. INLET WATER SUPPLY Water Flow Speed 10L/minute min o Water temperature 60 C max Water pressure Cold water: 800kPa max - 50kPa min Water pressure hot water: 350kPa max - 50kPa min Cold water recommended 1.1 Table Content 2 3 4 5 6 7 8 9 10 12 13 14 15 16 17 18 19 20 How disappointing it is to own this model. only to notice that it had ceased. I have contacted customer help, twice now regarding this dishwasher. Like everyone else, he was 5 years old and he stopped working. Barely used since only two people in the house are so lucky to be on 2 times a week. No email response to date, so I wouldn't recommend buying any Westinghouse product because customer service is zero. A similar opinion? Write a review on ProductReview.com.au! Page 2The same thing happened today with our dishwasher, the same age as others reported. The control board is melted, lit, smoke, pungent smell. Luckily, we were home. Sometimes I turn on the dishwasher and go to work, leaving the family to sleep. I would like to hear from Electrolux considering this is not an isolated case. A similar opinion? Write a review on ProductReview.ru! Page 3I have had this machine for 3 years, used maybe once or twice a week. Never wash big, dishes tend to stay wet. Last week I had a fire brigade here because of the smoke in the kitchen, I couldn't work where it was coming from. The smell was toying me. It turns out it comes from a washing machine that literally burned down. Honestly, I expected such a well-known brand to have reliable products - stupid me. I won't fix it or buy another Westinghouse product. A similar opinion? Write a review on ProductReview.com.au! Page 4I loved this dishwasher (this is my second Westinghouse dishwasher), however around NY Eve's started smoking, luckily we were still awake and we had a smoke alarm, the dishwasher continued to work when he smoked. The dishwasher is about 3 years old and it's out of warranty. When we opened the front panel, the PBC EDW100 was partially melted. Looking at other reviews, this is a common mistake, and this dishwasher is not a quality product and should probably be recalled, or at least a specific SN should be recalled. Eco cycle, clean dishes back down and fortunately don't burn the house down. A similar opinion? Write a review on ProductReview.com.au! Page 5I can't say it's not good, I think it cleans well enough, but I had a very good and I say old - about 20 years, miele and cups were dry bones - this one likes to leave pools of water in the tops of mugs!! if you don't mind that, then it's a good car. Seems to be running well doesn't dry well enough for my my Opinion? Write a review at ProductReview.com.au! Page 6Ifer with Simpson's dishwasher for 12 years of loyal service, he finally packed it. This washer made in the EU, found it to clean the dishes fantastically. It's very quiet, but I'm collecting new styles of washer these days. Used Aldi tablets and aldi to rinse the relief. You have to use help to rinse. All the dishwashers we looked at were less as a dish than the old Simpson, but all dishwashers these days. All plates and cups fit in. Can't complain at all about the dishwasher, it looks good and still after 3 weeks of daily use, no problem. I use heavy settings for pots and pans and they clean fantastic. I found this device to be a great washer. A similar opinion? Write a review on ProductReview.com.au! How frustrating it is to own this model, only to notice that it is discontinued. I have contacted customer help, twice now regarding this dishwasher. Like everyone else, he was 5 years old and he stopped working. Barely used since only two people in the house are so lucky to be on 2 times a week. No email response to date, so I wouldn't recommend buying any Westinghouse product because customer service is zero. A similar opinion? Write a review on ProductReview.com.au! Page 2 As many other reviews, the dishwasher has been working normally for 5 years, (although we had a similar problem when first purchased and we returned it for sharing) and then we turned our dishwasher into a normal cycle before bed, I woke up in the morning and found that the smell and smoke was coming from the door and the engine was running open. Very dangerous!!! A similar opinion? Write a review on ProductReview.com.au! Page 3I loved this dishwasher (this is my second Westinghouse dishwasher), however around NY Eve's started smoking, luckily we were still awake and we had a smoke alarm, the dishwasher continued to work when he smoked. The dishwasher is about 3 years old and it's out of warranty. When we opened the front panel, the PBC EDW100 was partially melted. Eco cycle, clean dishes back down and fortunately don't burn the house down. A similar opinion? Write a review on ProductReview.com.au! Where there is family, friends and food, there are dishes. And let's face it, you have better things to do than do the dishes. Adjustable top baskets of our dishwashers, FlexRack cutlery tray and fast wash cycles, allow you to get everything cleaner faster.
