Abortion is also known as therapeutic abortion, therapeutic abortion or abortion of wanted pregnancy. Abortion is often divided into types: early abortion (first trimester), late abortion (second trimester), and therapeutic abortion. Abortion of wanted pregnancy is an abortion that is done for medical reasons, such as maternal health or severe fetal abnormalities. Abortion is legal in most countries, and is available in many countries under certain conditions.

Abortion is a medical procedure that results in the termination of a pregnancy. It can be performed medically, surgically, or through induced abortion. Abortion is often performed for medical reasons, such as maternal health or severe fetal abnormalities. Abortion is legal in most countries, and is available in many countries under certain conditions.
