

Extended Drawing Tools for Manufacturing

Construction lines

The program includes a total of 32 options to create construction lines and 7 options to create construction circles. Construction lines can be used as references to create other objects and make drafting easier.

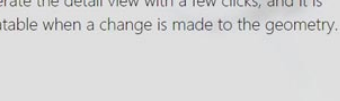

Advanced Centerline

You can add centerline to circle or rectangle by simply selecting objects. Centerlines can be drawn to one single entity or multiple entities.

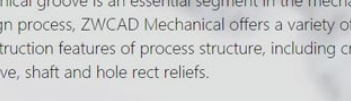

Reusable detailing tools

Generate the detail view with a few clicks, and it is updatable when a change is made to the geometry.

Draw Groove quickly and accurately

Technical groove is an essential segment in the mechanical design process. ZWCAD Mechanical offers a variety of construction features of process structure, including crack groove, shaft and hole rect reliefs.
